

Yangyuqi (Olive) Chang

✉ ochang2023@gmail.com ☎ +1 6174108008 📍 Durham, NC, USA in yangyuqi-chang

PROFILE

Experienced Data Analyst passionate about applying data analyzation skills in driving meaningful change. Skilled in using data to guide crucial business decisions, with strong proficiency of SQL, Python, and data visualization. Mastery of interpreting complex data sets to generate actionable insights, with strong communication and collaboration abilities in dynamic settings.

SKILLS

Programming: Python (Pandas, NumPy, Matplotlib), SQL, R, C++, Java, JavaScript, CSS,
Data Visualization: Tableau, PowerBI, Excel,
Database/Cloud: PostgreSQL, MongoDB, Google Cloud Platform, AWS S3, Azure,
Tools: Git, Kubernetes, PyCharm, Figma, Jira, MySQL, Snowflake, RESTful APIs

PROFESSIONAL EXPERIENCE

Honda Aircraft Company, *Data Management Engineer*

Jan 2021 – Jun 2023 | Greensboro, NC

DATA VALIDATION, CLEANING AND VISUALIZATION

- Implemented an optimized ETL pipeline to clean data, reducing processing time by 50% through filtering and storing detailed model functions using Python.
- Stress tested historical data reports by using Power Query; initiated a new version of Python script (upgraded from Matlab) to generate reports, shortening report generation lead time from 30 min to 3 min and prevented report generation failure.
- Designed a Power-BI metrics report to monitor the throughput of aircraft engineering deliverables, enabling 30+ engineering and leadership teams to quickly identify and repair bottlenecks.

SYSTEM DESIGN

- Merged aircraft issue-related data from SAP, JIRA and Garmin systems into Teamcenter to provide a more comprehensive and integrated view of the aircraft issues, consolidating enhanced data analysis capabilities, resulting in a 20% reduction in issue resolution time, a 15% improvement in overall aircraft performance, and a 30% increase in data accuracy for more effective decision-making.
- Facilitated effective communication between the IT and Data Management departments, ensuring the identification of precise product requirements essential for system development.
- Managed comprehensive system training for the engineering team, overseeing the creation of training videos, guiding through system functionalities, facilitating hands-on practice sessions, and conducting follow-ups for seamless onboarding and adoption of the system across the engineering team.
- Developed an exhaustive test plan and executed 800 stress tests, encompassing extreme corner cases, to thoroughly quality assess system features prior to its launch.

PROJECTS

Game Data Analyst

Aug 2023 – present

- Deep dived into 500 player behavior and personas records and uncovered hidden trends and patterns, built a predictive churn model that identified at-risk players with 90% accuracy.
- Designed the dashboard that updates real-time data to foster cross-functional collaboration among 3 game developer and engineer teams.
- Crafted data-centric retention strategies and delivered actionable insights to game developers, resulting in a substantial 25% reduction in player churn. Additionally, these strategies significantly increased player retention and engagement by an impressive 5%.

EDUCATION

Northeastern University, *MS: Game Science And Design*

Sep 2018 – May 2020 | Boston, MA

Penn State University, *BS: Information Science and Technology*

Aug 2013 – May 2017 | University Park, PA

Penn State University, *BS: Security Risk and Analysis*

Aug 2013 – May 2017 | University Park, PA
