SUMMARY

- 2x Certified and Results-driven, experienced Project Manager and Business Analyst with over 14+ years of industry experience serving clients in industries like retail, life sciences, healthcare, public sector, travel and CPG.
- Thorough understanding and implementation of methodologies like Waterfall, Scrum-Waterfall Hybrid, and Agile in varied domains.
- Excellent Interpersonal, Communicational, Organizational and Management skills
- Deep expertise in analyzing analytic and data science business use cases and in converting business speak to technical speak and vice versa.
- Experience with Software Development Life Cycle (SDLC) that included Requirement Elicitation, Gathering, Analysis, Design & Development and change management. Proficient in organizing, conducting and facilitating elicitation sessions with stakeholders such as survey/questionnaires, Interviews, Brainstorming, Focus group, IDIs, Requirement workshops, prototyping, Interface analysis, and Document analysis.
- Created and understanding Business Requirements documents (BRD), Design documents, Use-Case Specifications and System Requirements Specifications (SRS) accompanied by active participation in discovery sessions, interviews, document-reviews with customers.
- Conducted SWOT, PEST, PESTLE, Cost benefit analysis, Root cause Analysis, Interface Analysis, Feasibility study, ROI Analysis, Impact analysis, Risk Analysis, and As-Is and To-Be business analysis.
- Elicited requirements using techniques like Interviews, Brainstorming, Focus Group, Document Analysis, JAD sessions, Survey/Questionnaires and documented Business Requirements Documents (BRD), System Requirements Specifications (SRS), and Functional Specification Document (FSD).
- Expert in Agile Scrum and Waterfall methodologies, specifically related to migration to new methodologies and business process change
- Good command over the complete software and process testing life cycle Functional and Design consultant for the BPR, organizational process design and modelling in roles of Project / Program Manager and Strategy consultant

- Proficient in using SQL across a variety of traditional and big data systems such as SQL Server Management Studio, R Studio SQL and Cosmos Scope Studio SQL.
- Power User of Microsoft Power BI in BI analytics and reporting.
- Expertise in using MS Visio and Micro in wire framing and prototyping for helping facilitate building of applications.
- Expert in ideating solutions for given business problems by doing comparisons of approaches given multiple alternatives.
- A proactive, empathetic and dedicated team player, with proven track record in producing high quality work under tight deadlines and multi-tasking to meet business goals.
- Excellent Analytical, Problem solving, Communication and Documentation skills. Dedicated & Self-motivated, proven leadership capabilities and Time management skills. Communicated effectively across company contacts and clients, internal team about the project requirements, schedules and launches.

TECHNICAL SKILLS

Programming Language	HTML5, CSS3
Project Management Tools	MS Teams, MS Office Suite, MS Project, MS Outlook
UML Tools	Argo, Eclipse
Test Cases	MS Word, MS Excel,
Databases	MySQL, SSRS
Requirements Tools	Rational team Doors, Rally
Methodologies	Agile/Scrum, Waterfall
Operating system	Windows 10, Mac OS

EXPERIENCE

Bank of America, Portland OR
Sr. Business Analyst/Project Manager

Aug 2022 - Till Date

Responsibilities:

- Gather requirements for implementing Adobe Business Analytics from business units and translate those to developers and database analysts.
- Glean business needs from business requirements documents and design documents in the context of helping building analytic solutions for clients.
- Facilitate conversion of business requirements to technical analytic requirements.
- Oversee the entire project planning, stakeholder management and client engagement for projects across all pods. For products – Microsoft Power Platform (Power BI, Power Apps and Power Automate), Microsoft Dynamics and the Independent Software Vendor Marketplace.
- Regularly performed risk identification and risk mitigation for all projects throughout the sprint including proposing and implementing solutions.
- Developed test plans and coordinated all QA and User Acceptance testing for projects and programs.
- Provided status reports with the project team to track progress against plan.
- Organized workshops with Subject Matter Experts (SME) to obtain domain level information.

- Data mapping, logical data modelling, created ER diagrams and used SQL to query and create datasets from Microsoft SQL Server Management Studio and the Cosmos Scope Studio Big data systems.
- Ensured compliance with the European Union Data Boundary framework to ascertain that EU and non-EU data processing was being done in two different cluster environments.
- Provided inputs to the project or program effort and cost estimation.
- Led and carried out UAT for all test cases including socializing with stakeholders.
- Continuously monitored scope creep at all stages of all projects and ensured that milestones were met within given timelines.
- Led weekly calls with clients to socialize intermittent analyses results with them and sought feedback.
- Led data exploration initiatives as per client requirements and queried streaming telemetry data to gather and build datasets.
- Oversaw data governance for the entire team by ensuring compliance with laid down privacy and security guidelines.
- Presented monthly insights to clients based on analyses carried out by data analysts.
- Engaged with the data engineering team frequently to ensure that relevant data wikis were regularly updated and maintained as per documentation guidelines.
- Regularly perused data streams pertaining to key engagement, outcome and other KPIs to ensure that definitions were in alignment with product engineering teams.

Environment: UAT, QA, Power BI data analysts, SME, SQL

Kroger, Columbus OH
Business Analyst/Project Manager

Aug 2018 – June 2022

Responsibilities

- Owned the entire portfolio of work around business analysis, project management and research.
- Maintained and led all projects that involved developing and distributing surveys to capture stakeholder feedback.
- Used Agile process to handle multiple projects concurrently with different deadlines.
- Planned sprints at the beginning of the month with team leads, supporting analysts and product owners.
- Used Visio to develop Use Case diagrams, Activity Diagrams and Sequence Diagrams.
- Analyzed and discussed the business and functional requirements for the application under construction.
- Developed test plans and test cases.
- Set up meetings, conducted Walkthroughs, JAD sessions with Management, SMEs (Subject Matter Experts), vendors, users and other stakeholders to resolve open and pending issues.
- Performed Gap analysis by identifying existing technologies and documenting to meet the end state requirements.
- Converted business questions into analytic questions and converted analytic insights into business insights.
- Understood both technical designs and specifications, analyzed and documented the required data and information.
- Collected and consolidated cross-team status for delivery to stakeholders and executive management.
- Assisted in overall program/project planning and ensure cross-team dependencies are well-understood and modeled in project plans and timelines.
- Created monthly product backlogs to ensure a healthy docket of work and ensure stakeholder visibility into the same.

- Maintained relevant metrics that guide the development team to more efficient processes in their work and in satisfying their product owners and stakeholders.
- Worked with internal and external clients to solicit requirements around research and analytic projects, developed plans of action, execution and delivery plans.
- Conducted knowledge sharing sessions with developers and data analysts to help with deployment of solutions as applications for customer use.
- Functioned as a liaison among technology teams, support teams, and business units.
- Facilitating discussion, decision making, and conflict resolution. Assisting with internal and external communication, improving transparency, and radiating information.
- Tracked people, product, and process risks across the spectrum of projects and ensured that mitigation mechanisms were in place so as to reduce or eliminate any impact on actual delivery.
- Planned and led UAT with stakeholders including socializing solutions with customers.

Environment: JAD sessions, Use Case diagrams, Gap analysis

Vanguard, Charlotte NC
Business Analyst

Nov 2016 – July 2018

Responsibilities

- Collaborate with stakeholders to gather, document, and prioritize business requirements for software development and system enhancements (Adobe Analytics) .
- Used MS Visio for Process modeling, Process mapping and Business Process flow diagrams.
- Analyzed existing business processes to identify inefficiencies, bottlenecks, and areas for improvement.
- Prepared Business Requirement Document (BRD) and assisted in the preparation of System Requirement Specification (SRS). Analyzed, modified and validated these documents from the requirements gathered.
- Create detailed functional specifications, user stories, and use cases that outline the required features and functionality of software applications.
- Developed Conceptual and Logical ER diagrams for the database. Created Data Dictionary for the data models. Identified Source systems for financial data profiling of the legacy system to be moved into target systems.
- Performed Data Mining to find correlation and pattern in existing data and constructed SQL queries.
- Assisted in the implementation of Integrated Data Warehouse with individual data marts to address areas of business interest.
- Worked closely with Project Manager for any change request and helped SMEs do Impact Analysis.
- Designed and developed all Use Cases, Activity diagrams and UML models using tools such as MS Visio.
- Maintained accurate and well-organized documentation of business requirements, ensuring clarity and traceability throughout the project lifecycle.
- Acted as a bridge between business users and development teams, ensuring clear communication and understanding of project goals, scope, and expectations.
- Evaluate the technical feasibility of proposed solutions and assess potential risks and impacts on existing systems.
- Analyze data to identify trends, patterns, and insights that inform decision-making and drive business process improvements.

- Developed UAT plans, coordinate testing efforts, and work with stakeholders to ensure that developed solutions meet business requirements and user needs.
- Facilitated change management activities, including user training and communication, to ensure successful adoption of new systems and processes.
- Collaborated with technical teams to translate business requirements into technical specifications, ensuring accurate implementation of desired functionality.
- Assisted in project planning, tracking, and reporting, ensuring projects are delivered on time and within scope.
- Proactively identified opportunities for process optimization, recommend solutions, and contribute to the organization's ongoing improvement initiatives.

Environment: User stories, and use cases, UML models, MS Visio, BRD, SRS,

XtraNet Technologies Pvt Ltd.
Business Analyst

Dec 2009 - Oct 2016

Responsibilities

- Core business process and company strategies.
- Conducting business meetings and accessed financial and business performance.
- Nurturing Client base and worked tirelessly, providing excellent logistic service to the clients.
- Contributed creatively in strategic planning of the firm and its implementation.
- Constantly working at **communicating, delegating, negotiating, resolving** conflict with respect to the employees.
