

PROFESSIONAL SUMMARY:

- 13+ years of experience of rich experience in Business Analysis, focusing on all phases of the Software Development Life Cycle (SDLC) and working experience on software development methodologies like Water Fall model, Agile model, Iterative model and Rational Unified Process (RUP).
- Strong experience on understanding of Business Intelligence and Data Warehousing Concepts with emphasis on ETL architecture.
- Expertise in business requirement elicitation/gathering using techniques like interviewing, questionnaires, brainstorming, and focus groups; conducting JAD sessions, project meetings, customer interviews and coordinating various technical and managerial teams or stakeholders at all levels.
- Hands on experience in facilitating Sprint Ceremonies (Product Backlog grooming, Sprint Planning meeting, Daily Stand - up meeting, Sprint Review meeting and Sprint Retrospective meeting) for Agile Scrum as Scrum Master.
- Having great leadership qualities for handling small/large team with strong analytical and problem solving skills, multi-tasking abilities.
- Excellent working Knowledge of various Software Development Life Cycle (SDLC) methodologies like Waterfall Model, Agile (SCRUM, User stories, Sprints) with an in depth knowledge of RUP's Iterative Software Development Life Cycle process i.e. Inception, Elaboration, Construction and Transition.
- Proficient in Requirement Management, Sprint Planning, Issue Tracking, Impediment Management and Work Allocation using tools like JIRA, RALLY and HP ALM.
- Experienced in systems testing, systems operations and systems analysis in the Healthcare, Medical Management, Insurance, Finance, Banking, IT/Service/Product, etc. environments.
- Experienced in data visualization skills and experience using visualization tools ex: Tableau, Qlikview& Congos and Analyses and comparisons of data in preparation for Dashboards and Reports (List reports, Cross-tab reports, Drill through reports, Master-Detail Reports and Cascading Reports).
- Proven expertise in developing Test Cases, Test Strategies, Test Plans, Test Reports, Procedures and Traceability Matrix and documenting defects using HP QC and HP ALM. Collaborated and monitored Black-Box Testing, Smoke Testing, User Acceptance Testing (UAT) and Regression Testing.
- Excellent Functional/Technical experience in implementing QlikView for Healthcare, Banking, Manufacturing and Retail.
- Hands on Working experience in efficient SQL Queries and database objects and experience in windows and UNIX environments.
- Extensive experience in writing Functional Requirement Specifications (FRS), Systems Requirements Specifications (SRS) and Requirements Traceability Matrices (RTM).
- Experienced in creating Complex Data Models, Performance Tuning with best practices for QlikView Applications.
- Experienced in handling Multiple Fact Tables, Creating Link Tables, Adhoc reporting, Set Analysis, and Actions for QlikView Dashboards.
- In-depth experience and knowledge of creating BRD, FRD, SRS, SOP, use cases, wireframes, activity diagrams, logical, component and deployment views with rational tools to extract business process flows and workflows thereby helping development and quality assurance teams in understanding the requirements.
- Proficient in business process modeling, documentation, and testing using Quality Center, iRise, Rational Suite, MS Office Suite, MS Visio, MS SharePoint, EDM etc. in combination with UML diagramming techniques.

- Experience in Data Integration using Data center with Hub and Spoke. Extensive implementation knowledge of Databases, Data Table structures, Schemas, Data Marts and OLAP operations such as Roll-up, Drill-down, Slicing, Dicing and Pivoting.
- Excellent skills in writing stored procedures, SQL queries, functions, triggers, views and schemas in SQL.
- Familiarity with programming languages like .Net, XML, JSON and XML Web Services (SOAP, WSDL, and UDDI) and Service Oriented Architecture (SOA) with MS Visual Studio development platform (WCF).
- Well experienced with Web Analytics tools like Google Analytics, Adobe Analytics for making reports and recommendations. Well versed with Adobe Experience Manager (AEM) and its products.

EDUCATION:

Bachelor's in computer science and Engineer

TECHNICAL SKILLS:

Programming Languages	C++, SQL, PLSQ, HTML, SAS, .Net
Development Methodologies	RUP, Agile-Scrum, Waterfall, ESDM, Waterfall-scrum hybrid.
Databases	MS-Access, MySQL, SQL Server, Oracle(SQL and PL/SQL), Teradata, DB2, Sybase
Application Servers	IBM Websphere, ATG Dynamo, BEA WebLogic.
WebServices	SOAP, XML, REST, API, AJAX, Client side and Server Side validation.
Automation Tools	MS Visio, Rational Rose, Rational ClearCase, Rational RequisitePro, Documentum
Requirement Management Tools	JIRA, MS Office, HP ALM, Rally, MS TFS.
Project Management Tools	MS project, MS Excel, MS Share Point 2007/10/13
Bug Tracking Tools	Mercury TestDirector, Rational ClearQuest
Utility Tools	MS Office Suite, MS Project, TOAD, Adobe Photoshop
BI Reporting Tools	Tableau, IBM Cognos, Power BI
Data warehousing & Tools	Data Marts, OLTP, OLAP, Multidimensional Analysis, Data Mining, Slicing/Dicing, Drill-Down/Roll-Up, Informatica, Business Objects, SSIS, Erwin.
Testing Tools	HP ALM, HPQC, Quick TestPro(QTP), Test Director, Win Runner, Load Runner, Niku Project WorkBench.

PROFESSIONAL EXPERIENCE:

Client: Telus International St. Louis, MO

Jun 2019-Till Date

Role: Business Analyst/Scrum Master

Roles & Responsibilities:

- Responsible for gathering and analyzing Business and system functional requirements and for understanding and translating these needs into Business Requirement Specification (BRS), System Requirement Specification (SRS) documents, Conceptual design document (CDD), Client requirements document (CRD), and Functional specification document (FSD)
- Involved in creating Business Flow Diagrams, Dataflow diagrams, UML Activity diagrams, Sequence diagrams, and USE cases diagrams using MS VISIO.
- Conducted risk analysis, while writing BRD, SRS, and test strategies. Determined risk impacts, developed risk mitigation strategy and created risk action plans.
- Organized and facilitated sprint planning, daily stand-up meetings, reviews, retrospectives, release planning, demos and other Scrum-related meetings

- Support, configure, and develop SharePoint UI sites and sub-sites for PPD Quality Assurance, and Interacted with users for verifying User Requirements, managing Change Control Process, updating existing Documentation.
- Working as a Scrum Master for multiple teams to create Sprint Backlog, organized Sprint planning meeting, Daily Sprint Meeting, Sprint review meeting and Sprint retrospective meeting.
- Interacted and arranged meetings with Business and in network/out network service providers to gather business requirements for the current process of getting prior Authorization.
- Created centralized data repository for team on Amazon Web Services (AWS) platform. Data tables have been created in AWS Redshift and data gets imported from AWS S3.
- Updated the organization on the advancements of Cognos techniques for business Intelligence solutions.
- Created relationships in Requirement Traceability Matrix linking Business Requirements to Functional requirements and Functional Requirements to Systems Requirements.
- Logged and maintained user stories and bugs in JIRA, Instructed and modeled core agile principles of collaboration, prioritization, team accountability and visibility, ensured consistent application of scrum methodologies across the enterprise.
- Gathered Business Requirements from the Subject Matter Experts (SMEs), liaison between the business team and the IT community and documented the requirements in the BRD & Functional Requirement Document (FRD).
- Worked in Agile Development environment with daily stand up meetings, writing user stories, planning sprints, burning points, reviewing, grooming, many more.
- Facilitated Scrum of Scrums for offshore teams and explained the benefits of Scrum to Business to ensure its smooth adoption.
- Worked in AWS environment and understanding of Micro services.
- Utilized data flow diagrams, use case diagrams and process flow diagrams to represent information provided by the Business Owners and supported systems administration team in using Cognos software for BI planning, testing and implementation functions.
- Facilitated JAD Sessions with the SMEs, stakeholders and other management teams in the finalization of the business requirements documentation.
- Generated various List Reports, Grouped Reports, Cross tab Reports, Chart Reports, Drill-Down and Drill-Through Reports and created Dashboards to present critical company data in a single report in Cognos and Tableau.
- Involved in performance tuning of the reports by analyzing and comparing the turnaround times between SQL and Cognos and wrote complex SQL queries to enhance the performance of the Cognos reports.
- Developed Tableau workbooks to perform year over year, quarter over quarter, YTD, QTD and MTD type of analysis.
- Created data mapping spreadsheet and analyzed reference data at attribute level during data integration and data migration. Identified the issues during data migration and worked for defect resolution.
- Manage & coordinate project activities with business users, development, and QA and validation teams to ensure that business requirements are accomplished within stipulated project timelines.

Environment: Agile Scrum, Microsoft Office Suite, Microsoft Visio, Documentum, Windows, Oracle, SQL, SQL Server, Sybase, MS(Word, Excel, PowerPoint, Access), SharePoint 13, UModel, Selenium, Informatica Power Center, Tableau, VBScript, AWS, Adobe Photoshop, MIS-IP, PL/SQL, C++, Java, RESTAPI's, AJAX, HTML5, CSS3, JQuery, Java Script, JBoss Enterprise SOA Platform, JDBC, Oracle, JSON, WADL, WAQL, XML, JSF Frameworks and XQuery, Business Objects, Test Director, Load Runner, JIRA.

Client: AT&T, St. Louis, MO.

Apr 2014- May 2019

Role: Business Analyst/Scrum Master

Roles & Responsibilities:

- Worked in Agile development environment & writing user stories with frequently changing requirements and feature set.
- Analyzed User Requirements Document, Business Requirement Document (BRD), Technical Requirement Specification and Functional Requirement Specification (FRS)
- Conducting meetings with Subject Matter Experts (SME's) to understand the workflow of the business and their application processes.
- Requirements gathering in JIRA, extensively used this tool for User Stories, Tasks, Defects and Issue tracking and generated Sprint Burn Down and Product Burn Down charts, helped Product Owner Estimate Release durations.
- Developed functional specification for developing FRD, and use cases or user stories.
- Created plan for implementing new SOA based web portal for providers using Web services and review and approval of test plan based on requirement documents.
- Transitioned projects and processes from Waterfall to Scrum is major responsibility and Educated and reinforced scrum methodology and agile framework to team members and key stakeholders.
- Created BRD's and FRD's for the migration of cases from one system to the other.
- Used EDI tools to verify mapping to X12 format and validated data at backend and database integrity by using different SQL Queries.
- For Server Side Validation, made sure that the right Data Triggers were implemented to instantiate the jUDDILookup at the right time; validated and mapped the automatically generated WSDL's to check if they are rightly linked to the jUDDI along with mapping Third Party Servers to Application Servers in the form of XML.
- Guided and coached Scrum team on how to use agile practices to deliver high quality products throughout the Software Development Life Cycle and worked with multiple Scrum Teams and coordinated with them about their productivity.
- Validated database efficiency and retrieve data from relational database used different types of joins in SQL queries.
- Involved in configuration of FACETS Subscriber/Member application and responsible for creating weekly and monthly reports for management based on Tableau data.
- Worked closely with department managers to develop Tableau reports that added value to their daily operations.
- Maintaining the full site in AEM for changing content and getting the data from Analytics and coordinate the implementation of tested and documented changes to production.
- Troubleshoot technical errors of software and report to the development team and worked on RESTFUL Web Services to create SOA architecture for customer acquisition project.
- Used XML/XSLT to enhance dashboard performance and developed Ad-hoc reports using Tableau Desktop, Excel.
- Conducted analysis by understanding the AS-IS system and the TO-BE system requirements with the support from SME's.
- Created ad-hoc reports using MS-Excel and Pivot tables to do the calculations and creating reports accordingly and Creating and modifying SQL queries to match the requirements.
- Updated weekly test execution status and set up defect status meeting with the team and conducting JAD.
- Assisted the Project Manager in developing, tracking and managing the project triple constraint; schedule, cost, resources and scope using MS Project.

Environment: Agile Scrum, Microsoft Office Suite, Microsoft Visio, Documentum, Windows, Oracle, SQL, SQL Server, Sybase, MS(Word, Excel, PowerPoint, Access), SharePoint 13, UModel, Selenium, Informatica Power Center, Tableau, VBScript, Adobe Photoshop, MIS-IP, PL/SQL, C++, Java, RESTAPI's, AJAX, HTML5, CSS3, JQuery, Java Script, JBoss Enterprise SOA Platform, JDBC, Oracle, JSON, WADL, WAQL, XML, JSF Frameworks and XQuery, Business Objects, Test Director, Load Runner, JIRA, Work Bench, Project Management.

Roles & Responsibilities:

- Primary liaison between the business units and technology teams for the Procure to Pay process (Sales and Distribution, Materials Management, Pricing, and Purchasing modules of SAP).
- Identified project dependencies, created user stories, and maintained the product backlog using at first Rally and then IBM Rational TDP.
- Designed current-state and future-state IT architectures and clearly define gaps between the As-is and To-be
- Experience with SDLC process in agile methodology. Strong implementation and rollout experience with salesforce.com CRM (Sales Cloud, Service Cloud, Marketing cloud), Communities, Sites and Force.com platform.
- Managed the life cycle of enhancement requests related to the Procure to Pay process.
- Interfaced with Program Management Office to ensure project goals and requirements are being met on time.
- Facilitated team and cross-team Retrospectives to build good working relationships among the 3 agile teams across distributed teams.
- Organized and facilitated project planning, daily stand-up meetings, reviews, retrospectives, sprint, release planning, demos, and other Scrum-related meetings
- Conducted interviews with key business users to collect information on business processes and user requirements.
- Effectively communicated team velocity and sprint/release progress to all affected teams and management.
- Worked with the Scrum Team and the Product Owner to negotiate the minimum feasible product
- Utilized various SDLC methodology of Agile which includes Scrum and Kanban.
- Implemented clarification log methodology into user story to address questions raised by developers on time, which has resulted in productivity increase and defects reduction.
- Aided with creating purchase orders, bids/RFPs and other SAP related tasks involved with the Procurement Process.
- Conducted various types of testing in the agile environment which includes User Acceptance Testing (UAT) and helped in designing and developing test plans and test scripts on SOAP UI. Also shared it with the E2E testing team and reviewed the results.
- Deployed and enforced standards for the release management process
- Initiated the implementation of new fields and functionality within Remedy system to support SAP Release Management Process
- Automated reporting of metrics data utilizing Business Objects tool to allow the more efficient use of time Managed Project timeline and milestones for each team, including a wide range of functional training packages.
- Prepared description and flow-charts of business processes using MS Visio, ARIS Toolset
- Developed business architecture using requirements such as scope, processes, alternatives, and risks
- Involved in creating User Stories, Test Plans and maintaining the Product Backlog
- Communicated client's business requirements by constructing easy-to-understand data and process models.
- Validated ETL interfaces in System testing, executing and created User Acceptance Testing (UAT) procedures and monitored results
- Used agile methodology to address concerns of project timelines with continuous monitoring.
- Communicated with users by handling all quality issues, holds, releases, special projects, and special requests.
- Organized JAD sessions to flush out requirements, performed Use Case and workflow analysis, outlined business rules, and developed domain object models.

- Conducted JAD sessions with stakeholders throughout SDLC to resolve open issues and managed scrum meetings.
- Gathered and updated project materials, completing the budget, forecasting, project documentation, business flow, and lessons learned documents.
- Performed product function testing to user standards and industry compliance standards using Agile and Scrum routines.
- Working in the Enterprise Business Intelligence Services group, analyzing issues and new requests for the Enterprise Data Warehouse.
- Defined the duplication of data and columns between tables using TOAD and SQL.

Environment: MS Visio, ARIS Toolset, RUP, Tableau, SQL Server 2008, MS Access 2000, HTML, CSS, XML, MS Excel, Power Point.
