SUMMARY

- Over 10 years of experience in Data and Reporting Analysis, specializing in risk analytics, fraud management, marketing analytics, business intelligence and full Software Development Life Cycle – requirements gathering, analysis, design, development, testing and documentation.
- Proficient in RDBMS Servers including MS SQL Server, Oracle, and Teradata, with expertise in executing complex SQL queries for data extraction and analysis.
- Skilled in developing interactive dashboards and reports using Power BI Desktop, Tableau, and SQL tools, providing actionable insights for decision-making processes.
- Strong Knowledge in Tableau and Power Bi on how to import, shape, and transform data for business intelligence, visualize data, author reports, schedule automated refresh of reports and create and share dashboards based on reports.
- Experienced in data modeling, ETL workflows, and dataset creation, using tools like Alteryx, Python, and SQL Server Integration Services (SSIS).
- Demonstrated ability to collaborate effectively with cross-functional teams and stakeholders to drive initiatives and implement risk mitigation strategies.
- Proven track record of delivering insightful reports, dashboards, and analysis, tailored to business requirements and timelines.

EXPERIENCE

Data and Reporting Analyst

SPECTRUM ENTERPRISE

June 2023 – Present, Louisville, KY

- Conducted data analysis on large datasets using SQL in SSMS, Teradata, and Oracle to identify potential risks and opportunities for improvement.
- Implemented data validation processes, resulting in a 15% reduction in errors and enhancing data accuracy.
- Loaded, cleaned, and managed data from Oracle, Teradata, and Microsoft SQL Server to build ETL pipelines for data integration from Remedy, Salesforce, and various sources.
- Documented all processes for Data Services team, facilitating smooth cross-team communication and information transfer.
- Developed interactive dashboards using Tableau to enhance data visibility for management, resulting in a 12% increase in efficiency in business processes.
- Engineered an automated data processing system using SQL and Python, slashing report generation time by 50% while maintaining 99.8% accuracy across all internal and external reporting functions.

Business Data Analyst

Cornerstone

August 2015 – September 2022, Hyderabad, India

- Led a team of analysts to conduct market analysis, resulting in a 18% increase in brand recognition and successful execution of multiple marketing campaigns.
- Combined data from different sources such as SQL server, MS Access, Excel, CSV, and Text files by using of Power Query data blend.

- Created and implemented advanced calculated columns and measures using DAX in Power BI, leading to a 85% in data analysis accuracy.
- Developed and maintained ETL workflows in Alteryx, resulting in a 15% increase in efficiency in data processing for reporting purposes.
- Published reports to Power BI services and scheduled monthly subscriptions, increasing team access efficiency by 20%.
- Analyzed and interpreted complex data sets using SQL and Python, leading to the identification of key business insights and driving a process improvement that enhanced data-driven decision-making by 25%.

Risk Analyst

Amazon India

February 2013 – August 2015, Hyderabad, India

- Managed data analysis processes and conducted investigations into multiple allegations of organized fraud and abuse on the E-commerce Amazon platform using fraud detection algorithms.
- Collaborated with cross-functional teams to implement improved fraud prevention procedures resulting in a 15% reduction in fraudulent activities.
- Contributed to the improvement of the tool by providing insights and recommendations for enhancements based on bug reports.
- Cultivated and nurtured relationships with cross-functional teams, clients, and senior management to ensure effective communication and collaboration.
- Implemented a streamlined process for requirement gathering, resulting in a 15% reduction in project timeline for risk assessment activities.

EDUCATION

• Master of Sciences in Business Analytics from University of Louisville

University of Louisville • Louisville, KY • 2023 • 4.0

- Awarded a Dean's Citation Award for being the Top 10% in the class.

• Bachelor of Technology in Computer Sciences and Engineering from Jawaharlal Nehru Technological University

Jawaharlal Nehru Technological University • Hyderabad, India • 2012 • 3.5

CERTIFICATIONS

Applied Business Analytics

Indian School of Business, Hyderabad • 2022

- Certified in advanced modeling methods for predictive analytics, including complex techniques to optimize model performance and accuracy.

SKILLS

Operating Systems: Windows Server 2016/2012/2008/XP, UNIX, Linux.

Web Technologies: HTML 5/HTML, CSS, XML

Programming Languages: SQL, T-SQL, XML, PL/SQL and Python, R.

Methodologies: Agile, Waterfall

Reporting Tools: Power BI Desktop, Tableau, Power Query, DAX, Power BI App.

Proficiency: Teradata, Oracle SQL Developer, Microsoft SQL Server, MS Office (Excel, Word and Powerpoint), Tableau, Power BI.
