

Gopal M

PROFESSIONAL SUMMARY

Automation-focused Software QA Engineer with 5+ years of experience in Airline and Insurance domains. Strong expertise in Automation Testing using Appium and RestAssured with Java, along with solid experience in Manual Testing, API Testing, SQL validation, Agile methodology, STLC, and SDLC. Experienced in developing automation scripts, executing regression suites, validating APIs, and ensuring high-quality releases in fast-paced Agile environments.

Work Experience

InterGlobe Aviation

Duration: Apr 2019 – Apr 2021

Designation: AOCS

Role: Software Testing

Services Labs Software Private Limited

Duration: Nov 2022 – Present

Designation: Senior Operations Associate

Role: Software Testing

PROJECT DETAILS – PROJECT 1

Project Overview:

Airline Operations Management System is a real-time internal application used to manage flight scheduling, passenger booking, check-in, boarding, baggage handling, and operational reports. The system ensures smooth end-to-end airline operations with accurate passenger and flight data.

Testing included Functional Testing, Regression Testing, System Testing, Integration Testing, API Testing (Postman, RestAssured), Mobile Web Automation (Appium), and Database Validation using SQL.

Modules Worked:

- Flight Operations
- Passenger Booking & Check-in
- Boarding & Baggage Handling
- Operational Reports

Roles & Responsibilities:

- Analyzed requirements and prepared test cases
- Performed Functional, Regression, Smoke, Sanity, System & E2E testing
- Logged and tracked defects
- Supported UAT and production releases
- Coordinated with developers and BA teams
- Performed requirement analysis and test case design
- Executed Functional, Smoke, Sanity, Regression, and End-to-End testing
- Automated mobile web test cases using Appium
- Validated booking and check-in APIs using Postman
- Developed basic API automation scripts using RestAssured
- Performed SQL validation for passenger booking and baggage data
- Managed defects using JIRA and coordinated with developers for resolution
- Supported UAT and production deployments

Skills

Technical Skills

- Manual Testing
- Automation Testing
- Software Quality Assurance (QA)
- Software Testing Life Cycle (STLC), Software Development Life Cycle (SDLC)
- Requirement Analysis and Validation
- Test Planning, Test Strategy
- Test Scenario Preparation, Test Case Design and Execution
- Functional Testing, Regression Testing, Smoke Testing, Sanity Testing
- System Testing, Integration Testing, End-to-End Testing

Tools

- JIRA (Defect Tracking Tool)
- Postman (API Testing – Basic)
- Appium
- JavaScript
- SQL (Basic Queries for Data Validation)

Languages

- English
- Tamil

Certification

Manual Testing and Software Quality Assurance (Professional Experience)

PROJECT DETAILS – PROJECT 2

Project Title: Insurance Policy & Claims Management System

Client: Opendoor – <https://www.opendoor.com>

Domain: Insurance

Duration: Nov 2022 – Present

Methodology: Agile

Team Size: 12

Project Overview:

Insurance Policy & Claims Management System is a web-based application used to manage the complete insurance lifecycle, including policy creation, renewals, endorsements, claims processing, payments, and reporting. The system ensures data accuracy, business rule validation, and smooth claim settlement process.

Testing involved Functional Testing, Integration Testing, Regression Testing, API Testing using Postman and RestAssured, Automation using Appium, and SQL database validation.

Modules Worked:

Policy Management

Claims Processing

Customer Data & Documents

Payments & Reports

Roles & Responsibilities:

- Analyzed business requirements and prepared automation-ready test scenarios
- Developed and executed automation scripts using Appium with Java
- Automated REST APIs using RestAssured framework
- Performed API validation using Postman (status code, response body, JSON structure)
- Executed SQL queries for backend validation of policies, claims, and payments
- Conducted Functional, Integration, Regression, and End-to-End testing
- Logged and tracked defects using JIRA
- Participated in sprint ceremonies including planning, stand-ups, reviews, and retrospectives
- Supported UAT and production release validation

ACHIEVEMENTS

Delivered defect-free releases in production

Recognized for strong defect detection and documentation

Contributed to improved test coverage and quality metrics

DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge.

Place: Chennai

Signature: Gopal M

SOFT SKILLS

- Strong analytical and problem-solving abilities
- Excellent communication and documentation skills
- Good team player with cross-functional collaboration experience
- Attention to detail and quality-focused mindset
- Ability to work under tight deadlines
- Adaptable to new domains and technologies
- Proactive and self-motivated

PERSONAL DETAILS

- Father's Name: Mani
- DOB: 02-06-1995
- Gender: Male
- Marital Status: Married
- Nationality: Indian
- Address: No: 03, Kamaraj Nagar 1st Cross Street, Sanatorium, Chennai – 600047

Educational Background

B.E – Mechanical Engineering

Year: 2018 | CGPA: 7.21

College: Sri Muthukumaran Institute of Technology

University: Anna University
