

Benjamin D. Hornedo

Technical Solutions Architect · Software Engineer · AI Automation Engineer

📍 Northvale, NJ · 📞 +1.201.301.4237 · ✉ ben@uptown4.com · 🔗 linkedin.com/in/uptown4

Professional Summary

Solutions Architect with 25+ years designing and delivering scalable enterprise platforms for large-scale clients, including Whirlpool and Roc Nation Distribution. Expert in software architecture, cloud-native architectures, containerization/microservices, and AI/LLM integration. Proven track record translating complex business requirements into technical solutions while leading cross-functional teams. Agile coach and mentor with deep experience implementing Agile processes, DevOps practices, and CI/CD pipelines for measurable Continuous Delivery. Building bespoke software solutions since 2002.

Core Competencies

Architecture & Design	Cloud & DevOps	AI & Integration
Microservices Architecture	AWS / Cloud-Native	LLM Integration
API Design (REST/GraphQL)	Kubernetes / Helm / Docker	Automation (n8n)
Event-Driven Architecture	Terraform / IaC	Vector Databases
System Design & Scalability	ArgoCD / Jenkins / GitOps	Prompt Engineering
Technical Documentation	CI/CD Pipelines	Ollama

Leadership: Agile Coaching · Scrum / Kanban / SAFe · Pre-Sales & Client-Facing · Technical Mentorship

Frontend: React / Next.js · Modern Angular · TailwindCSS · Material Design

Backend: Node.js / NestJS · MongoDB · PostgreSQL · RabbitMQ · Kafka · Socket.IO · SupaBase

Languages: English · Hebrew · Spanish · Portuguese

Professional Experience

Uptown4, Inc. — Newark, DE

Founder / Technical Solutions Architect / AI Automation Engineer / Mentor | Jan 2002 – Present

- Founded and operate a boutique technology consultancy delivering 50+ enterprise solutions across fintech, defense, retail, and media sectors; platforms include systems handling 1M+ daily transactions.
- Serve as hands-on Solutions Architect, AI/Automation Engineer, and Full-Stack Engineer across client engagements, designing microservices architectures and cutting deployment cycles from weeks to hours via containerization and GitOps/IaC/Continuous Delivery.
- Implemented event-driven architectures using RabbitMQ and Kafka, improving system throughput 3× while reducing infrastructure costs by 40%.
- Agile Coach & Mentor: Trained and mentored 20+ development teams on Scrum, Kanban, and SAFe; facilitated retrospectives and continuous process improvements across USA and Israeli organizations.
- Currently integrating AI capabilities — LLMs, RAG pipelines, workflow automation — into client solutions using Ollama, n8n, Claude, OpenAI, and custom microservice implementations.

Certified Freelance Solutions Architect & Full-Stack Software Engineer | 2019 – Present

- Engaged as a certified freelance architect and full-stack engineer, delivering hands-on technical leadership and implementation for client projects.
- Led architecture and development of the Roc Nation Distribution platform — a music catalog and distribution system managing releases for major artists.
- Designed and built microservices with Node.js, MongoDB, and AWS; implemented event-driven pipelines supporting real-time distribution across streaming and retail channels.

Key Engagement:

Roc Nation Distribution — Solutions Architect (2025–Present) Music catalog and distribution platform for major artists; Node.js microservices, MongoDB, AWS infrastructure, real-time streaming and retail distribution pipelines.

TMG — Tech Mates Group — Chicago, IL

Solutions Architect / Full-Stack Software Engineer | 2021 – 2025

- Served as hands-on Solutions Architect and Full-Stack Engineer for Whirlpool's Lodestar IoT-connected factory management platform.
- Designed real-time data pipelines processing millions of production-line device telemetry events daily, ensuring high availability and fault-tolerant ingestion on private cluster based Kubernetes.
- Architected microservices and API layers integrating IoT device data with enterprise backend systems; drove full-stack implementation across Python and Angular.

Key Engagement:

Whirlpool Lodestar — Solutions Architect (2021–2025) IoT-connected appliance factory management platform; real-time data pipelines processing millions of production-line events daily on on-premise clusters, full-stack Python and Angular implementation.

CodeValue — Israel

Solutions Architect & Technical Lead | Feb 2017 – Jul 2020

- Architected enterprise solutions, translating business requirements into scalable technical designs using Docker, Kubernetes, and event-driven microservices patterns.
- Led teams of 8–12 developers delivering large-scale Angular/Node.js applications; conducted architecture reviews and established technical standards across multiple projects.
- Agile Coach: Implemented Scrum and Kanban processes for 5+ teams; mentored junior architects and developers; delivered technical talks on microservices, containers, and modern web architecture.

Key Engagements:

Rafael Deployment Planner — Solutions Architect (2018–2020) Designed greenfield architecture for a missile defense deployment planning system to simulate ideal hardware deployment for maximum protective coverage.

Imisight — Solutions Architect (2017–2018) Re-architected brownfield project, cloud-based platform that utilizes imagery and artificial intelligence (AI) algorithms to extract insights and assist in oversight.

Universal Mind — Grand Rapids, MI

Senior Developer | 2009 – 2016

- Developed mobile and enterprise applications for Fortune 500 clients including FedEx, Johnson Controls, and Meijer.
- Designed backend APIs and integration layers supporting mobile frontends; contributed to architecture decisions on high-visibility projects.
- Technologies: iOS (Objective-C / Swift), Node.js, AngularJS, Salesforce integration.

Covansys, Inc. — New York, NY

Senior Developer / Technical Lead | 1999 – 2001

- Designed multi-tier CRM and enterprise help desk solutions for high-profile clients, including the New York Stock Exchange.
- Led development of large-scale customer relationship management systems; served as technical lead, bridging business requirements and engineering execution.

Vital Computer Staffing — New York, NY

Systems Consultant | May 1999 – Aug 1999

- Performed System/Network Administrator functions for high-profile firms across the New York Tri-state area under short-term contracts.
- Duties included resolving server configuration issues, configuring backup solutions and client-server connectivity; managed Windows Server, TCP/IP, and web server environments across development, staging, and production.

Road Runner (Time Warner Cable) — Stamford, CT

Systems Administrator | Dec 1997 – Mar 1999

- Developed and maintained the RoadRunner Online Support System (OSS) — a Trouble Ticketing/Customer Care platform used by 20+ TWC affiliate cable providers serving 220,000+ users.
- Managed a three-tier system running Sun Solaris; responsible for all System Administration, Workflow Development, Web Development, and Database Administration.

Bronx District Attorney's Office — Bronx, NY

Technical Support / Systems Administrator | Mar 1997 – Dec 1997

- Served as Systems/Network Administrator supporting the DA's office technology infrastructure.
- Resolved server configuration problems, configured services and backup solutions, and managed client-server connectivity in a high-accountability legal environment.

Certifications & Training

- **System Architecture & Microservices** — CodeValue (2019)
- **Lean Startup** — Galilee Accelerator, Israel (2010)
- **Microsoft MCSE+I** — Internet Specialization (1999)
- **MCP+I** — Microsoft Certified Professional, Internet (1999)
