<https://docs.google.com/document/d/19oc0zeVjFRIQ8NfNRnmNfP1LOqTTsKGwx2n3L6zoukl/edit?usp=sharing>

- Mobile visionary with regard to long-term technical/business direction
- Sr. Mobile Lead on flagship app generating millions of dollars
- <https://www.linkedin.com/pub/nader-ahmed/70/587/b65>
- Excellent communication, leadership and interpersonal skills
- 6 years EHR mobile app experience - in feature parity with Epic MyChart

Work Experience

Lead Mobile Developer(Android/iOS)

SoberGrid.com

March 2020 to Present

Android / iOS:

- Built compelling in-app experiences that reached millions of users globally
 - Responsible to ensure that all aspects of the native applications and their integration with back-end services are sound
 - Continue to bring new and innovative content and features to customers
 - Experience in shipping quickly and often - monthly releases
 - Deep experience in conceptualizing and formulating apps that are suitable for use on all types of Android/iOS devices
 - Ensured that the construction and presentation of apps are congruent with the company's standards
 - Performs programming, testing, and debugging of applications or fixes to existing application
 - Interacts and coordinates deliverables with other technical groups in the organization
 - Recommended improvements to processes, technology, and interfaces that improve the effectiveness of the team
 - Responsible to ensure that all aspects of the native applications and their integration with back-end services are sound
 - Continue to bring new and innovative content and features to customers
 - Experience in shipping quickly and often - monthly releases
 - Good experience with Kotlin, JetPack, Dagger2, rxJava2, Retrofit2, MVVM, Firebase, WebView, WebKit, Jet Pack Navigation, Safe Args, Compose, RIBS, Leak Canary, LiveData, Room DB
 - Deep knowledge on working with 3rd Party libraries, Mobile Analytics, Zen Desk, Unit Testing, Mockito, App/Play store distribution
- Stripe Payments

- End to end ownership of product deliverables
- Experience with IoT/WiFi / Bluetooth(BLE) connection with medical devices
- Proficient in both Objective-C and Swift - comfortable using both within a single project
- Proficient with XCode, Alamofire, CocoaPods, URL Session, Core Data, SDK API, Apple Developer Documentation

Documentation

- Experience building and testing large-scale iOS apps
- Collaborated with multiple teams as well as offshore to provide mobile solutions
- Some experience with React Native

Flutter:

- Created multi-platform apps for iOS and Android using Google's Flutter development framework
- Worked with a team of developers to build and deploy Flutter apps, worked in the development environment maintenance, and technical detailing
- Took designs and wireframes and produced high quality responsive UI Code
- Created Flutter components within an native iOS app
- Good experience in the Provider state management of Flutter application development
- Used Flutter packages to consume/process data from RESTful APIs and display the information in various UI layouts
- Good use of Flutter Streams, widgets to create highly interactive fluid UI layouts

Contract Android/iOS Developer

Clients: FullSpectrumSoftware.com, SwyftMobile.com - Experian.com

July 2016 to March 2020

EliteTransit.com

Android:

- Deep experience with Bluetooth(BLE) printing to Brother printers via Mobile apps
- I am a certified Agile Scrum Master - I participate in daily stand ups, retrospect and grooming sessions.
- Expert UI skills with Material Design(Navigation Drawer, CardView, RecyclerView) in showing detailed information, while providing UI views with the right blend of elevation, color, and font to give a professional look. Used Data Binding

Library to associate views with model(data)

- Solid understanding of techniques to achieve a high quality user experience
- Optimized apps for different screen sizes and pixel densities, so that Android OS will not have to scale the image to
- Using sensors, created an inclinometer which would calculate the slope, azimuth, latitude/longitude using WI-FI and

GPS

- Android and iOS projects worked on involved a thorny intersection of threading, networking, and latency issues, involving interactive high performance requirements

Sr. Mobile Developer

Elutions.com - Tampa

April 2015 to July 2016

- Designed powerful, yet easy-to-use Android applications with effective navigation and screen grouping patterns which goes beyond the simplistic design. I created activities - each with a flow of fragments and solved design problems by making good use of the backstack. I was involved at every project phase, from concept to app store deployment
- Experience with GCM / Push Notifications(PN) / Pending Intents and "deep linking". Custom designed different PNs sent to phone according to specs

- Created apps which adhere to Google's Design Principles and UI recommendations
- Utilized the following technologies: Retrofit2, SQLite, Camera, GSON, Facebook SDK, Maps, Dagger2 and Twitter SDK
- Experience in Android performance and memory issues using Traceview, DDMS, Device Monitor, Eclipse MAT, and the Hierarchy Viewer
- Used Git to keep synchronized with team
- Experience with brainstorming, requirements gathering, design, coding, testing, and support
- Skills: Android Studio / Eclipse, Java, WEB SERVICES / XML, JSON, Security, JUnit, SSL, TDD, Gradle, ADB, Sketch 3, RxJava2, Butterknife, Mockito, Azure, Instrumented Tests, VSTS, JIRA

iOS Developer

Android - FreeLancer.com

March 2013 to March 2015

- Excellent experience with Android Pie Charts and Fully Customized Views by creating my own implementation for onDraw(), onMeasure() and onLayout() to adapt to different screen sizes
- Experience with Activity-Fragment / Fragment-fragment communication
- Intensive use of Fragment Pagers, List Fragments, custom row layouts, Multithreading, Navigation Drawer, and Master→ Details Flow Pattern.
- Extensive experience with iOS/Objective-C UI development and backend
- App to app communication through Bound Services

Software Support Engineer (Mobile)

VSP - VSP.com

March 2009 to March 2015

- I started developing apps for Android/iOS in addition to my routine tasks of providing support to Healthcare software
- Collaborate with technical staff and end users to understand and troubleshoot platform issues and develop solutions
- Conducted Quality Assurance testing and data validation of website and mobile applications to ensure parity
- Extensive experience with the roll-out of product releases
- Assisted in the assessment of performance of mobile applications

Software Programmer/Analyst

Microsoft - Caterpillar.com

March 2005 to March 2008

- Worked closely with collaborative engineering teams to deliver technical solutions
- Designed and wrote software(C,VB,SQL) technical specifications
- Define, execute and interpret Microsoft SQL Server and Oracle queries

Education

Bachelor's Degree

Bradley University - Peoria, IL
