

Kakunuri Upendra Reddy

- Email: upendrareddy562003@gmail.com Mob: +91-6301198584* Address: Giddalur | Andhra Pradesh | India

Results-driven SAP Data Integration Developer with over 4 years of experience in SAP BODS and SAP HANA development, ETL design, and support engineering. Specialized in designing, developing, and optimizing SAP BODS jobs, workflows, and real-time/batch data integration solutions across SAP and non-SAP systems. Strong hands-on experience in building complex data flows, implementing delta load mechanisms, performance tuning, SQL optimization, data migration, and large-scale data transformation in SAP HANA. Proficient in working with IDocs, SAP tables, data stores, repository management, job deployment strategies, and production support with root cause analysis. Recognized for leading automation initiatives that reduced recovery time by 75%, improving operational efficiency, and resolving complex production issues. Experienced in collaborating with cross-functional teams and mentoring junior developers to deliver high-quality solutions.

AWS Certified professional and SAP Certified Development Associate – SAP Data Services (SAP Data Integration Developer) with a strong focus on scalable, resilient, and high-performance data integration solutions.

Career Highlights:

- Optimized SAP BODS Jobs: Reduced runtimes of critical ETL jobs by up to 90% and server memory usage by 50% through performance tuning, query optimization, and workflow redesign.
- Automation & Efficiency: Developed automation scripts and workflows saving 100+ hours per month and minimizing manual intervention in recurring processes.
- Incident Management & RCA: Expert in monitoring daily ETL jobs, performing root cause analysis, and resolving long running or failed jobs to ensure zero SLA breaches.
- SAP HANA Expertise: Analyzed HANA stored procedures and calculation views to resolve data discrepancies, ensuring accurate and consistent reporting for business operations.
- Having good knowledge of LTMC, Migration cockpit.
- SOX Compliance & Reporting: Prepared and maintained monthly and quarterly SOX audit reports, ensuring data integrity and audit readiness.
- Cross-Functional Collaboration: Collaborated with business, technical, and infrastructure teams to resolve production issues, implement enhancements, and support disaster recovery testing.
- Awards & Recognition: Employee of the Quarter and R&R Awards multiple times for outstanding performance and contribution. Consistently achieved top ratings in annual performance cycles.
- Project & Knowledge Leadership: Built comprehensive runbooks, SOPs, KB articles, and mentored team members to ensure smooth knowledge transfer and operational continuity.
- Client & Stakeholder Engagement: Maintained strong client relationships, ensuring timely delivery, seamless communication, and high customer satisfaction.

KEY SKILLS

- Platforms / Domain: Reconciliation
- Applications: SAP BODS, SAP HANA, DSMC, LTMC, LSMW
- Programming & Scripting: PL/SQL, Unix Shell Scripting, VB, React, HTML, CSS, Full-Stack
- Development: Operating Systems: Unix, Windows
- Tools & Technologies: Java, Visual Studio 2022, SQL Developer, Hana Studio, ServiceNow, GitHub, SMP, BMC remedy
- Databases: Oracle 11g, Oracle 19c, Cloud Databases

PROFESSIONAL EXPERIENCE

HCL Tech (Client: Ericsson) | Vijayawada, India

SAP BODS and HANA on Support Engineer L3

June 2024 to Present

Roles & Responsibilities – SAP BODS & HANA Consultant

- Identified long-running and performance-intensive SAP BODS jobs, conducted detailed root cause analysis, and implemented job optimization strategies including query tuning, data flow redesign, and efficient transformation usage.

- Monitored daily, weekly, and monthly batch jobs, proactively analyzed job failures, and performed Root Cause Analysis (RCA) to ensure minimal downtime and consistent SLA adherence.
- Expertise in analyzing SAP HANA stored procedures, calculation views, and SQL logic to identify and resolve data discrepancies and data dispensary issues across source and target systems.
- Designed, developed, and enhanced SAP BODS jobs, workflows, and dataflows to support business requirements, ensuring data accuracy, consistency, and performance.
- I actively worked on DSMC (Data Services Management Console) for job scheduling, monitoring, log analysis, and performance tracking.
- Created and maintained monthly and quarterly SOX compliance reports, supporting audit requirements by ensuring data integrity, job traceability, and proper documentation.
- Implemented process automation and monitoring improvements to reduce manual intervention and improve recovery time, contributing to increased operational efficiency.
- Coordinated with cross-functional teams (functional consultants, DBAs, and business users) to resolve production issues and deploy enhancements.
- Supported production, including deployments, migrations, and post-release validations.
- Ensured adherence to best practices, security standards, and compliance requirements, including access control and audit log .
- Prepared and maintained technical documentation, runbooks, and SOPs to support knowledge transfer and operational continuity.

Significant Achievements:

- Reduced SAP BODS job runtimes by up to 90% through performance tuning, query optimization, and redesign of inefficient dataflows and transformations.
- Automated weekend and off-hours operational tasks by coordinating with technical and basis teams, significantly reducing manual effort and on-call support requirements.
- Developed custom SQL scripts and monitoring queries using control tables to proactively identify failed, long-running, and resource-intensive jobs, improving incident response time.
- Reduced server memory utilization by up to 50% by identifying high-consumption BODS jobs and working closely with the SAP Basis team to optimize job execution and system resources.
- Decreased incident inflow to the support queue by automating recurring issues, implementing preventive controls, and providing user education and documentation.
- Improved system stability and reliability by implementing proactive monitoring and alerting mechanisms for critical BODS jobs.
- Accelerated issue resolution and recovery time by standardizing RCA processes and automating restart and recovery procedures.
- Recognized for consistent delivery excellence, contributing to improved SLA compliance and operational efficiency across environments.

Application Support Engineer (L2)

Dec 2021 to May 2024

Responsibilities:

- Ensured 24x7 application uptime for 25+ critical applications, maintained timely transaction loads within defined SLAs, and supported Disaster Recovery (DR) testing in collaboration with infrastructure teams during patching and maintenance activities.
- Reduced SAP BODS job runtimes by up to 90% through performance tuning, query optimization, and redesign of inefficient dataflows and transformations.
- Streamlined weekend and off-hours operations by automating tasks in collaboration with technical and basis teams, cutting manual intervention and on-call support needs.
- Designed user-friendly visuals including tables, bar charts, line charts, and slicers to enable basic filtering and improve data understanding for end users.
- Actively participated in design and solution review calls, provided actionable recommendations, and delivered high-quality solutions aligned with business and technical requirements.

- Created comprehensive Knowledge Base (KB) articles, Standard Operating Procedures (SOPs), and Runbooks from scratch during the transition phase, ensuring effective knowledge transfer and long-term operational continuity.

HCL Tech | Vijayawada, India

Project Intern

June 2021 to Dec 2021

Responsibilities:

- Gained proficiency in Python, SQL, HTML, and JavaScript, applying foundational knowledge to develop dynamic and responsive web applications.
- Designed and implemented a news web application using REST APIs, featuring 60-word news summaries, live COVID-19 updates, and real-time weather reports to enhance user experience and information accessibility.
- Acquired hands-on experience through a 2-month live project, focusing on API integration, backend–frontend connectivity, and delivery of functional, user-friendly solutions.

Scholar

Dec 2020 to June 2021

Responsibilities:

- Served as the Single Point of Contact (SPOC) between trainers and peers, ensuring effective communication, coordination, and smooth execution of the training program.
- Built a strong foundation in .NET, Python, Oracle SQL, Linux, C#, Tableau, and Power BI through hands-on projects and assessments; successfully cleared examinations in all technologies and achieved an 85.6% final score.
- Recognized as the Best Performer in the cohort, earning a scholarship through a program fee refund based on consistent academic and practical excellence.
- Demonstrated strong technical and leadership capabilities, receiving commendations for outstanding performance in both theoretical knowledge and real-world application.

EDUCATION

BSC Design & Computing

BITS PILANI, India

- Acquired a comprehensive understanding of key computer technologies, including Artificial Intelligence (AI), Machine Learning (ML), Cloud Computing, Green Computing, Networking, and Java.
- Developed essential professional skills such as self-discipline, time management, and independent learning through the flexibility of attending weekend classes while working on weekdays.

12th (Intermediate) GOVT Junior College, Komarole

- Built a strong academic foundation while actively participating in co-curricular activities such as Andhra Interstate Football Tournaments, athletic events, Model United Nations, and cricket tournaments.
- Enhanced leadership and communication skills through participation in extempore and debate competitions, earning multiple awards and recognition.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner**, Amazon Web Services – Dec 2023 to Dec 2026
- **Microsoft Azure Fundamentals**, Microsoft – Mar 2024 to Mar 2027 (Certification ID: 996405552)
- **SAP Certified - Integration Developer**, Nov -2025 to Nov 2026
- **Fundamentals of NLP: Introduction to Natural Language Processing**, Skillsoft – Sep 2024
- **ChatGPT Prompt Engineering: Examples & Use Cases**, Skillsoft – Sep 2024
- **Artificial Intelligence and Machine Learning**, Skillsoft – Sep 2024
- **Deep Learning and Neural Networks**, Skillsoft – Sep 2024
- **Introduction to Generative AI Concepts**, Skillsoft – Sep 2024
- **Getting Started with Large Language Models (LLMs)**, Skillsoft – Sep 2024

SOFT SKILLS

Multitasking • Effective Communication • Teamwork • Leadership • Problem Solving • Quick Learner • Dispute Resolution • Critical Thinking • Adaptability • Time Management • Project Management • Result-Oriented • Analysis & Planning • Working in Diverse Environments • Cross-Functional Collaboration • Self-Motivated

AWARDS & ACHEIVEMENTS

- R&R Award, Employee of the Quarter – Recognized in Mar 2023 and Sep 2024 for outstanding performance and contributions.
- Developed automation scripts that streamlined repetitive processes, saving 100+ hours per month, significantly reducing manual effort and improving team productivity.
- Built strong client relationships and ensured seamless communication and customer satisfaction, maintaining a zero SLA miss record.
- Consistently achieved top performance ratings, recognized twice as the Best Employee for exceptional contributions.
- Received highest ratings throughout the career, awarded 2Good for consecutive top ratings in annual performance cycles.

LANGUAGES

English (Full Professional Proficiency) • Telugu, Hindi (Bilingual Proficiency)

HOBBIES

Passionate about football, cricket, and video games, while also have keen interest on analysing stock market.

DECLARATION

I hereby declare that the details provided are true to best of my knowledge.
