Work Authorization: Valid H1B Visa, and I-140 approved

QA Lead and Agile Practitioner with 13+ years of experience in OTT, Media, and Telecom platforms. Strong background in manual and API testing, Agile Scrum execution, UAT leadership, and stakeholder collaboration. Certified Scrum Master with hands-on experience supporting product delivery, requirements analysis, and cross-functional team coordination.

Profile Summary:

- 13+ years of IT experience (Media & Entertainment) encompassing Quality Assurance (iOS/Android Mobile Apps Testing), Communications & Media, Satellite TV, OTT platforms and Entertainment Lab Infrastructure setup, Dynamic ad insertion ad break validation and management, Certification testing (DTG-SiPSi Certification) in UK and NZ.
- **Role** : Has done the multiple roles and responsibility in Telecom industry like Business Analysis, Scrum Master roles, Offshore-Onsite coordination, and . Successfully established phenomenal lab infrastructure for a 60-member team during COVID.
- **Testing Process** : Throughout my career, gained extensive experience across all stages of the Software Development Lifecycle SDLC (**Agile** and **Waterfall**.), including requirements analysis, integration, smoke testing, Black Box and White Box testing, functional testing, Content processing (Encoding, transcoding) script-based manual testing, Production Parallel (FFPP) environments, production testing, support, and bug fixes.
- **Automation** : Website automation, log file, xml parsing using Selenium Python and Shell script
- **Scrum Master** : As a SAFe Certified Scrum Master have demonstrated my ability to contribute to Agile teams (**including daily stand-ups, sprint planning, sprint reviews, retrospectives, test report review meetings, sprint metrics, and progress reporting, Coaching teams on Agile, Sprint velocity, blocker removal, Dependency management** and work closely with cross-functional stakeholders to deliver high-quality software products.
- **Business Analyst** :
 - 1.1 Worked with few stakeholders and gathered the business requirements. (BRD / FRD). Document the business requirement in traceability.
 - 1.2 Regular meeting with Stakeholder workshops, Business process flows and assigned the Acceptance criteria ownership to relevant eng teams.
- **Tools**: Familiar with multiple testing tools including
 - API**: SOAP UI, Curl, Postman, SQL
 - Automation**: Selenium, Jenkins, Kubernetes,
 - Debugging** : Charles Proxy, Wireshark, Kafka, **Tableau**
 - Cloud** : ServiceNow, **Nexus**, Confluence, SPIRA, JIRA, AWS
 - Modulator**: MPEG Stream Modulator (TPG & Dek Tec) for satellite signal uplink /downlink. , Quality Center/ALM.
- **Device Testing** : iOS/Android Phones, Tablets,
- **AI** : Has been used in many place like test data, test plan preparation, root cause analysis, etc..
- **Lab Infrastructure** : Hardware Inventory , Software Installation, Network Configuration, Static/Dynamic IP address, Router setup, Port Mapping/Routing.
- **Innovation** : Always focus on improving the working ecosystem and come with various idea and converted to Million dollar project.
- Problem Solving Skills.

Education

- Electronics and Communication Engineering in 2010

Certification

- SAFe® 4 Practitioner
- Certified Scrum Master
- ISTQB Certified Tester

- DTG SiPSi Compliance Tester

PROFESSIONAL EXPERIENCE:

DIRECTV/AT&T - Los Angeles, CA

Apr . '14 to

Present

Lead QA/Sr. QA

Work Experience

QA Lead Engineer|Scrum Master |DIRECTV, California, Los Angeles| Jan 2018 – Present

I have been contributing end -to end functional testing in various internal and external Directv project since Apr 2014 like NFL Sunday Tickets, Dynamic Ad Insertion ,Minor Channel updation, Game Score updation, S/W upgrade over the Air,Dynamic Carousel UI,TVOD, Live Streaming, VOD and Myapps etc..

Responsibilities:

- Responsible for delivering crucial project Minor channel updation later saved \$50+ Millions for statelitte space optimization.
- Responsible for delivering crucial project like NFL Sunday Ticket, Cloud DVR, Dynamic Ad Insertions with highest quality which later generated \$100+ Millions from different providers.
- Supported User Acceptance Testing (UAT), content validation, and cross-browser/device testing for web applications to ensure cross-screen consistency.
- **Functional Testing** : Ran the system test cases, Sanity testing, Smoke Testing, Unit Testing and Load testing.
- **Cross Country Testing**: Validated **geo-restriction** rules by verifying that purchase offers were blocked outside the U.S. across web, iOS, and Android platforms.
- **Debugging** Debugged network transactions using PuTTY, WinSCP, Charles Proxy and Shell scripting to trace data flow and identify defects.
- **Scripting** Developed Shell scripts to parse STB log files and verify end-to-end data flow from headend systems to client devices.
- Created and executed UI automation scripts using Selenium WebDriver to validate website functionality.
- **API Testing** Performed API testing using Postman by creating collections and executing iterative API calls across multiple headends.
- **Negative scenario** Executed negative, boundary, and error-handling test scenarios for APIs and functional workflows, validating HTTP error responses (403, 404, 503, etc.) across platforms.
- **Network Port Forwarding** Configured NAT port forwarding to enable SSH access and perform device-level troubleshooting in internal test environments for 60 members teams.
- **Cut-Over Testing**: Performed cut-over testing prior to production releases to validate end-to-end functionality and ensure deployment readiness.
- Compiled, reviewed, and validated Software Requirements Specifications (SRS) with software engineers and product owners.
- Coordinated with ETL Informatica leads to ensure requirements sign-off prior to implementation.
- Led QA efforts as Team Lead by identifying process improvement opportunities, deploying system enhancements, and driving stakeholder adoption through training and collaboration.
- Authored detailed technical and functional requirements during critical project phases to ensure clarity, feasibility, and alignment with business needs.
- **Scrum Master** : Conducted the **daily stand-ups, sprint planning, sprint reviews, retrospectives, test report review meetings, sprint metrics, and progress reporting** and Collaborated closely with Product Owners to maintain, refine, and groom product backlogs in Agile environments.
- **Business Analyst Role** : Translated complex business, marketing, compliance, and operational requirements into clear functional and system specifications for web application development.
- **Dynamic Ad Insertion** : Owned end-to-end ad-tech requirements and validation across OTT, mobile(MPEG DASH/HLS), and STB platforms. and Delivered dynamic ad insertion solutions for Tier-1 network partners and advertisers. Ensured measurement, compliance, and certification readiness (Nielsen, ComScore, IAB).
- Collaborated cross-functionally to drive on-time, compliant product releases.

Environment/Framework: JIRA, Confluence, Product Plan, Network Port Forwarding, H-Tech, Encoder, Selenium, ShellScripting, Jenkins, Postman, ServiceNow, agile/Scrum. **HLS/MPEG-DASH**, mobile platforms VMAP, SmartXML, Vast 2, and Vast 3

QA Automation Engineer & Analyst| AT&T, Directv|California, Los Angeles| Dec 2016 - Dec-2017

Responsibilities:

- Proposed and delivered a \$1M automation initiative, leading a 6-member cross-functional team.
- Automated Android native app testing using Appium and Calabash, improving system test efficiency.
- Built and maintained CI/CD pipelines using Jenkins and Android SDK.
- Developed automation scripts, SQL-based data validation, and reporting dashboards.
- Designed a centralized reporting portal with Excel outputs for stakeholder visibility.
- Led onshore and offshore teams to deliver high-quality, on-time releases.

Environment/Script : HTML, CSS, SQL Query, Excel, Test NG and Java, Calabash, Jenkins, Android SDK, and Calabash

Lead QA Engineer| Infosys| Bangalore|Directv|, Los Angeles| Apr-2014 – Nov 2016

Responsibilities:

- Led end-to-end system, integration, and UAT testing across linear and non-linear OTT platforms.
- Executed API, functional, regression, load, and post-release validation across Android, iOS, and STB.
- Managed subscription, PPV, nPPV, 4K, and premium content workflows including HBO Max and Movies Anywhere.
- Identified, analyzed, and escalated defects and release risks, partnering with engineering for root-cause resolution.
- Defined project scope, workflows, and user stories, managing backlog refinement in Agile/Scrum ceremonies.
- Translated business requirements into product specifications and process flows supporting scalable delivery.

Environment/Framework : VOD Contents, Live Streaming, nPPV, PPV and 4K format contents.

Testing Engineer| Sure Soft Pvt Ltd| India, Puducherry | May-2010-Aug 2013 DTG SiPsi

Compliance (UK, NZ)

- Led QA and DTG SiPsi compliance validation across multi-country terrestrial STB platforms.
- Designed and executed end-to-end test strategies, plans, and compliance test cases.
- Performed performance testing (boot-up, channel zapping) with defect and RCA reporting.
- Coordinated UK and NZ system deployments, managing execution, metrics, and stakeholder reporting.
- Tracked quality KPIs and milestones, ensuring alignment with project objectives.

Environment/Framework : DTG-SiPsi, and MPEG Stream Modulator (TPG & Dek Tec)
