Citizenship: Yes

Federal Experience: Administrative Office of the US Courts, DoD, DHS

Work Experience

Lead Mobile Developer

AMERICAN MOBILE SOLUTIONS LLC - Pittsburgh, PA

March 2019 to Present

- Lead domestic and offshore teams in C2C development.
- Lead the design and implementation of an AI-powered recommendation engine, resulting in a 40% increase in user engagement.
- Pioneered the use of Swift and OpenAI for seamless AI model integration into existing app infrastructure.
- Develop social network “bank” app and develop critical strategy to grow audience by 2MM users within months of engagement.

Technical Administrator

Department of Defense, Department of Homeland Security - Washington, DC

January 2017 to March 2019

- Lead modernization of legacy DoD systems, enhancing functionality and security of DOEHRs.
- Acted as a key technical advisor, providing strategic guidance and insights to decision makers.
- Overhauled development, IT, and DevOps processes, streamlining workflows and improving efficiency.
- Facilitated critical collaboration sessions between federal employees and contractors, ensuring alignment of objectives and efficient project execution

Lead Mobile Developer

Administrative Offices of the US Courts

September 2010 to March 2016

- Design, implement, and deploy PACTS Mobile, critical management system for law enforcement.
- Manage and coordinate remote team members with the core PACTS team.
- Devise business implementation that optimizes workflow for over 5000 probation officers in all 94 districts, saving the federal government millions in operational inefficiencies each year.

Mobile Developer

CODEFUTURES - Pittsburgh, PA

February 2010 to September 2010

Developed UI modules for the BlackBerry port of an iOS application. Helped team become familiar with the capabilities and limitations of the BlackBerry platform.

Education

Bachelors of Science in Game/Simulation

Full Sail University - Winter Park, FL

2006

Skills

Awards

AT&T Government Hackathon

2017

Won Best Overall App and IBM Excellence Award for FireSense, a system that enables firefighters to reach their destination faster by clearing their route via traffic lights, and that protects them once inside the building by providing an AR HUD that provides location and hazard information. <http://tinyurl.com/y8k56tfs>

RevoltDC Hackathon

2013

Won \$1000 category prize as a team with another developer for developing an app that makes excellent use of social media, grassroots organization, fundraising and use of big data. That concept is currently being developed into a full app and accompanying service that will be distributed nationwide.

Verizon's Apply Your Ideas

2009

Semi-finalist in the Guide category with the DealAtlas app, a Blackberry application that provided special offers from physical retailers based on the user's location.

Additional Information

Focused and highly motivated IT professional with 10+ years of experience using mobile technology to provide low cost solutions in the federal and private markets. Having extensive experience in full stack development, I am acutely aware of the potential that technology holds for the United States government, as well as its implementation. I specialize in designing data driven solutions that are easily consumed by client users.
