- Voice of Customer (VOC) Specialist – AIGPE

PROFESSIONAL EXPERIENCE

National Committee for Quality Assurance (NCQA)

Customer Success Manager | Mar 2023 – Present

- Serve as the primary strategic partner for enterprise healthcare organization using NCQA Digital Content Services, owning post-implementation success, value realization, retention, and expansion across the full customer lifecycle.
- Lead Quarterly Business Reviews (QBRs) and strategic planning sessions, presenting adoption metrics, performance trends, risks, and improvement opportunities aligned to customer business objectives.
- Monitor customer health through usage analytics, engagement KPIs, and operational indicators, proactively identifying risks and coordinating cross-functional remediation plans to protect renewals.
- Partner cross-functionally with product, engineering, and implementation teams to optimize workflows, resolve escalations, and remove adoption barriers, serving as the escalation point for complex customer issues.
- Develop and deliver custom executive-facing reports and dashboards (Power BI, Excel) providing visibility into utilization, performance trends, and ROI to support renewal and expansion conversations.
- Identify expansion and upsell opportunities by mapping customer needs to additional digital offerings, directly supporting ARR growth, retention, NPS, and CSAT targets.

Mobile Health

Account Manager | Sep 2022 – Apr 2023

- Owned enterprise healthcare client relationships using a HIPAA-compliant SaaS platform supporting occupational health, compliance-driven screenings, and provider-facing workflows, serving as the primary strategic and operational partner.
- Led end-to-end onboarding, implementation, and lifecycle management, ensuring platform configuration, scheduling workflows, reporting, and data exchange aligned with client operational and revenue objectives.
- Partnered with client operations, HR, and clinical stakeholders to optimize intake, documentation, scheduling, and results delivery workflows, improving turnaround times, compliance, and downstream billing readiness.
- Analyzed utilization, revenue trends, and operational KPIs to identify performance gaps and expansion opportunities, driving a 15% increase in recurring revenue across the portfolio.

- Stabilized 12 at-risk enterprise accounts by diagnosing adoption barriers, workflow breakdowns, and service delivery issues, executing targeted remediation plans to restore satisfaction and retention.

Office of Labor Relations, City of New York

Partner Success Manager | Jan 2020 – Sep 2022

- Owned enterprise partner relationships across 20 city agencies, serving as the primary point of contact responsible for onboarding, engagement, performance outcomes, and long-term program success.
- Led program performance management, developing KPIs, success metrics, and reporting frameworks to track adoption, participation, and outcome effectiveness.
- Delivered executive briefings and strategic updates, presenting performance trends, risks, and recommendations to support decision-making and program optimization.
- Drove renewal and retention strategy, achieving a 95% renewal rate through data-driven onboarding, stakeholder alignment, and continuous performance optimization.
- Increased program participation by 43% by refining onboarding processes, stakeholder communications, and engagement strategies across a large, multi-agency portfolio.

NYC Department of Health & Mental Hygiene

Provider Engagement Manager – EHR Workflow Optimization | Oct 2018 – Jan 2020

- Led enterprise-scale EHR engagement and optimization initiatives across 173+ primary care and specialty practices, serving as a strategic partner to clinical leadership, administrators, and IT teams.
- Delivered EHR training, workflow redesign, and feature adoption for eClinicalWorks, aligning documentation, referrals, and reporting workflows with operational, compliance, and quality objectives.
- Partnered with practice administrators and operations teams to standardize intake, documentation, and reporting processes, improving data accuracy, operational consistency, and downstream reporting and reimbursement readiness.
- Drove a 16% increase in EHR feature utilization and a 23% increase in closed-loop referrals by aligning system configuration and provider workflows to real-world operational needs.
- Developed provider-facing toolkits, SOPs, and training materials to support scalable onboarding, change management, and long-term adoption across large provider networks.

TECHNICAL PROFICIENCIES
