ACADEMIC QUALIFICATION

- **Bachelor of Science in Information Technology, 28th February 2019,**
GPA – 3.33 (Second class Upper division)
University of Moratuwa, Sri Lanka.

Related Coursework: Data mining, Artificial Neural Networks, Artificial Intelligent, Image Processing, Automata Theory

- **G. C. E. (Advanced Level) Examination – 2013**
Anula Vidyalaya, Nugegoda, Sri Lanka. - Physical Science Stream

Physics: A, Chemistry: A, Combined Mathematics: C

PROFESSIONAL EXPERIENCE > 5 YEARS

Senior Software Developer

Berkley Insurance Asia, Singapore

1st April 2024 to present

Project	Berkley Insurance application
Role	Senior Software Developer - .NET
Domain	Insurance
Programming Language	C#/.NET
Technologies	.NET Core 6.0, C#, MVC, Bootstrap, jQuery, LINQ, Knockout Js, HTML, SQL and SSRS
Project Description	Underwriting and rating insurance application, which is used by underwriters for creating quotes, rating, and issuing policies.
Responsibilities	- Develop code for new modules and do enhancements in all line of businesses. - Implement Professional Indemnity rater. - Support existing Berkley applications. - Liaise with the offshore team. Provide and document technical specifications. - Coordinate/collaborate with Berkley Underwriters/BSOs and test Berkley applications. - Production support and bug fixing.

Senior/Software Engineer

99x, Sri Lanka

1st March 2019 to 20th March 2024

Project	ADRA
Client	Trintech Inc. (USA & Norway)
Role	Senior Software Engineer (.NET)
Domain	Accounting / Financial Closure
Technologies	ASP.Net/Core, Web API, Entity Framework/Core, SQL server, Aurelia js, Typescript, ES6, LINQ, Azure, Azure DevOps, Kubernetes, Docker, Jest, MS Test
Tools	Visual Studio 2019/2022, Visual Studio Code, GIT, JIRA
Project Description	ADRA is an accounting software suite which manages the detailed process of financial operations mainly focusing on the USA and

	Scandinavian market. I work in the "Team Matcher" which is handling the SAAS Accounting web application, "Matcher". It mainly enables users to import and reconcile transactions automatically using configured matching rules with bank statements, credit card statements, and other external sources.
Responsibilities	- Working with .NET Core Web API with back-end services, SQL database, and web front-end. Write readable, extensible, and testable code. - Experience in using Entity Framework core for data access and migration management. - Writing unit tests/ integration tests to ensure the code quality - Utilized Azure services such as Azure app service, Azure Service Bus, Azure SQL Database, Azure container apps, etc. - Handled Azure DevOps pipelines to deploy applications into multiple environments. - Design background workers for long-running tasks. - Container orchestration using docker and Azure Kubernetes containers. - Performance Testing Using JMeter and Azure load testing. - Join with release deployments and work on critical bug fixes. - Contributing to minimizing tech debts of the code. - Peer review/guide junior team members. - Worked on Agile Software development process.

Trainee Software Engineer (Internship)

Emojot Inc., Sri Lanka

9th October 2017 to 23rd March 2018

Project	Emojot platform
Role	Trainee Software Engineer
Domain	Customer Experience Analyzing Software Platform
Technologies	AngularJS, NodeJS, MongoDB, Java, JQuery, Google Analytics, JIRA
Project Description	CX platform delivering powerful real-time insights by capturing top-of-mind emotions and overlaying enterprise data with emotionality data.
Responsibilities	- Designed and implemented company wise interaction report, emoter interaction report - Designed and developed Emoji editing tool - Developed a method to download/ upload zip files - Bug fixing related to Emojot dashboard
