

GANESH NAKKALA

PROFESSIONAL SUMMARY

.NET Developer with 5 years of experience in developing robust applications using .NET Core, ASP.NET, and C#. Skilled in database management with SQL Server and MongoDB, and experienced in using Entity Framework for efficient data operations. Experienced in developing Single Page Applications (SPA) using Angular. Adept at implementing CI/CD pipelines using Azure DevOps, automating the continuous integration and delivery of applications. Hands-on experience with Azure, deploying and managing services such as Azure App Services, Azure SQL Database, and Azure Functions. Skilled in containerization using Docker, including creating and managing Docker images and orchestration with Kubernetes. Strong expertise in Agile methodologies, fostering team collaboration and project success.

SKILLS

- .NET Core, ASP.NET, C#, Entity Framework, LINQ
- HTML5, CSS3, JavaScript, React, Angular
- Azure, CI/CD, Docker, Kubernetes, Terraform
- SQL Server, MongoDB, Dapper, Entity Framework Core
- Visual Studio, Git, Jenkins
- Unit Testing, NUnit, Moq, xUnit

WORK HISTORY

.NET DEVELOPER 10/2023 to Current

Verizon, Irving, TX

- Developed web and backend applications to enhance user experience and system performance for Verizon's customer account management system, ensuring efficiency.
- Redesigned a legacy application using ASP.NET Core and React, integrating cloud services for scalability and performance in high-traffic scenarios and improving UI.
- Optimized SQL Server database queries with Dapper to improve performance for high-volume data transactions and reduce latency.
- Created and consumed WCF services based on SOA architecture, enhancing system security and ensuring reliable communication between distributed applications.
- Implemented CI/CD pipelines using Azure DevOps, improving deployment efficiency, reducing downtime, and ensuring continuous integration and delivery.
- Utilized Docker and Kubernetes for containerization and orchestration, enhancing scalability and maintainability, and ensuring seamless deployment.
- Optimized front-end GUI using HTML5, CSS3, JavaScript, and XML, significantly improving usability and overall performance for end-users.

Environment: ASP.NET Core, React, C#, Dapper, WCF, SQL Server, Azure, HTML5, CSS3, JavaScript, AJAX, jQuery, TFS, Agile.

SOFTWARE ENGINEER 12/2022 to 09/2023

Credit One Bank, Las Vegas, NV

- Developed and maintained a secure online banking portal using ASP.NET Core and implementing role-based access control with ASP.NET Core Identity.
- Modernized the UI by implementing responsive design, improving navigation, and incorporating user feedback, which led to a 35% increase in user engagement.
- Developed RESTful services with ASP.NET Core Web API and implemented business logic using C#, ensuring reliable data transactions and maintaining high security standards.
- Utilized Dapper for lightweight ORM capabilities to streamline database operations and improve application performance in transaction-heavy environments.
- Deployed applications on Azure, utilizing Azure App Services, Azure SQL Database, and Azure Load Balancer for session management, ensuring high availability and optimal performance.

Environment: ASP.NET Core, React, Dapper, C#, SQL Server, Azure, HTML5, CSS3, JavaScript, MVC, TFS, Agile.

SOFTWARE DEVELOPER 07/2021 to 08/2022

Principal Financial Group, Des Moines, IA

- Developed a Client Management Portal using ASP.NET Core and Angular 11, improving client data management and operational efficiency.
- Built Microservices using ASP.NET Core to handle client onboarding, account management, and transaction processing, ensuring scalability and modularity.
- Implemented Secure Authentication with ASP.NET Core Identity, enhancing login security and user management with role-based access control.
- Optimized Database Operations with Entity Framework Core and SQL Server, designing efficient schemas and improving query performance.
- Enabled Real-Time Updates using SignalR, ensuring consistent and timely data synchronization across the portal.

Environment: ASP.NET Core, Angular 11, C#, Entity Framework Core, SQL Server, SignalR, Azure, HTML5, CSS3, JavaScript, MVC, Agile.

SOFTWARE DEVELOPER 03/2019 to 06/2021

Cardinal Health, India

- Developed web and desktop applications to streamline prescription management for healthcare providers and pharmacists.
- Implemented MVC architecture and developed Windows-based applications using WPF.
- Created database objects and wrote T-SQL queries for efficient data management.
- Utilized ADO.NET to implement efficient and secure database interactions, ensuring data integrity and optimal performance.
- Contributed to the design and implementation of interactive features within WPF Browser Applications, enhancing user interfaces and improving overall user experience.
- Worked on integrating web services and WCF services into existing applications. Participated in developing service contracts, data contracts, and configuration files.
- Collaborated on debugging and testing applications, identifying issues, and contributing to their resolution.

Environment: ASP.NET, C#, WPF, SQL Server, ADO.NET, MVC, HTML, CSS, Agile.

EDUCATION

Bradley University, Peoria, IL

Master of Science, Computer Science, 05/2024
