EDUCATION

University of Wisconsin-Madison, Wisconsin School of Business, Madison, WI
Master of Science in Business Analytics

December 2023

Jiangxi Science and Technology Normal University, Jiangxi, China
Bachelor of International Economics and Trading (with honors)

July 2021

PROFESSIONAL EXPERIENCE

Advanced Materials Industrial Consortium (AMIC), Madison, WI
Project Assistant

08/23 – 12/23

- Conducted comprehensive comparison study of nuclear radiation facilities at nine leading US universities using **Power BI** and delivered key insights on optimizing industrial use through strategic staff and equipment enhancement to UW-Madison Engineering Department.
- Leveraged LinkedIn analytics to analyze user engagement achieving 20% increase in views and interaction on posted content; managed 4 social media platforms and conducted targeted **A/B tests** to refine content strategies in LinkedIn;
- Analyzed historical funding trends and crafted dynamic dashboard **using Excel** to strategically identify and target potential companies for fund-raising initiatives; developed specialized Google Drive database to manage data on industry-student partnerships at UW-Madison.

Proctor and Gamble Consulting Practicum, Madison, WI
Data Analytics Consultant

08/23 – 12/23

- Analyzed 50,000 rows of Nielsen data on U.S. toilet paper sales across more than 200 brands using **Power BI** to identify and recommended effective marketing strategies and enhance product trade-up and customer engagement.
- Engineered data marts using **SQL** to integrate customer and sales data through joins and subqueries, leading to 30% improvement in data analysis efficiency.
- Developed Multinomial Logit Machine Learning Models using **Scikit-Learn in Python** and statistical analysis in **R** to identify key patterns in customer behavior that influence changes in purchasing trends.

FHI 360, Washington, D.C.
Audit Analyst Intern

06/23 – 08/23

- Automated SharePoint updates using **UiPath and Power Automate** to process daily incoming form data related to 2,000+ humanitarian projects across 60 under-developed countries, decreasing the amount of manual labor by 80%.
- Collaborated with 6 team members from 3 functional areas to design comprehensive work tracker in Trello increasing productivity 30% and reducing IT Department rework 15%.
- Developed and implemented Excel macros with VBA language for dynamic risk assessment calculations, achieving an 80% reduction in processing time and minimizing manual data handling.

SELECTED PROJECTS

Building Automated Cloud-Based Data Pipeline (SQL, AWS, BigQuery, dbt). Executed detailed analysis of flight delays and associated costs for Southwest Airlines, resulting in 15% cost reduction and 30% increase in operational efficiency. Designed scalable data pipelines with Fivetran for efficient data extraction and loading from S3 buckets into BigQuery. Utilized dbt for data transformations within BigQuery and developed comprehensive dashboards in Looker.

Optimizing Advanced Weight Loss Meal Replacement Formulation (Python). Developed mathematical model using Mixed Integer Linear Programming (MILP) to optimize formulation of cost-effective meal replacement powder, ensuring it meets minimum nutritional standards as per research in CNKI database.

SELECTED SKILLS

Programming Languages & Workflow Tools: Python (NumPy, Pandas, scikit-learn), R, SQL (MySQL, SQL Server), Snowflake, AWS (S3, Redshift, Sagemaker), Google BigQuery, SAS, GIS

Visualization & Workflow Tools: UiPath, Power Automation, Jira, SharePoint, SmartSheet, dbt, Fivetran, Tableau, Power BI, Datorama, Looker, Lucidchart, Matplotlib, Seaborn, ggplot
