PROFILESUMMARY

Senior QA Engineer/Test Lead with **7+ years** of success in test strategy, automation architecture, and quality leadership across **Restaurant Tech, E-commerce, and FinTech** domains. Expertise includes designing and scaling robust, multi-platform automation frameworks (**Selenium/Java, Appium, TypeScript, RestAssured**) for web, API, and mobile applications. ISTQB® Certified professional recognized for **reducing defect leakage, driving 70% faster regression cycles**, and leading quality teams in high-velocity Agile environments. Strategic focus on delivering superior data integrity and release stability in microservices architectures.

PROFESSIONAL EXPERIENCE

Senior QA Engineer / Test Lead Toast Tab Private Limited | Apr 2021 – Present

(Performing Test Lead responsibilities since Jan 2025)

- **Led and mentored a high-performing QA team of 6 members**, overseeing the end-to-end test strategy for critical web, API, and mobile applications to ensure on-time delivery.
- **Architected and scaled robust, multi-platform automation frameworks** (Selenium WebDriver with TestNG, Appium, RestAssured) for high-volume, global restaurant technology features.
- Drove a **70% reduction in regression cycle time** by strategically expanding automation coverage and implementing Page Object Model (POM) for enhanced maintainability.
- **Pioneered mobile testing strategies** (Android/iOS) using **Appium** to guarantee a consistent, high-quality user experience across all platforms.
- **Directed QA for features in a microservices architecture**, specializing in complex **API validation** and integration testing to ensure superior data integrity and release stability.

Test Engineer 7Eleven Arthashastra Technology Pvt Ltd | Apr 2018 - Apr 2021

- Maintained the web application automation suite using **Selenium WebDriver with TestNG**, successfully streamlining quality gates for e-commerce and restaurant tech applications.
- Executed extensive **API testing (Postman)** and **JMeter-based performance validation**, ensuring optimal speed and responsiveness under peak load conditions.
- Controlled and optimized the defect lifecycle in **JIRA**, ensuring rapid root cause analysis and effective stakeholder communication during high-priority releases.

TECHNICAL SKILLS

AUTOMATION

Selenium WebDriver (Java), TestNG, Maven

API TESTING

Postman, RestAssured, JSON/XML Validation

MOBILE AUTOMATION

Appium (Android & iOS), Mobile Testing

FRAMEWORKS

Page Object Model (POM), BDD (Cucumber), Data-Driven Testing

PERFORMANCE TESTING

Apache JMeter, Load & Stress Testing

CI/CD & TOOLS

Git, Jenkins, MySQL

CLOUD & BROWSERS

AWS, Cross-browser Testing

TEST GOVERNANCE

TestRail (TCM), Confluence (Test Strategy), Jira (Defect Tracking)

Quality Control Editor Checktronix India Pvt Ltd | Oct 2012-Nov 2013

- Designed and maintained sophisticated **automated web robots** for large-scale data aggregation and processing projects.
- Implemented stringent quality control measures ensuring **100% data accuracy** and compliance with client specifications.

KEY PROJECTS

Restaurant POS Automation Framework

- **Architected and implemented a comprehensive test automation framework** for Toast Tab's restaurant management platform, covering order processing, payment integration, and inventory management modules.
- Achieved **85% automation coverage** and **reduced regression testing time by 70%**.
- **Technologies:** Selenium, Java, TestNG, RestAssured, Appium

Cross-Platform Mobile Testing Strategy

- Established comprehensive **mobile testing** processes for Android and iOS applications, including responsive design validation, performance testing, and device compatibility verification across multiple OS versions.
- **Technologies:** Appium, Selenium Grid, AWS Device Farm

KEY ACHIEVEMENTS

- **Architected comprehensive automation frameworks** that significantly reduced defect escape rates and improved overall product quality.
- Established comprehensive **QA metrics and reporting systems** providing real-time visibility into testing coverage and product quality.
- **Mentored and coached junior QA engineers** in advanced automation techniques, testing methodologies, and industry best practices.
- Pioneered **mobile testing strategies** ensuring consistent, high-quality user experiences across Android and iOS platforms.

CORE COMPETENCIES & METHODOLOGIES

- Agile & Scrum Methodologies with Sprint Planning and Retrospectives
- Test Strategy Development and Risk-Based Testing Approaches
- Automation Framework Design using Design Patterns and Best Practices
- Team Leadership, Mentoring, and Knowledge Transfer
- Defect Lifecycle Management and Root Cause Analysis

DOMAIN EXPERIENCE

RESTAURANT TECH

POS systems, order management, payment processing

E-COMMERCE

Payment gateways, shopping carts, inventory management, checkout flows

FINTECH

Financial transactions, security testing, payroll

CERTIFICATIONS

ISTQB Certified Tester

Advanced Level - Test Analyst V3.1 (April 2025)

GEN AI FOR QA ENGINEERS

- (June 2025)

Mobile - Appium

Automation Tester-

(August 2023)

EDUCATION

M.Sc. (Information

Technology) MOP Vaishnav

College for Women, Madras University | 2011 | 86%

LANGUAGES

English, Tamil, Malayalam, Tulu
