PROFESSIONAL SUMMARY

Technology Leader from Northwestern Kellogg's university with 22 years of experience in design and architecture of large-scale distributed applications in Retail and Banking domains looking for Architect positions.

ACCOMPLISHMENTS

Golden Spoke Top Performer Award Wells Fargo 2020

Accolades from Wells Fargo CTO

Six Sigma Green Belt champion

Outstanding performer award and accolades from Macys CTO

SKILLS

- Full stack Architecture, UX Design, Large Scale Applications
- Kafka, Spark, Mongo Db, Hadoop, HBase, Oracle,
- JEE, JSP, Spring, Spring Boot, Microservices, Spring JPA, REST, JSON, Junit, JREACT, Angular, JavaScript, HTML, WebLogic and XML,
- Elastic Search, Lucene, Endeca
- Microservices, REST API
- AI, Machine Learning, Modeling, NLP,
- Java, Python, Scala, SQL
- AWS cloud AZURE, Elastic Search, Flyway, Kubernetes, Docker, PCF, Microsoft Azure.
- CRM software: Salesforce
- ERP: SAP

BUSINESS EXPERTISE

Marketing, Sales, Retail, Banking , Partner Collaboration, Multinational Product launch, Go-To-Market , Partner Engagement

EDUCATION

Bachelor's degree in technology, India

Masters in AI Executive Program Northwestern Kellogg's University - Chicago, IL

WORK HISTORY

Lead Solution Architect, Autodesk 05/2022 -Current

- Designed API systems for Orders, Quote systems, Partner Account Management
- Designed Operational Dashboard using event driven architecture.
- Developed AI Semantic search Question and Answer Chatbot using LLM Langchain, Pinecone Vector DB
- Used AWS serverless architecture for microservices for Quote and Order systems.
- Designed and Developed Partner Collaboration APIs using AWS services such as Lambda, Event Bridge, DynamoDB
- Partner Payment processing Architecture with new Subscription model.

Skills: AWS, Kafka, Lang chain, LLM, Webservices, DynamoDB,

Lead Web Solutions Full stack Architect, *Lending Club*, SFO,CA

06/2021 -2022

- Leading the Web Architecture and Multi cloud team for transforming existing lending platform to Banking, Mobile, Customer Engagement and Marketing and Sales platforms from five countries.
- Ensured the development of the application adhered to the 12factor methodology, focusing on establishing a well-structured and scalable architecture.
- Working on React Native, Java, Microservices, Spring boot, Salesforce Marketing Cloud, Microservices.
- Designed and Architected robust Microservices applications with high scalability. Observability.
- Designed SaaS for Banking Payments on AWS Cloud and Azure with multi cloud architecture.
- Provided Microservices Architecture by analyzing end to end technical systems.
- Created a solution prototype using AWS lambda, step-functions, Otel, NodeJS
- Instrumenting the software using otel framework for better observability.
- Provided SLA, SLO, SLI framework for Dev, Testing and Product teams.
- Collaborated with end customers and internal stakeholders and delivered viable architecture solutions.
- Lead brainstorming sessions to develop potential solutions for business needs or problems. Documenting tradeoffs in build vs buy decisions. Evaluated new technology solutions.
- Designing resiliency, RTO, RPO for the entire eco system.
- Designed AWS Lambda serverless architecture framework for Marketing applications.
- Generate a technical document for the development team.
- Design and build function-centric solutions in the context of transition from traditional, legacy platforms to microservices architectures, micro front end services.
- Remains abreast of industry technical trends and new development to maintain current skills and remain current with industry standards.
- Skills: JEE, JSP, Spring, Spring Boot, Angular, Spring JPA, REST, JSON, Junit, JREACT, JavaScript, HTML, AWS, Elastic Search, Azure

Lead Full stack Architect, *Wells Fargo*, San Leandro, CA

03/2018 -06/2021

- Designed, architected new Web and API Platform using Microservices with Java, Angular, ReactJS, Spring boot, Kafka, MongoDB, oracle, REST API architecture for Customer Engagement Program and Customer Complaint Management Micro Service Platform.
- Started program from ground zero. Built a high performing team of size 20 people.
- Designed and implemented two major Web and API Platforms using Microservices, AWS Serverless architecture, Kafka, MongoDB, ReactJS, React Native, (Customer Engagement and Complaints) with highly challenging timelines.
- Saved \$50 million Expenditure by retiring old systems for ECMP over 2 years.
- On boarded 30 Line of business across Wells Fargo for using complaints platform, generating \$40 million per year.
- Designed and Implemented customer engagement tool using Elastic-Search.
- Converting a monolithic application to Microservices architecture using Spring Boot using 12factor app methodologies.
- Architected and Developed SaaS solution for Auditing complaints with multi-cloud solutions.
- Conducted Idea Lab for experimentation, nurtured new ideas. Used Python, Spark, Scala for Machine Learning initiatives.
- Skills: JEE, JSP, React Native, ReactJS, Spring, Spring Boot, Spring JPA, REST, JSON, Junit, JREACT, JavaScript, HTML, PCF, MongoDB, Kafka, Apigee, Elastic Search, AWS, AZURE, Pivotal Cloud Foundry (PCF)

Lead Full stack Architect with AIML, *Vision Service Provider VSP, SFO, CA*

02/2017 -01/2018

- Collaborated with business leaders to understand the business domain and client requirements and Drove technical analysis, architecture/design and development of quality technical solutions and deliverables. Validated architectures solutions to align broad spectrum of technologies with business needs. Designed and Implemented Web and backend claims system from Inception to Production.
- Created alignments with multiple teams and cohesive culture.
- Saved \$25 Million cost by implementing initiatives on decommissioning old systems.
- Designed multi-channel client architecture offering and providing differentiated end-user experiences by leveraging containerization and cloud technologies.
- Overlooking governance and microservices development guiding principles as well as ensuring the best practices for resiliency, observability, performance, security, availability, scalability
- Skills: JEE, JSP, Spring, Angular, AWS services, Spring Boot, Spring JPA, REST, JSON, Junit, JREACT, JavaScript, HTML, WebLogic, XML

Lead Solutions Architect eBay-Paypal SFO, CA

12/2014 -

01/2017

- Implemented, designed, architected, delivered Inventory services API which holds Inventory worth \$4 Billion dollars of Inventory used across eBay StubHub.
- Designed and Implemented Payment processing platform.
- Designed and Implemented Claims search platform using Elastic Search.
- Designed and developed StubHub inventory microservices platform which enabled new partners embracing the platform with only in 2 weeks vs 4 months which increased revenue growth by 50 pc reaching to \$2.5 Billion.
- Formulated framework to map business use cases that fit it into AI imitative.
- Skills: AWS, Angular, JEE, JSP, Spring, Spring Boot, Spring JPA, REST, JSON, Junit, JREACT, JavaScript, HTML, WebLogic, XML

Full stack Web solutions Architect /Principal Engineer, Macys, SFO, CA

09/2012 -12/2014

- Architected the new recommendation engine with Big Data and cloud platform which is scalable from scratch. Saved \$10 million a year in licensing and maintenance of old products.
- Created a Roadmap and implanted the Architecture blueprint for Micro Services with Java, Spring Boot, Kafka, Rest API, Mongo DB, Mule Soft Architecture for the entire platform services.
- Design and executed proofs-of-concept for critical enterprise capabilities, including business cases with costs, benefits, and efficiency measures which increased the sales by 20 pc
- Implemented search platform using Lucene search (Evaluated Elastic and Endeca search platforms).
- Used AI initiative to detect fraud using Decision Tree, Random Forest Ensemble algorithms.
- Increased the performance of the website which increased customer growth by 10 million in one year.
- Skills : JEE,AWS, Angular JSP, Spring, Spring Boot, Spring JPA, REST, JSON, Junit, JREACT, JavaScript, HTML, WebLogic , Endeca, Apache Solr, Lucene, Endeca and Elastic Search.

Solution Architect/Search Specialist, Apple Cupertino, CA

01/2012 -09/2012

- Worked on Machine Learning (AI One) platform for recommendation engine.
- Extensively worked on shared services architectures to integrate complex data processing systems.
- Re designed and Implemented new Search functionality with Endeca which improved faster user experience by 20 percent.
- Evaluated Lucene, Endeca and Lucene Search Implementations.
- Skills: JEE, JSP, Spring, Spring Boot, Spring JPA, REST, JSON, Junit, JREACT, JavaScript, HTML, WebLogic, Endeca, Apache Solr, HBase, Hive, Pig, Endeca, Lucene, Elastic Search.

Senior Search Engineer, MSC Direct NYC, NY

04/2006 -01/2012

- Designed, Implemented large scale retail ecommerce online website from scratch for Industrial Supply products.

- Used open-source technologies for distributed systems. Sizing the Oracle Endeca infrastructure.
- Saved \$20 million per year by transforming /retiring old main frame application.
- Formulated technology strategies to comply with the organization's architectural and security standards.
- Governed DevOps methodologies ensure all solutions exhibit high levels of performance, security, scalability, maintainability, and appropriate reusability and reliability upon deployment.
- Participate in coordinated planning sessions and provide effort estimates for business initiatives of IT solutions.
- Skills: JEE, JSP, Spring, Spring Boot, Spring JPA, REST, JSON, Junit, JREACT, JavaScript, HTML, WebLogic, Endeca, Apache Solr.

Technology Lead at Cisco Technologies (*Wipro Technologies*)

10/2002- 04/2006

Cisco Technologies: Technical Lead for Telecommunications administration for administrative call center.

- Performing requirement analyses.
- Design and Developed applications Java /J2EE framework.
- Conducting unit testing using automated unit test frameworks.
- Identifying risk and conducting mitigation action planning.
- Conducting configuration of your own work.
- Reviewing the work of other developers and providing feedback.
- Using coding standards and best practices to ensure quality.

Skills: Java, Servlets, JSP, JavaScript, UML Junit

Senior Engineer, *General Electric*

04/2001-09/2002

- Responsible in building sustainable coding that may be used in the future.
- Ensuring the feasibility of UI/UX designs.
- Enhancing performance of the main front-end website.
- Modifying designs and specifications of complex applications.
- Analyzing code, requirements, system risks, and software reliability.
- Collaborating with front-end and back-end web developers.
- Skills: Java, Servlets, JSP, JavaScript, UML Junit, JQuery.

Java / J2EE Engineer, *Phillip Morris*

04/2000 - 03/2001

- Designed and developed Java applications using EJB (Entity, Session beans) , Developed web pages using JSP, Servlets, JavaScript
- Using scripting or authoring languages, management tools, content creation tools, applications, and digital media.

- Conferring with teams to resolve conflicts, prioritize needs, develop content criteria, or choose solutions.
- Unit and end to end testing using Junit and JMeter.
- Developing or validating test routines and schedules to ensure that test cases mimic external interfaces and address all browser and device types.
- Editing, writing, or designing Website content, and directing team members who produce content.

Java Developer, *Lanco Global Systems*

12/1998 - 03/2000

- Maintaining an understanding of the latest Web applications and programming practices through education, study, and participation in conferences, workshops, and groups.
- Back up files from Web sites to local directories for recovery.
- Identifying problems uncovered by customer feedback and testing and correcting or referring problems to appropriate personnel for correction.
- Evaluating code to ensure it meets industry standards, is valid, is properly structured, and is compatible with browsers, devices, or operating systems.
- Determining user needs by analyzing technical requirements.
