PROFESSIONAL SUMMARY

Azure DevOps Engineer with 4+ years of experience architecting enterprise-grade, cloud-native infrastructure on Microsoft Azure. Specialized in Azure DevOps YAML pipelines, AKS, Terraform, and Ansible for scalable and highly available production systems. Experienced in implementing Blue-Green and Canary deployment strategies, enforcing governance using Azure Policy, managing identity with Azure Entra ID, and ensuring business continuity through Azure Backup and Azure Site Recovery. Proven record of reducing release cycles by 45%, improving infrastructure consistency by 60%, and strengthening cloud security posture across enterprise environments.

PROFESSIONAL EXPERIENCE

Azure DevOps Engineer

Tech Mahindra Limited

Oct 2021 – Present

- Architected and optimized enterprise-grade CI/CD pipelines using Azure DevOps YAML pipelines, Jenkins, and GitLab CI, accelerating release cycles by 45%.
- Led implementation of Blue-Green and Canary deployment strategies across AKS clusters to ensure zero-downtime production releases.
- Engineered Infrastructure as Code solutions using Terraform and Ansible, eliminating 60% manual configuration effort and enhancing deployment reliability.
- Designed scalable and highly available AKS environments using Helm and Argo CD to support microservices-based applications.
- Implemented GitOps workflows for automated, version-controlled, and auditable deployments.
- Configured Azure Policy to enforce governance, compliance, and resource standardization across multiple subscriptions.
- Managed identity and access control using Azure Entra ID and implemented Role-Based Access Control (RBAC) for secure cloud access.
- Designed and implemented disaster recovery and backup strategies using Azure Backup and Azure Site Recovery to ensure high availability.
- Integrated DevSecOps practices using SonarQube and Veracode for SAST/DAST security scanning, improving code quality and compliance posture.
- Configured centralized monitoring, alerting, and performance tracking using Azure Monitor and Grafana dashboards.
- Managed Azure infrastructure including Virtual Machines, VNets, NSGs, Azure Container Registry (ACR), Load Balancers, and Storage Accounts.
- Configured and troubleshooted networking components including DNS, VPNs, SSL/TLS, firewalls, and load balancers.

TECHNICAL SKILLS

Cloud Platform — Microsoft Azure (AKS, Virtual Machines, VNets, NSGs, Azure Container Registry, Azure Monitor, Azure Policy, Azure Backup, Azure Site Recovery, Azure Entra ID, Storage Accounts, Load Balancer)

DevOps & CI/CD — Azure DevOps, Azure Pipelines (YAML), Jenkins, GitLab CI, Git

Containers & Orchestration — Docker, Kubernetes (AKS), Helm, Argo CD

Infrastructure as Code — Terraform, Ansible

Monitoring & Logging — Azure Monitor, Grafana

Security & Governance — Azure RBAC, Azure Entra ID, Azure Policy, SonarQube, Veracode

Scripting — Bash, Python

Networking — TCP/IP, DNS, VPN, SSL/TLS, Firewalls

Databases — MySQL, PostgreSQL

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900)

Microsoft Azure Administrator (AZ-104)

Hackerearth KED Azure DevOps – Level 1

EDUCATION

Bachelor of Technology, Electronics and Communication Engineering

BCET, Durgapur

GPA: 7.42

2020
