

AK

Augustine Koffi

Professional Summary

Security professional prepared with deep knowledge of security protocols and architectural frameworks. Extensive experience in developing and implementing security strategies that align with business goals. Known for collaborative approach and adaptability, ensuring seamless integration and compliance with evolving security needs.

Work History

American Income Life Insurance Company - IAM Consultant/Cloud Solution Architect

Harrisburg, PA

10/2025 - Current

- Led implementation of identity governance frameworks to enhance security protocols.
- Developed and executed risk assessment strategies for user access management.
- Streamlined onboarding processes by integrating automated identity verification solutions.
- Conducted regular audits to ensure compliance with industry regulations and standards.
- Mentored junior consultants on best practices in IAM solutions and tools.
- Collaborated with cross-functional teams to align IAM strategies with business objectives.
- Analyzed system vulnerabilities, recommending enhancements to mitigate risks effectively.
- Designed training programs to elevate team proficiency in IAM technologies and methodologies.
- Created comprehensive documentation for IAM policies, procedures, and technical requirements to facilitate knowledge sharing among team members.
- Understood business direction of companies and created optimized architectures to meet business needs.

🔗 [Bold Profile](#)

Skills

- Enterprise architecture design
- Aris
- Performance optimization
- Security and compliance
- Stakeholder communication
- Systems design
- DevOps implementation
- Microservices architecture
- Technical project management
- Data integration strategies
- Application modernization
- API design and management
- Cloud computing expertise
- Terraform
- GitHub

Education

03/2022

University of Texas At Austin

Austin, TX

Post Graduate Program in Cloud Computing: Cloud Computing

- Analyzed clients' existing identity management systems, identifying areas for improvement and providing recommendations for enhancements.
- Implemented multi-factor authentication to increase system protection and reduce unauthorized access risks.
- Troubleshoot complex issues related to identity systems or data integrity leading to prompt resolutions minimizing downtime or disruption.
- Leveraged industry insights to deliver best-of-breed expertise to clients.
- Ensured regulatory compliance by incorporating industry standards such as GDPR, HIPAA, or SOX into IAM programs as needed.
- Evaluated emerging trends in Identity Access Management technologies to incorporate cutting-edge solutions into service offerings continually.
- Worked closely with stakeholders understanding their requirements translating them into IAM policies and controls tailored to their specific needs.
- Conducted regular reviews of access rights ensuring least privilege principles were adhered to mitigate insider threat risks.
- Reduced operational costs through the optimization of identity management systems and processes.
- Enhanced user experience enabling self-service password resets reducing helpdesk requests around account lockouts/password changes.
- Collaborated with cross-functional teams to ensure seamless integration of IAM solutions into existing infrastructure.
- Managed IAM projects from inception to completion, ensuring timely delivery and client satisfaction.
- Conducted training sessions for end-users and IT staff on proper usage of IAM tools and best practices, increasing overall compliance rates.
- Developed customized IAM solutions for clients, resulting in streamlined processes and enhanced security.
- Assisted in the development of comprehensive disaster recovery plans that included provisions for protecting critical identity data during emergencies or outages.
- Improved IAM security by conducting regular audits and assessments of user access rights.
- Successfully migrated legacy identity systems to modern platforms increasing security, efficiency, and scalability.
- Streamlined user provisioning processes by implementing automated workflows and tools.
- Maintained industry leadership reputation by responding to press inquiries.
- Performed ongoing maintenance activities such as patching, upgrading software components, integrating new features within existing implementations of IAM solutions.
- Collaborated with sales organization and delivered outstanding sales support to retain and grow business.

06/2020

University of Pennsylvania

Philadelphia, PA

Certificate: FULL STACK DEVELOPER

2001

University of Ghana

Ghana

Bachelor of Science: Bsc. Accounting

Certifications

- Amazon Web Services Certified Solutions Architect
- Linux Professional Institute Certification
- TOGAF

- Designed role-based access control models tailored to clients' business needs, simplifying user management processes while maintaining appropriate levels of security.
- Designed complete solution architecture tailored to specific end-user needs.
- Designed, tested, installed and monitored new systems.
- Consulted with clients to align future software development with customer priorities.
- Prepared system diagrams and flow charts to support problem analysis.
- Developed complex solutions to all business problems along with customer engagements by detailed analysis, negotiation and coordination with main decision makers.
- Served as primary liaison between software customers and development team, relating feedback and concerns for future patch cycles.
- Provided quality assurance testing for pre-release software through alpha and beta cycle development channels.
- Purchased systems and prepared documentation and progress reports for customers.
- Offered software-related technical support through various communications channels.
- Executed program modifications and changes and documented results of software research tools and applications.
- Attended industry conferences, performing promotional and educational duties for company.
- Operated within cross-functional environments, coordinating multi-disciplinary teams to avoid redundancy and reduce dependencies.
- Served as technical expert on products at press events and conferences.
- Troubleshoot incidents reported by end-users to schedule system changes and identify permanent solutions.
- Collaborated with upper management to drive strategy and implement new processes.
- Analyzed existing systems and databases and recommended enhancements to solve business needs
- Communicated and explained business requirements to team members to understand and implement functional demands.
- Performed internal system acceptance to deliver well-tested enhancements and meet business requirements.
- Enhanced project management skills by defining and presenting system solutions and timelines for business needs or technical problems.
- Oversaw document development across project workstreams to create internal control statements per compliance and regulatory standards.
- Enhanced system performance and reliability for clients by designing, implementing, and managing cloud infrastructure.
- Evaluated and recommended improvements to existing cloud infrastructures, resulting in enhanced performance and reduced operational costs for clients.

- Delivered innovative solutions that exceeded client expectations by staying current with emerging trends in cloud technology and incorporating them into designs when appropriate.
- Continuously updated technical expertise through industry research, attending conferences, and obtaining certifications relevant to the role.
- Configured and modified product systems to meet customer-specific needs.

PNC Bank - AWS Solutions Architect/Cloud Engineer

East Pittsburgh, PA

05/2022 - 03/2024

- Designed scalable cloud architectures using AWS services to enhance application performance.
- Implemented security best practices for data protection in AWS environments.
- Collaborated with cross-functional teams to deliver cloud solutions aligned with business objectives.
- Optimized infrastructure costs by analyzing usage patterns and recommending resource adjustments.
- Led migration projects from on-premises to AWS, ensuring minimal disruption to operations.
- Developed automation scripts for deployment processes, increasing efficiency and reducing errors.
- Mentored junior architects in best practices for cloud design and implementation strategies.
- Evaluated emerging technologies to drive continuous improvement in cloud solutions offered by the organization.
- Reduced operational costs with the migration of legacy systems to AWS.
- Collaborated with cross-functional teams to develop tailored cloud architecture solutions for various projects.
- Increased security compliance by enforcing encryption, access control policies, and monitoring configurations.
- Automated monitoring tasks using CloudWatch, Lambda functions, and custom scripts to ensure optimal performance metrics were maintained.
- Enhanced application performance by optimizing cloud resources and reducing latency.
- Facilitated communication between technical and non-technical stakeholders, ensuring project objectives were clearly understood and effectively met.
- Developed proof-of-concept implementations showcasing the benefits of adopting specific AWS services or architectural patterns before full-scale adoption within an organization's infrastructure landscape.
- Championed a culture of continuous improvement within the organization by sharing lessons learned from previous projects and encouraging team members to contribute their own insights and experiences.

- Conducted regular audits of AWS environments to identify areas for improvement related to security, performance, or cost-efficiency measures.
- Troubleshoot complex issues within AWS environments, identifying root causes and implementing corrective actions.
- Mentored junior team members in best practices for AWS solution design and implementation processes.
- Maintained up-to-date knowledge on emerging trends in cloud computing technologies relevant to the field of AWS Solutions Architecture by attending conferences, workshops, or webinars regularly.
- Implemented cost optimization strategies through resource allocation adjustments and reserved instance purchases.
- Assisted clients in determining suitable architectures based on their unique requirements and constraints while adhering to industry standards and best practices for cloud-based infrastructures.
- Improved AWS infrastructure efficiency by designing and implementing scalable solutions.
- Evaluated new AWS services and features, providing recommendations for integration into existing workflows.
- Ensured high availability of applications, implementing effective backup and disaster recovery strategies.
- Managed the AWS infrastructure for multiple clients simultaneously, prioritizing tasks based on urgency and business impact while maintaining overall quality standards.
- Presented roadmap and technology infrastructure to customers, demonstrating deep familiarity with APIs, platform infrastructure, security and integration capabilities.
- Worked closely with product teams to define and prioritize partner feature requests
- Managed project planning, resource allocation, scope, schedule, status and documentation.
- Managed project scope, schedule, status and documentation.
- Provided support during customer implementations and applied industry best practices.
- Worked with customers or prospective customers to develop integrated solutions and lead detailed architectural dialogues to facilitate delivery of comprehensive solution.
- Created and implemented innovative business solutions to support corporate objectives.
- Worked with clients post-implementation on user testing, debugging, support and maintenance.
- Communicated with partners and clients to update product and implementation status at technical or functional level.
- Guided and influenced existing partners on recommended upgrades and enhancements to integrated solutions.
- Supervised deployments and provided troubleshooting and user support.

- Conducted research to evaluate systems design and process efficiency.
- Conducted post-sale requirements gathering, analysis and documentation.
- Executed application database upgrades, backups and restore duties.
- Worked with customers and engineering team to determine equipment needs and system requirements.
- Worked closely with sales team on understanding customer requirements, promoting products and delivering sales support.
- Helped customers improve results by recommending changes focused on lowering costs, increasing production, or adding new functionality.
- Assisted customers in troubleshooting product issues and provided timely technical support.
- Collaborated with cross-functional teams to deliver successful product implementations.
- Utilized creative problem-solving skills to overcome technical challenges in the sales process.
- Tracked sales data for analysis and forecasting.
- Configured and modified product systems to meet customer-specific needs.
- Wrote detailed technical documentation for company products.
- Presented technical presentations to clients to explain product features and benefits.
- Gained extensive knowledge of products and services to provide best-in-class sales engineering solutions.
- Developed and implemented product marketing plans to reach target customers.
- Delivered technical presentations matching audience level of expertise to explain products and services to customers.
- Organized product demonstrations and trial installations of equipment to promote products.
- Cultivated and maintained strong relationships with customers to ensure a positive customer experience.
- Responded to specific customer requests, including RFP responses and industry-specific solutions.
- Created product training plans centered on customer success and satisfaction.
- Helped team implement successful sales strategies for complex engineering projects.
- Contributed additional revenue to sales plans through resale opportunities.
- Participated in system development life cycle from requirements analysis through system implementation.
- Monitored and tested application performance to identify potential bottlenecks, develop solutions and collaborate with developers on solution implementation.
- Designed and executed effective cloud backup strategies, safeguarding critical data against loss.

- Achieved cost savings in cloud operations, negotiating favorable terms with cloud service providers.
- Streamlined compliance with industry regulations, implementing robust cloud security measures.
- Enhanced customer satisfaction by delivering tailored cloud solutions that met unique business needs.
- Fostered innovation in cloud solutions, researching and applying cutting-edge technologies.
- Wrote and maintained custom scripts to increase system efficiency and performance time.
- Designed and implemented system security and data assurance.
- Defined enterprise processes and best practices and tailored enterprise processes for applications.
- Managed installation, upgrade and deployment projects and provided on-site direction for network engineers.
- Facilitated seamless integration of cloud services with existing on-premises infrastructure, ensuring minimal disruption.

Integrated Intel Solutions - Cloud Solution Architect

Philadelphia, PA

11/2014 - 04/2022

- Designed scalable cloud architectures to enhance client operational efficiency.
- Led cross-functional teams in implementing cloud migration strategies, ensuring seamless integration.
- Developed best practices for cloud security and compliance, reducing risks and vulnerabilities.
- Streamlined deployment processes using Infrastructure as Code (IaC) tools for improved agility.
- Mentored junior architects on cloud technologies, fostering skill development and knowledge sharing.
- Conducted architecture reviews to validate solutions against business requirements and technical standards.
- Collaborated with stakeholders to align cloud strategies with organizational goals and objectives.
- Evaluated emerging technologies to drive innovation within cloud service offerings and solutions.
- Streamlined communication across departments by creating centralized repositories for project documentation and resources, improving overall efficiency and collaboration within the team.
- Achieved increased scalability for client systems with well-designed auto-scaling policies and load balancing techniques.
- Kept projects on track with thorough monitoring of progress against milestones, promptly addressing any issues or roadblocks encountered along the way.
- Ensured high availability of critical applications through implementation of robust disaster recovery plans.

- Optimized cost efficiency by recommending appropriate cloud services based on client needs and budget constraints.
- Contributed to business growth by participating in pre-sales activities, providing technical insights during client presentations, and crafting customized proposals.
- Enhanced system performance and reliability for clients by designing, implementing, and managing cloud infrastructure.
- Evaluated and recommended improvements to existing cloud infrastructures, resulting in enhanced performance and reduced operational costs for clients.
- Continuously updated technical expertise through industry research, attending conferences, and obtaining certifications relevant to the role.
- Delivered innovative solutions that exceeded client expectations by staying current with emerging trends in cloud technology and incorporating them into designs when appropriate.

Global Solutions Pittsburgh - Linux System Administrator

East Pittsburgh, PA

07/2013 - 10/2014

- Improved system performance by optimizing Linux server configurations, implementing efficient backup processes, and performing regular maintenance tasks.
- Ensured high availability of critical systems by proactively monitoring server health and addressing potential issues before they escalated.
- Reduced downtime during planned system upgrades, maintaining seamless user experiences through thorough testing and rollback planning.
- Enhanced network security by implementing firewall rules, intrusion detection systems, and fine-tuning access controls on Linux servers.
- Managed multiple projects simultaneously while adhering to strict deadlines, prioritizing tasks based on business needs and resource availability.
- Resolved complex technical issues promptly by leveraging strong troubleshooting skills and root cause analysis techniques.
- Actively participated in disaster recovery planning exercises to ensure preparedness for any unexpected events that could impact critical systems.
- Resolved vulnerabilities by making improvements to network security.
- Installed system-wide hardware components, confirming interoperability and compatibility with Linux-based software distros.

Dorman Products - Inventory Specialist

Colmar, PA

08/2001 - 10/2013

- Managed inventory levels to optimize stock availability and minimize discrepancies.
- Conducted regular audits to ensure accuracy of inventory records and compliance with company standards.

- Implemented inventory tracking systems, enhancing efficiency in stock management processes.
- Trained new staff on inventory procedures and best practices for maintaining accurate records.
- Analyzed inventory data to identify trends, improving forecasting and replenishment strategies.
- Developed streamlined processes for receiving, storing, and distributing materials within the facility.
- Collaborated with cross-functional teams to align inventory management with operational goals and objectives.
- Led initiatives to reduce waste and improve overall efficiency in inventory handling operations.
- Enhanced inventory accuracy by conducting regular cycle counts and reconciling discrepancies.
- Performed data entry and completed proper paperwork.
- Completed physical inventory counts each month.
- Collaborated with team members to ensure timely completion of daily tasks, increasing overall productivity.
- Maintained a clean and well-organized work environment, promoting safety and efficiency among team members.
- Participated in annual physical inventories to verify accuracy of records and identify any discrepancies that needed correction.
- Trained new employees on proper procedures, boosting their ability to contribute effectively as part of the team.
- Managed the return process for damaged or defective goods, ensuring prompt resolution for customers and minimizing financial loss for the company.
- Provided excellent customer service by quickly responding to inquiries and resolving concerns related to inventory availability or shipment status.
- Prepared detailed reports on inventory levels and movement trends, providing valuable information for decision-making purposes.
- Optimized storage layouts by analyzing space usage patterns, leading to increased capacity without additional expense or construction requirements.
- Reduced stock shortages by closely monitoring inventory levels and promptly ordering necessary supplies.
- Assisted in implementing a new inventory management system, resulting in more accurate record-keeping and reduced errors.
- Streamlined warehouse organization for improved efficiency in locating items and fulfilling orders.
- Implemented barcode scanning technology within the warehouse, speeding up item retrieval times during order fulfillment processes significantly.
- Ensured compliance with regulations concerning hazardous materials storage, contributing to a safe working environment.
- Coordinated with suppliers to establish optimal delivery schedules, reducing instances of overstock or stockouts.

- Coordinated with suppliers to ensure timely restocking of high-demand items, preventing potential sales losses.
- Negotiated with suppliers for better pricing on bulk orders, achieving cost savings without compromising quality.
- Implemented returns processing system that expedited restocking of returned goods and minimized losses.
- Led project to identify and phase out slow-moving stock, freeing up valuable warehouse space.
- Collaborated with sales team to align inventory levels with promotional activities, optimizing sales opportunities.
- Streamlined inventory management processes, significantly reducing time spent on stock audits.
- Collaborated with IT department to upgrade inventory management software, enhancing feature set and usability.
- Optimized order fulfillment process, reducing time from order placement to shipment.
- Facilitated training sessions for new staff on inventory management software, boosting team productivity.
- Improved inventory handling procedures to minimize damage during storage and handling, preserving product quality.
- Managed disposal of obsolete inventory in environmentally responsible manner, ensuring compliance with regulations.
- Improved warehouse space utilization with strategic reorganization of stock areas.
- Enhanced product availability with efficient inventory tracking, ensuring high-demand items were always in stock.
- Utilized forklift or pallet truck to load, unload, transport and store goods.
- Processed required paperwork to expedite handling of shipped and received goods.
- Requisitioned new supplies and maintained storage areas for smooth department operations.
- Worked effectively with shippers to resolve shipment issues, damaged materials and shortages.
- Supported reporting, accounting and recordkeeping staff with accurate updates regarding shipment information.
- Maintained up-to-date price lists to accurately calculate shipping, shortage and demurrage costs.
- Partnered with representatives from different carriers to arrange materials shipments.
- Communicated with carrier representatives, arranging for special deliveries and shipment receipts.
- Conducted research to address shipping errors and packaging mistakes.
- Drafted and managed work and shipping orders, bills of lading, and shipping route materials for accurate and compliant recordkeeping.
- Corresponded with carrier representatives to make arrangements and provide instructions for shipment and delivery of orders.

- Factored shipping procedures, rates and routes in making determinations on best shipping methods for materials.
