Open for relocation

SUMMARY

- **7 years of experience in Analysis, Design, Development of Reports and Dashboards using Power BI suite and Microsoft SQL Server in Development and Production Environment.**
- **Utilized Power BI for building dashboards and scorecards**, to display information required by different departments and upper-level management. Installed and configured on-premises gateway in Power BI services.
- Experience in publishing the **Power BI Desktop** models to Power BI Service to create highly informative dashboards collaborate using workspaces, content pack, apps, and get quick insights about datasets. Expert in developing **Data-Driven Subscription Reports** and setting securities for reports.
- **Automated Power BI Dashboards** by scheduling them timely and provided **continued maintenance and development of bug fixes for the existing and new Power BI Reports**
- Strong Technical knowledge in **Microsoft SQL Server Development** including multiple Data Warehouses and Data Marts, Reporting using SQL Server Reporting Services, **Dashboards using Power BI**, designing logical/ Physical databases in Data related projects.
- Expert knowledge in writing complex SQL queries and strong experience in creating SQL server objects like views, indexes, functions, cursors, and working with DDL and DML statements.
- Strong understanding of Dimensional Modeling technique, Multi-Dimensional Database Schemas like **Star Schema, Snowflake Schema, Fact Tables, Dimensional tables**, and granularity of dimensions
- Expertise on Extract, Transform and Load (ETL) process using Microsoft SQL Server Integration Service (SSIS) package in enhancing and deploying the SSIS Packages from development server to production server
- Extensive experience integrating, migrating, converting, and cleaning data using SSIS and T-SQL commands. Expertise in designing reports using various tools like **SQL Server Reporting Services (SSRS), Power BI, and Microsoft Access/Excel spreadsheet.**
- Experience in building the **Azure Cloud Databases and transferring data to Azure using SSIS.**
- Daily support of system-wide replication tasks including monitoring, alerting, and problem resolution.
- Extensive use of DAX (Data Analysis Expressions) functions in **creating Power BI dashboards**, reports, and Tabular Models. Experience in using variables, expressions, and functions and defining Query for generating drill-down reports in **SSRS.**
- Hands-on experience in designing and developing various dashboards, reports utilizing various **Tableau Visualizations like Dual Axis, Bar Graphs, Scatter Plots, Pie-Charts, Heat Maps, Bubble Charts, Tree Maps, Funnel Charts, Box Plots, Waterfall Charts, and Geographic Visualization.**

SKILLS

- **Programming Languages:** Python (Pandas, NumPy, Scikit-Learn, Selenium, OpenCV, PyTorch, TensorFlow), R, SQL, Excel, VBA, Salesforce, MATLAB, Hive, Java, C, C++
- **Data Visualization and BI Tools:** Tableau, PowerBI, R Shiny, QlikView
- **Analytical Skills:** Business Intelligence, Data Modeling, Machine Learning (Linear Regression, Regularization, Kmeans Clustering, Random Forest, Decision Trees, Gradient Boost, Extreme Gradient Boost), Time Series Forecasting (ARMA, ARIMA, SARIMA, Holt Winters, Simple Exponential Smoothing), NLP (TF-IDF, LDA Topic Modeling, Sentiment Analysis), Deep Learning

PROFESSIONAL EXPERIENCE

Elevance Health(Anthem) New York City – NY

May 2021 – Present

DATA ANALYST

Responsibilities:

- Preemption of calls utilizing XGBoost Classification Algorithm which predicts the probability of a member calling regarding an issue based on 200 parameter with a success rate of 68%.
- Delivered an interactive Member and Claims Analytics Dashboard using Tableau to track KPIs such as Active Members, Member Inquiries. Claims related to the member, Avg Cost Share.
- Led business intelligence analysis by creating reverse ETL pipelines to notify members through Digital Channels and help them with the issue before a call is made by the member.
- Designed Digital Channel analytics to track the various drop off points across the funnel and provided insights to reduce the drop offs by 10% monthly.
- Created SQL queries for pulling Sales and Dispensing data for report. Explored available metrics and joined to generate the required report.
- Migrated data sources from Hadoop to Snowflake to boost the speed of the refresh of the dashboards by 90% enabling all teams to have faster access to data when needed.
- Developed a unified experience score (UES) utilizing various customer happiness measures by using weighted averages for Elevance Health Members.
- Developed PowerBI reports and Dashboard that hosts various operations report by visualizing data in different form of visuals like Column chart, Bar chart, Map visuals, Tables, Line charts etc. and published in PowerBI

Wayfair, Boston - Massachusetts

Sept 2018 – April 2021

DATA ANALYST

Responsibilities:

- Improved the Employee Engagement Rate by analyzing data from Employee Engagement survey using Linear Regression, Favorability Analysis and LDA Topic Modeling in Python by 15% over 3 months.
- Designed the Recruiter Performance Dashboard using Tableau to track KPIs such as Time to Fill, Conversion Rate and Sourcing Efficiency which was used as a rating tool in Wayfair Summer Performance Cycle.
- Led business intelligence analysis by building SQL queries to analyze data & solve errors in greenhouse, referral sources in scripts and other complex business problems.
- Drove continuous improvement and efficiency by identifying opportunities to automate manual processes using Python thereby reducing the human effort by 7 hours each Monday.
- Boosted the speed of TA Dashboard using Excel VBA (over 30 filters and 10 slicers) by 50% which enabled recruiters to access data faster.

PureEV, INDIA

July 2016 – August 2018

DATA ANALYST

Responsibilities:

- Managed inventory purchase orders worth 150,000\$ to fulfill inventory gap on a monthly basis.
- Built SQL scripts to calculate the item level forecast bias by extracting the lost sales and historical forecasts for the desired time frame by giving a view into forecasts of different lags during that period.
- Created analytics for the Inventory team by building a Monthly KPI dashboard using SQL and PowerBI which aided in making strategic decisions for sales & operations.
- Independently developed several operational reports through advanced Excel functions that are distributed weekly to various suppliers.

EDUCATION

University of Illinois at Chicago (UIC)

Master of Science (MS) in Business Analytics

Chicago, IL

The NorthCap University

Bachelor of Technology (BTECH) in Electronics and Communication Engineering

Gurgaon, India

May 2016
