<https://www.linkedin.com/in/n-ishan-45932a226/>

A passionate, detail-driven, and goal-oriented Business Analyst with around 8 years of diverse experience working in the Healthcare, Healthcare insurance and finance domain development and management, focusing on the business development process. Contributing to providing business value and ensuring quality results to suit the organizational needs.

PROFESSIONAL SUMMARY

- Working experience and in-depth knowledge of various Software Development Life cycle methodologies like **Waterfall, Scrum**, Scaled Agile Framework (SAFe), Waterfall-Scrum Hybrid and Kanban.
- Generated requirements using techniques such as **Joint Application Development (JAD)**, Interview sessions, Document analysis, questionnaire/surveys, prototyping, Brainstorming, Requirement Workshops and work sessions.
- Proficient in drafting requirement artifacts such as **Business Requirement Document (BRD)**, **Functional Requirement Document (FRD)**, Functional Specification Document (FSD), Software Requirement Specification (SRS), Use Case Specification, Configuration Documents, **Requirement Traceability Matrix (RTM)**
- Widespread knowledge on Project Management tools like JIRA, Confluence, Business Presentation tools like Prezi and Visualization tools like Power BI.
- Tested transactions for new releases of the OmniPlus recordkeeping system and assisted with the testing for the OmniPlus upgrade.
- Experience in the development of business process model, end user, and documentation in the HR module.
- Supported the team in planning activities for Data staging, development and UAT activities.
- Designed and implemented SQL queries, QA testing, and report/data validation for API documentation.
- Aided the Quality Assurance team in creating Test scripts, Test Plans, Test cases, Test Scenario for the purpose of **User Acceptance Testing (UAT)**
- **Experienced** in software development methodology to include Cognos Enterprise Planning and Business Intelligence reporting technology Certification.
- Spearheaded in analyzing and decision making by performing Feasibility study, Root-cause analysis, SWOT Analysis, Cost-Benefit analysis, Impact Analysis, **AS-IS and TO-BE business analysis**.
- Created **Entity-Relationship Diagrams (ER)** after careful identification of the various entities and their corresponding relationships as well as the associated Conceptual and Logical Data Model ensuring that the required objects are defined accurately and without any Redundancy in the Database. Assisted in understanding Anomalies in the database design and how Normalization is used to address them.
- Worked on configuring Ebusiness Tax module for Vertex.
- Experience in gathering and documentation of requirements, acceptance criteria and other artifacts using the SDLC application in Service Now.
- Review existing IT processes in Service Now to identify areas of improvement and enhancement.
- Proficient in **writing SQL queries** which includes Inner and Outer joins, SELECT statements, Order by, Group by and Aggregate Functions to extract data for timely Reporting and Validation.
- Experienced in Defect tracking, Defect analysis and ability to organize, document and track changes using tools such as JIRA and created Burndown, Burnup and Velocity Charts.
- Experience in cloud solutions including IAAS, SAAS, PAAS, Enterprise Hybrid cloud.
- Hands on experience in Software Verifications, **Unit/Integration (SIT)**, User Acceptance (UAT), Regression, Usability, End-to-End Testing.
- Documenting all functional requirements and designing solutions utilizing enterprise architecture standards including documenting all solution components and configurations.
- Managed upgrades on sales Audit, MAS500, Vertex sales tax application.
- Cooperated in defining interoperability solutions on cloud technologies like Google cloud platform and Azure with each addition of **CMS complaint data**.
- Experienced in accessing **GIT repositories** and **cloud storage buckets**.
- Efficiently collaborated with Business Owners, Business Users, third party vendors and senior stakeholders.

- Exceptional analytical, technical communication and problem-solving skills with experience in working across cross-cultural backgrounds.

SKILLS

Programming Languages: Python , R , HTML5 ,PL/SQL, UNIX Shell scripting

Databases:MS SQL Server 2000 / 2012, My SQL, Oracle x

PM Tools : JIRA, Confluence, MS Project, MS Office suite

Reporting Tools:Tableau, Power BI

SDLC Methodologies: Agile, Waterfall, Scrum, SAP Business one, SAFe, Continuous Integration and delivery.

Data Engineering: ETL, Data Extraction, Manipulation, Database management, MySQL, SQL, PLSQL, MongoDB.

Statistical Inference: A/B Testing, Hypothesis testing, Probability, Confidence intervals, Correlation, Regression.

Finance: Accounting, Financial Modeling and Forecasting, Rate Analysis, Budgeting, Rate Analysis.

Business Tools: Tableau, Power BI, JIRA, Microsoft Office, MS-Excel, MS Visio, Google Analytic, Visual Studio, Data Studio, Salesforce.

EXPERIENCE

AETNA | HARTFORD, CT|

JUNE 2022 – CURRENT

BUSINESS ANALYST

The Project aimed at designing and creating a web-based Secure **Electronic Health Record(EHR)** management application which is communicatively coupled to a centralized cloud repository for the purpose of exchange of Patient health records in a healthcare organization ensuring accordance to **Fast Health Interoperability Resources (FHIR)** and Decision Support Service (DSS) as per the **HL7 international standards** which enables the users to explore patient diagnostic data in real time based on a unique identification, retrieve and transfer data between Physicians, Patients, Pharmacists and Insurance companies.

- Elicited business requirements by conducting **JAD sessions, interviews** with stakeholders, and business owners. Performed extensive **document analysis**.
- Involved in HIPAA 5010 gap analysis of ANSI X12 4010 and ICD 10 initiatives.
- Collaborated with **Subject Matter Experts (SMEs)** for Pre-Analysis of the system, Captained **GAP Analysis** by understanding **the AS-IS business process**, and **TO-BE business process**.
- Assisted the PO in **Translating the functional requirements** and **User Interface (UI)** into **EPICS** and breaking them down into **User stories** and helped manage the **Defect lifecycle** using **JIRA**.
- Developed **Business Modelling** through understanding the needs of the business and developed a **conceptual Matrix** such that the business needs can be tracked to the new business processes satisfying the needs.
- Developed Use Case Models, Data Flow Models, Entity Relationship diagrams (ERD), Sequence, and Class Diagrams using UML and MS VISIO.
- Understood of the relevant **Regulatory Information Management** and developed processes and reviewed them in accordance with the **HIPAA and Electronic Data Interchange (EDI)** in context with the **PHI** data levels of security and standardization with **HL7 protocols** and access provided by the patients.
- Spearheaded in prioritizing the **User stories** and created **Acceptance criteria** for each of them using the **Gherkins Format**.
- Extensive experience in building dashboards using Cognos.
- Actively participated in the **Scrum Ceremonies** such as **Backlog Grooming/Refinement, Sprint Planning Meeting, Daily Scrum, Sprint Review** and **Sprint Retrospective Meetings**.
- **Translated the functional requirements to technical requirements** in the form of **Use Case Diagrams, Process Flows and Prototypes** using **Scrum Methodology**.
- Oversaw Microstrategy platform build out.
- Involved in the full HiPAA compliance lifecycle from GAP analysis , mapping ,implementation and testing for processing of Medicaid claims.

- Well experiences in Cognos BI tools including Framework manager, Report Studio,Cognos Connection ,Query Studio analysis Studio, and Metric Studio.
- Used Service Now reporting to analyze and troubleshoot reports, ensuring data accuracy and timelines.
- Conducted **Stakeholder Analysis**. Facilitated **meetings**, built **business** and **system flows**, managed **defects** and wrote **test scripts and use cases**. Helped with Data Mapping between the data mart and the Source Systems.
- Created and **updated data extensions, filtered data extensions** and wrote **SQL queries** with various functions inside of individualized Data bases to import or export data between data extensions
- Reviewed **unit testing, integration testing, regression testing, and recovery/ fail-over testing** and performed **smoke testing, user acceptance testing (UAT)**.
-

AMAZON| BELLEAVUE, WA|
BUSINESS SYSTEMS ANALYST

SEP 2021– MAY2022

Amazon is an American multinational technology company focusing on e-commerce, cloud computing, online advertising, digital streaming, and artificial intelligence

- Responsible to convert project specifications and statements of problems and procedures to detailed logical flow charts and document them in IT terms.
- Coordinated with business users, architects and developers to create business case document, concept proposals, and process workflows.
- Proficient in understanding HRmodules like benefits,payroll,compensation and recruiting.
- Analysis of business requirements and system requirements of the client and for Property and casualty modules.
- Ensure that models conform to established best practices (including Normalization Rules) and accommodate the change in a cost-effective and timely manner.
- Worked closely with the Enterprise Data Warehouse team and Business Intelligence Architecture team to understand repository objects that support the business requirement and process.
- Performed data analysis and data profiling using Informatica **Data Quality (IDQ)**
- Attended weekly status meetings and represented the MDM Data platform.
- Documented business and technical requirements gathering for the development of **MDM, Data Warehousing** and Reporting implementation roadmaps
- Support system integration testing, UAT and implementation cutover testing.
- Gathered requirements for **MDM** tool implementation and user workflow processes
- Implemented software and hardware components for **Microsoft Dynamics CRM and XRM** applications
- Conducted customization and migration of Microsoft Dynamics **CRM** applications and latest system upgrades
- Created and modified tables, views and indexes; **PL/SQL** stored procedures, functions, and triggers according to business requirement.
- Developed test scenarios and implemented test plans for system testing and user acceptance testing UAT.
- Acted as Sr.Business Analyst on projects for development and implementation of process for the software Service Now.
- Hands on experience in various HR modules,such as :Recruitment and selection ,performance management,training and development,competency management,workforce analysis.
- Worked closely with business users to define reporting requirements and documenting the requirements in order to design, develop and maintain and secure Cognos reports.
- Worked on **IDD UI** configuring subject groups and subject areas to search and edit master records in **MDM**
- Performed Requirement Gathering & Analysis by actively soliciting, analyzing and negotiating customer requirements and prepared the requirements specification document for the application using MS Word.
- Identified opportunities for business process improvement through various meetings with business users and developers and initiated efforts to make improvements.
- Professional experience as a **Cognos Business Intelligence** developer-Analyst with key activities such as support, analysis, designing and testing **Cognos BI** Solutions across multiple Industries.

- Lead multiple project teams of technical professionals through all phases of the SDLC using technologies including **Oracle, Erwin, Data Stage, Data Warehousing, WebSphere** and **Cognos**
- Designed the Data Warehousing **ETL** procedures for extracting the data from all source systems to the target system.
- Worked throughout the **SDLC**, which included requirements, specifications, design, analysis, and testing utilizing **AGILE methodology**.
- **Build/Create** business application configuration items in Service Now.
- Analyzed Siebel interfaces with other systems like Expense systems, Third Party Vendor systems and with other applications and identified interface requirements and gaps and provided solutions.
- Clinical trial management system the system maintains and manages the planning, performing and reporting functions, along with participant contact information.

NORTHERN TRUST | CHICAGO, IL |

JULY 2020 – AUG 2021

JR. BUSINESS ANALYST

- Designed the business requirement collection approach based on the project scope and SDLC methodology.
- Assisted the PM in managing the **Agile Scrum process** to ensure smooth delivery of projects.
- Bridged gaps between IT and business teams by working on the end-to-end requirements and deliverables.
- Performed Data Analysis for deploying reports & performed Data Profiling of current state of data in the Data Warehouse by doing Data Analysis using **SQL queries & Microsoft Excel**, finding Gaps in Data & formulating solutions for the same.
- Participated in process governance review of change Management, incident & Problem Management in ServiceNow
- Worked on different Qlikview version QV 12/11.2/11.0/10 and QlikSense 2.2/3.0.
- Actively used SharePoint to store documents and report weekly progress to Project Managers.
- Developed Hive queries to help analysts spot emerging trends.
- Collaborated with the infrastructure, application, database, network and BI teams to ensure data quality and availability.
- Evaluated and deployed different vendor solutions including COTS and SaaS Solutions.
- Used AWS command line client and management console to interact with AWS resources and APIs.
- Used Service Now reporting to analyze and troubleshoot reports, ensuring data accuracy and timeliness.
- Served as a liaison between the clients, trust administration, recordkeeping and reconciliation teams on all phases of the HR payroll/asset conversion/client issues and reconciliation on OmniPlus.
- Worked closely with both the Business and IT Departments along with the SMEs to amend, create and update process flow charts from **AS-IS to TO-BE system**.
- Create new EC2 instance in AWS, allocate volumes and giving provisional using IAM.
- Acted as Proxy Scrum Master as required and facilitated Scrum Ceremonies like Sprint Planning, Daily Stand-Ups, Sprint Review and Sprint Retrospective Meetings.
- Actively participated in migrating applications from QlikView to QlikSense and took part in resolving critical compatibility issues during migration.
- Conducted **Interviews** and **Brainstorming sessions** with various stakeholders to elicit requirements as well as conducted group JAD sessions with business units and stakeholders to define project scope and deliverables.
- Responsible for submitting the weekly status reports to the Project Manager gathered from various teams.

US BANK | MN

JUNE 2019 – JULY 2020

BUSINESS ANALYST

- Assisted in creating a project plan using program management tool with functional leads.
- Coordinated and organized program meetings and published meeting notes and schedules.
- Identified data issues and provided recommendations for resolution to ensure optimal performance.
- Conducted Gap analysis and developed System Specifications document to define the impact of the new requirements on the existing system.
- Worked with the team on security features: web encryption, content management and authentication.
- Created Test plans, Test Scripts and facilitated user acceptance testing.

- Involved in system enhancement programs from inception to end through all phases of the SDLC. Held BRD/FRD reviews with all stakeholders to finalize and obtained sign off all the requirements.
- Involved in User Acceptance Testing and QA requirements and provided sign off for the results of the test cases.
- Participated in weekly requirement review sessions that monitored new requirements as they came in.
- Monitored feedback items to check for potential issues and document them daily.
- Follow up on resolution of any open items or issues, especially related to reliability issues.
- Working with business units to coordinate data scope and format requirements.
- Providing production support for bug fixes and enhancements.
- Defining data and reporting requirements for new projects obtained from business and technical leads.
- Facilitated smooth transition of the project from the project environment to the live environment.
- Worked with QA lead in validating Test Plan and Test Scenarios.
- Assisted Business User during deployment in formulating User Acceptance Testing (UAT) for customized application and getting confirmation for product release.

ZOVIL TECHNOLOGIES | CHENNAI, INDIA | JAN 2017 – JULY 2018

Jr. Data/Business Analyst

- Developed database objects such as **tables, views, Indexes, stored procedures** based on with business logics to reduce database complexities for Adhoc reporting.
- Gathered requirement using one on one interview, document analysis and introspection methods.
- Provided user requirements analysis and programming support for enhancement of Web applications.
- Was involved in creating the Project Initiation document (PID), Project charters and project planning document.
- Was responsible for **Cost benefit analysis, Risk assessment, and SWOT analysis**.
- Performed Tableau type conversion functions when connected to relational data sources.
- Conducted GAP Analysis by understanding the AS-IS business process and TO-BE business process.
- Generated various reports with drilldowns, calculated members, summaries, dropdowns from the cubes by connecting to analysis server from SSRS.

Orbit Analytics, Hyderabad. | May 2015 – Dec 2016

Business Analyst.

- Managed the configuration of the application to meet a user's requirements using the Microsoft Dynamics GP.
- Configured and deployed Microsoft solutions, specifically on SQL platforms (including GL, AP, AR, payroll, inventory, order entry, HR, and purchasing modules). Managed GP SQL table structure knowledge.
- Served as a liaison between users, the IT department, and accounting to resolve software implementation and issue resolution. Resolved malfunctions with systems and programs through troubleshooting.
- Advised users on the optimal accounting software configuration and related accounting procedures to meet financial reporting and analysis needs. Provided user support for multiple teams at GMS IT for dynamics GP.
- Worked with the accounting team to provide support for users in CYMA.
- Performed software implementations for users from project planning to system "go-live," including software training for accounting and operational client personnel. Resolved user software technical and operational issues through support.

EDUCATION

Bachelors in Information Technology RGPV 2015

Masters in University of Houston -2020

CERTIFICATIONS

- Machine Learning with Big Data | Oracle PL/SQL 1Z0-144 | Microsoft Querying Data with Transact SQL70-761
