

Rohan Rajput

Full Stack Developer

USA | +1 (716) 398-8982 | rohanraj78@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Full Stack Developer with 6 years of experience building, deploying, and optimizing high-impact web applications. I am skilled in designing scalable frontend and backend systems, with expertise in modern JavaScript frameworks (React.js, Angular, Vue.js), robust backend technologies (Node.js, Spring Boot, Django), and cloud platforms (AWS, Azure, Google Cloud). Proficient in database management (SQL Server, MongoDB, PostgreSQL) and CI/CD pipelines, including Docker and Kubernetes, to streamline development and deployment processes. I am known for delivering clean, maintainable code and driving cross-functional collaboration to ensure successful project outcomes. Passionate about adopting emerging technologies to improve functionality and user experience.

Work Experience

Java Full Stack Developer, Goldman Sachs (Contract), USA

Jul 2024 – Present

Responsibilities: -

- Developed and maintained full-stack applications using React.js, Node.js, Spring Boot, and SQL Server, optimizing app performance and reducing page load times by 30%.
- Designed microservices with Spring and Express.js to improve scalability, allowing for 40% faster system expansion and maintenance.
- Utilized AWS and Kubernetes to implement secure, scalable deployments, reducing infrastructure costs by 25%.
- Enhanced frontend using Vue.js, Bootstrap, HTML5, and CSS3 for consistent, responsive UI, improving mobile usability by 20%.
- Managed CI/CD pipelines using Docker, Jenkins, and GitHub, reducing deployment time by 50% and minimizing production errors.

Full Stack Developer, Research Foundation for SUNY, Buffalo, NY, US

Aug 2023 – Jun 2024

Responsibilities: -

- Built responsive and interactive user interfaces using Angular and AJAX, increasing user satisfaction and engagement by 30%.
- Integrated backend services with Django and MongoDB, optimizing data retrieval speeds of 35% for large datasets.
- Configured and optimized cloud infrastructure on AWS, resulting in a 20% increase in system reliability and uptime.
- Implemented Power BI and Tableau dashboards to visualize complex datasets, empowering teams to make data-driven decisions efficiently.

Software Development Engineer, Capgemini India

Sep 2018 – Aug 2022

Responsibilities: -

- Engineered robust applications with Java, Spring Boot, MySQL, and Oracle, achieving a 25% increase in application stability.
- Optimized backend processing with Apache Tomcat and improved query handling across SQL Server and PostgreSQL, reducing data retrieval time by 40%.
- Led the migration of legacy systems to microservices architecture, improving system modularity and reducing downtime by 35%.
- Collaborated closely with cross-functional teams, including UI/UX designers and DevOps engineers, to deliver high-quality software solutions within Agile frameworks.
- Created responsive, interactive components using HTML5, CSS3, JavaScript, and jQuery, resulting in 20% faster front-end loading times.
- Standardized CI/CD processes using Kubernetes and Jenkins, achieving a 50% increase in release frequency and consistent code quality.

Full Stack Developer, Doublene, India

Jan 2018 – Aug 2018

Responsibilities: -

- Developed end-to-end web applications using React.js, Node.js, and PostgreSQL, improving system response times by 30%.
- Enhanced interactivity with AJAX and jQuery, contributing to a 15% increase in user engagement.
- Built secure, efficient databases with MS SQL Server and MongoDB, ensuring 20% faster data processing and retrieval times.
- Assisted with code reviews and quality assurance in Git, Eclipse, and JupyterLab, achieving a 95% code quality metric and reducing bugs by 25%.

Projects

Igniter - Transforming Startup Dreams in Buffalo | React, Django, Flask, LLM

- Wrote entire frontend and integrated with LLMs APIs, secured 2nd place in hackathon with “Igniter,” an AI-Assisted Planning tool, fostering startup growth and connecting talents in Buffalo’s Tech & Startup community.

Water Licensing on Blockchain | Solidity, Ganache, Web3, React, JavaScript, GitHub, Bootstrap

- Minted ERC-721 NFT, representing ownership of a blockchain based water-selling business in water-scarce areas. Created React app for application logic, and interaction with smart contract written in solidity.

Pintos Operating System | C

- Implemented solution to avoid busy waiting by threads, priority thread scheduling, user program support, and multiple system calls in Pintos OS in a team of 3.

Technical Skills

- Programming Languages:** Java, JavaScript, Python, C, SQL, TypeScript
- Frontend:** HTML, HTML5, CSS, React.js, Angular, Vue.js, jQuery, AJAX, Bootstrap, Figma
- Backend:** Node.js, Express.js, Spring Boot, Apache Tomcat, Django, Spring, Kafka, RESTful APIs, Microservices
- Databases:** MS SQL Server, Oracle, MySQL, AWS Dynamo DB, Mongo DB, PostgreSQL
- CI/CD and Cloud Services:** Docker, Kubernetes, Jenkins, Amazon Web Services (AWS), Azure, Google Cloud, DevOps
- Tools & IDE's:** Git, GitHub, Eclipse, IntelliJ, NetBeans, JupyterLab, Visual Studio, Tableau, Power BI, SSRS

Education

Master of Science in Computer Science

Aug 2022 – Jan 2024

University at Buffalo, The State University of New York, Buffalo, NY, USA

Bachelor of Technology in Mechanical Engineering

Aug 2014 – Jun 2018

Indian Institute of Information Technology, Jabalpur, India
