OBJECTIVE

Senior Developer with over 6 years of experience in designing and developing comprehensive software solutions, proficient with Azure and AWS cloud platforms. Seeking a Full Stack Developer role where I can apply my diverse skill set, with a long-term goal of transitioning into a Solution Architect role. Committed to contributing to projects that drive business value while supporting my continuous professional growth.

EDUCATION

Master of Computer Science, University of Central Missouri 2023 - 2024

Bachelor of Computer Science, Visvesvaraya Technological University 2012 - 2016

TECHNICAL SKILLS

Front-End	JavaScript, Typescript, Angular, HTML, CSS
Middle-Tier	C-Sharp, .NET Core, ASP.MVC, Python
Back-End	Microsoft SQL Server, MongoDB
Cloud Computing	Azure, AWS
Tools	Visual Studio, Visual Studio Code, Git, JIRA, Confluence, Bitbucket, Jenkins
Testing	Cypress, Jest

SOFT SKILLS

Team Collaboration	Communication
Problem Solving	Adaptability
Time Management	Leadership
Critical Thinking	Creativity

CERTIFICATIONS

Exam 70-532, Developing Microsoft Azure Solutions 2017

Exam 70-533, Implementing Microsoft Azure Infrastructure Solutions 2017

PROJECTS

SignSage *Personal Project*
Developed a comprehensive document management and eSignature application using .NET Core for the backend and Angular for the frontend. The system integrates with Azure Cosmos DB for efficient data storage and SignServer for eSignature functionality. Key features include template management, document creation, automated customer onboarding, and renewal management. Implemented role-based access control and audit trails to ensure security and compliance. The project emphasizes modular design, scalability, and high performance.

UniPool *Personal Project*
Developed a robust and scalable carpooling platform leveraging .NET Core for the backend and Angular for the frontend, integrated with Azure Cosmos DB for efficient data management. The system adheres to Clean Architecture principles, promoting modularity, separation of concerns, and ease of maintenance. Implemented JWT for secure authentication and custom middleware to manage API requests efficiently, ensuring both security and performance. This project exemplifies a modular and extensible design, capable of accommodating future enhancements and scaling requirements, with a strong emphasis on optimizing performance and security.

EXPERIENCE

Associate Lead

ProArch IT Solutions

Nov 2019 - Sept 2022

Bengaluru, India

Meter Data Management

- Reduced Angular client bundle size by 25% through lazy-loading, bundle analysis, and dependency optimization, improving load times and enhancing user experience.
- Decreased post-deployment issues by 30% by writing comprehensive Cypress tests, which streamlined the validation of key user flows like login and data visualization.
- Enhanced data visualization and performance by developing custom combo charts with ngx-charts, enabling users to analyze multiple parameters simultaneously.
- Collaborated on a .NET Core middle tier and Oracle database back end, contributing to the application's robust data management capabilities.

Senior Software Engineer

ProArch IT Solutions

Mar 2019 - Oct 2019

Bengaluru, India

One Portal

- Improved sales efficiency by 40% by digitizing the manual license creation process using Angular and .NET Core, enabling the CCS sales team to automate document generation and email distribution.
- Reduced administrative overhead by 30% by developing an admin dashboard for managing sales representatives, with deployment and storage solutions on Azure.
- Enabled real-time document editing and sharing by sales representatives, significantly improving efficiency and reducing manual intervention.

Software Engineer

ProArch IT Solutions

Dec 2016 - Feb 2019

Bengaluru, India

Legacy Rewrite

- Refactored web forms architecture to MVC design patterns. Redesigned UI using Kendo UI and Telerik reporting.
- Improved deployment accuracy by leveraging Visual Studio publish profiles, ensuring seamless transitions between development and production environments.
- Configured Azure resources and set up CI/CD pipelines for automation. Used Visual Studio publish profile for seamless deployment.

LEADERSHIP & INITIATIVES

- Developed proof of concepts (PoCs) for Product Recognition and ProPassReset Chatbot projects using Unity and automated password reset using the Microsoft Bot Framework during my tenure in the Presales/R&D team.
- Selected as one of 6 employees from all the ProArch branches for the SEAL Team 6 Program, based on software engineering and cloud expertise. Developed PoCs in cutting-edge technologies presented to potential clients.
- Participated in multiple hackathons organized by ProArch IT Solutions, collaborating with teams to prototype innovative solutions in time-constrained environments.
- Created IaC scripts and ARM templates on Azure to automate cloud environments, and led a PoC on AWS for processing CSV files with Lambda and API Gateway.
