EDUCATION

The University of Texas at Dallas

AUG 2021 – MAY 2023

Master of Science, Information Technology and Management

GPA 3.78/4

CERTIFICATION AND TECHNICAL SKILLS

Certifications: Certified Scrum Master (CSM), IBM Data Science Professional Certificate, Workday Advanced Compensation Module, Workday People Analytics, AWS Cloud Practitioner, Google Analytics, Google Digital Unlocked

Analysis Tools: Tableau, Power BI, Google Analytics, Microsoft Excel, Macros, Microsoft Visio, Adobe Analytics, Microsoft Access, Google Data Studio, SPSS, SAP, Azure, Workday, SaaS, SharePoint, Salesforce, QlikView, Google Suite

Programming and Framework Tools: Python, HTML, R, SQL, Hadoop, HDFS, Hive, MapReduce

Project Management Methodologies & Tools: Agile, Waterfall, Kanban, Microsoft Project, JIRA

PROFESSIONAL EXPERIENCE

DALLAS COLLEGE, DALLAS, UNITED STATES

OCT 2023 – PRESENT

COMPENSATION ANALYST

- Conducted salary survey development, executed cost analyses for employee compensation trends, determined initial salary placements, and ensured internal equity by cross-referencing salary data from over 5+ sources like Segal, and LaborIQ
- Assessed the influence of HRIS modules on salaries by evaluating compensation data through Workday reporting and analytics
- Executed technical and analytical tasks involving the collection, interpretation, reporting, aggregation, and evaluation of data using Tableau, MS Excel, and Python

INTUITIVE CLOUD, NEW JERSEY, UNITED STATES

JUN 2022 – AUG 2022

CLOUD SCRUM MASTER INTERN

- Leveraged Google Big Query and SQL to streamline ETL processes, enabling the creation of 5+ insightful Tableau dashboards
- Developed burn-down charts in MS Excel and carried out financial analysis for over 10 projects, ensuring policy compliance
- Applied statistical modeling using Python to enhance customer retention and acquisition, designing six-plus performance metrics
- Optimized Agile workflows, leading daily scrum meetings, sprint planning, and retrospective sessions, resulting in a 15% reduction in project time-to-market

ACIDAES SOLUTIONS PVT LTD, MUMBAI, INDIA

AUG 2019 – DEC 2020

PRESALES DATA ANALYST

- Translated business needs of financial services into 8+ user stories using JIRA and assisted in scrum meetings to facilitate roadmap analysis, progress tracking, and outcome evaluation with 4+ cross-functional teams
- Created 5+ Swimlane flowcharts for business process mapping of lead conversion journey, developed the CRM solution, and designed customer 360° view for the clients
- Utilized SQL Server Integration Services (SSIS) for ETL processes, achieving a 40% overhead reduction in data warehouse operations. Presented reports to senior leaders that showed an increase in revenue through business efficiency by 12%

AMUL, MUMBAI, INDIA

MAY 2018 – DEC 2018

DATA ANALYST INTERN

- Implemented qualitative and quantitative research, including requirements gathering, surveys, focus groups, market research using MS Excel, and Google Forms for 8+ frozen products
- Leveraged Python to perform exploratory data analysis on a dataset of 1000+ customers driving improvements in sales, marketing, and product development. Visualized sales pipeline, pricing, and analyzed cost across 30 regions using Tableau
- Applied statistical methods like regression analysis and hypothesis testing and performed A/B testing to gain insights into purchasing behaviors
- Proposed pricing model restructuring, product packaging redesign, marketing campaigns, and compensation plans, resulting in a 25% increase in sales of frozen products

ACADEMIC PROJECT EXPERIENCE

DATA INTERPRETATION OF JOB SALARIES IN ANALYST DOMAIN

JAN 2023 – MAR 2023

- Developed a Power BI dashboard analyzing global employee compensation for 10+ analyst roles, integrated SQL for country-wise reports by employment type and experience levels. Summarized average salaries and market competitiveness

SCREEN TIME ANALYSIS OF SOCIAL MEDIA APPS

AUG 2022 – OCT 2022

- Employed Python libraries like NumPy, Seaborn, Matplotlib, and Plotly to analyze screen time data of two social media apps
- Formulated visualizations, including bar graphs and scatter plots, to identify usage patterns and positive linear trend

DATA ANALYSIS OF ACCIDENTS CAUSED BY HEAVY VEHICLES

FEB 2022 – APR 2022

- Repositioned input files into Cloudera VM, loaded data into Hive, and created multiple tables through Hive queries
- Integrated Tableau and HDFS, constructed dashboards, and conducted regression analysis to assess the correlation of risk factors, proposing more than 2 safety revisions for heavy vehicle movements based on the findings
