

Samhitha

samhitha533@gmail.com | +1 8606404046

PROFESSIONAL SUMMARY:

- 8+ years of hands-on experience as **Senior Data analyst** with excellent skills in analyzing **healthcare data** by using **SQL server, power BI, Tableau** and **Microsoft excel**.
- Worked on **Cerner** applications **Citrix Workspace, Relay** and **Health quest** for claims processing and medical billing in **uniform billing (UB04)** and **CMS (1500)**.
- Strong knowledge of managed claims management process, Knowledge of Medicaid, and Medicare Services. CMS, Health Assessment Systems, **HL7 Standards, HIPAA, PPACA (Patient Protection and Affordable Care Act), Compliance issues, LOINC and SNOMED Mapping, HL7 Message Validation, ICD 9, Electronic Health Records, Electronic Medical Records**.
- Analyzing input **FHIR resource files** and have performed **mapping FHIR resources** to output data domain flat files and worked on FHIR resource validation.
- **Created C - CDA** to Confidential parsing models and created Testing and Validation tools for Initiate Master Patient Index integration.
- Proven record of hands-on leadership and guidance across the wide range of **Medical Devices, Pharmaceutical and Biotechnology products** as well as exceptional skills in building a **quality team, project management**, planning and on time completion of tasks, with strong hands-on technical capability.
- Worked in Epic clinical applications and handled **EMR, EHR** and **Epic ambulatory services**.
- Worked with 12 different insurance companies and was Proficient in **Medicare billing** and **confidential billing**.
- Experienced working on **EDI Transactions** (835,837,270,271,820,277,278).
- Experienced in **EDI testing** with good understanding of quality assurance and methodologies.
- Knowledge and experience in **EDI data mapping** and **migration**.
- Experienced organizing and attending **JAD sessions** with SME's, project manager, developers, and end users to elicit and analyze the **business requirements, functional** and **non-functional requirements**.
- Worked in the MS office and created **Use cases, Use cases diagrams, sequence diagrams, Activity Diagrams and class diagrams**.
- Expertise in various types of **SDLC** (software development life cycle) like **waterfall** and **Agile** methodologies.
- Created and maintained **data dictionary, data mapping**, data requirement documents.
- Excellent knowledge in **Data Analysis, Data Validation, Data Cleansing, Data Verification** and identifying data mismatches.
- Used **ETL tools for data migration** from cloud databases such as **AWS, GCP, Azure cloud** to traditional databases.
- Worked with a variety of tools (ex; **SQL Server, My SQL, oracle SQL, Access, Excel, Tableau, Power BI, Visio**, etc.) to access data and write queries, run reports, manipulate, and analyze large datasets.
- Applied knowledge of SQL table joins, **DDL, DML, PIVOTS** views, constraints, and functions to **SQL server**.
- Worked on **Data bricks** for data extraction, transformation and analyzing the data.
- Worked with **Azure data bricks** to speed up the preparation of high-quality data.
- Worked on Migrating **Teradata** elements into a snowflake environment.
- Performed data analysis and data profiling using complex SQL on various source systems including **Oracle and Teradata**.
- Excellent experience on **Teradata SQL queries, Teradata Indexes, Utilities such as M-load, T-pump, Fast load, and Fast export**.
- Created database, schema, tables using **snowflake** schema and migrated multistate level data from SQL server to snowflake.

- Maintained knowledge in designing **star schema** and **snowflake schema** for data modeling and created user stories using the **JIRA tool**.
- Skilled in data manipulation and generating customized reports with SAS data steps and procedures and have experience in handling large amounts of data for **Data Cleansing, Data Profiling and Data Scrubbing**.
- Gathered User Requirements and designed **Source to Target data** load specifications based on business rules.
- Performed risk management activities using **Failure Mode Effect Analysis (FMEA)** techniques to identify potential failure modes on **pharmaceutical and medical device manufacturing equipment**.
- Worked on applications hosted on **AWS and Azure cloud environments** and have good conceptual knowledge of **cloud-based tools**.
- Developed **tableau visualizations** using the patient data to create reports and dashboards using tableau.
- Experience in design and development of various dashboards, reports utilizing Tableau Visualizations like **Dual Axis, Bar Graphs, Pie-Charts, Heat Maps, Bubble Charts, Tree Maps, Funnel Charts, Box Plots, Waterfall Charts, Geographic Visualization** and other making use of actions, other local and global filters according to the end user requirement.
- Extensive experience in creating Calculations (Hide Columns, Creating/using Parameters, Table Calculations, Totals) and Formatting (Annotations, Layout Containers, Mark Labels, Marks Card Changes, **Rich Text Formatting**.) using **Tableau Desktop**.

TECHNICAL SKILLS:

- **Computer Skills:** Data visualization, Data Cleaning, Data Mining, Data Warehouse, Microsoft Office (Access, Word, Excel, Power point, Visio), Cerner Applications such as Citrix workspace, Health Quest, Relay, Microsoft teams, problem solving and analytical abilities.
- **Analysis Tools:** My SQL, SQL server, Oracle, Tableau Desktop, MS-Excel, Power BI, R Studio, Spreadsheets, Microsoft Azure, Visio.
- **Languages:** SQL, R, SAS, Oracle SQL, XML.
- **Cloud services skills:** AWS, Google Cloud Platform (GCP), Microsoft Azure and Data Bricks.
- **Tools:** Git, JIRA, Informatica.
- **Databases:** Oracle, MS Access, SQL.
- **Operating systems:** Windows, LINUX, Mac OS, UNIX and DB2.
- **Expertise:** Strategic application of IT in healthcare, Advanced Healthcare Data Analytics, Electronic healthcare records, Information Analysis and System Design, Database Design and oracle, Evidence based Practice, Clinical and Business intelligence, Healthcare Operations, Population Health, Convergence of Healthcare and information technology and legal aspects of healthcare IT.

EDUCATION

Masters in Engineering Science, SUNY Buffalo, USA.

B. Tech in Biotechnology, KL University, India.

PROFESSIONAL EXPERIENCE:

Centene, Connecticut, US

Jun 2021 - Present

Senior Data Analyst

Project Name: E-Health System

Responsibilities:

- Collected and organized large amounts of **pharmaceutical data** and healthcare data from various sources.
- Cleaned the processing pharmaceutical data to check accuracy and completeness.
- Analyzed the data using **statistical techniques** and created meaningful insights and visualizations.
- Worked on trends, patterns, and relationships in the data to support decision-making by healthcare providers and administrators.
- Ensured compliance with healthcare data standards and regulations, including **HIPAA** and **HITECH**.
- Developed **predictive models** and algorithms to support personalized patient care.
- Worked with healthcare professionals, IT teams, and other stakeholders in a clear and concise manner.
- Worked on data security to ensure privacy relevant to regulations and standards.
- Designed reports and dashboards for use by program managers and external stakeholders by using **tableau**.
- Maintained excel workbooks, such as development of pivot tables exporting data from external **SQL databases**, producing reports and updating spreadsheet information.
- Segregated the data in tableau by creating **calculated fields** for more accurate creation of dashboards and reports.
- Merged data from **SQL server** into tableau to create reports for presentation.
- Experienced agile methodologies, development models and processes and wrote **Business required documents (BRD)**.
- Experienced creating **star schema** and **snowflake schema** and ETL processes.
- Implemented snowflake schema to ensure no redundancy in the database.
- Worked closely with technical teams to assess **data migration** requirements from **Oracle DB** to **Google cloud platform** (GCP) following ETL process.
- Analyzing input **FHIR resource files** and have performed **mapping FHIR resources** to output data domain flat files and worked on FHIR resource validation.
- Created **power BI** dashboards for data visualizations and reports.
- Worked on a project by using **API interface** and understood business required documents for API and used programming languages such as **Python, Java and Java script** and developed custom scripts.
- Used **SQL joins and subqueries** to simplify complex queries involving multiple tables.
- Monitored and maintained **API integrations** for any issues or errors and worked to resolve them.
- Extracted the data from **API interface** and made it secure and compliant with relevant regulations.
- Experienced in creating and maintaining **data dictionaries** for multiple data sources, ensuring that data.
- Calculated and analyzed digital health data for provider incentive and supplemental benefit analysis using **Microsoft Access** and **Oracle SQL**.

Environment: SQL, GCP CLOUD, ORACLE DB, POWER BI, MS ACCESS, TABLEAU.

Elevance, New York, US
2019 – May 2021

Jan

Senior data analyst

Project Name: Claims Processing and Tracking System

Responsibilities:

- Analyzed healthcare claims data and identified trends and patterns, such as high-cost medical procedures and recommended cost saving measures.
- Conducted **Ad-hoc** analysis and provided recommendations to support **business requirements**.
- Developed and implemented a data management process that improved **data quality** and **data security**.
- Created dashboards and reports that allow tracking key metrics and performance indicators.
- Worked on industry trends, regulations and best practices in data analysis and data management.
- Worked closely with interpretation of large data sets that improved business operations.
- Analyzed claim appeals, approvals, denials and reimbursement guidelines.
- Created dashboards and reports for **Co-payment, deductible and Coinsurance** by using **Tableau**.
- Worked on Cerner Applications such as **Citrix workspace, health quest, relay** to access claims account server and claim processing.
- Involved in development of new insurance products and services to meet changing customer needs and market trends.
- Optimized code for efficiency and reuse for new **C-CDA interfaces**.
- Evaluated insurance policies and ensured that its appropriate and effective.
- Validated data according to **HIPAA, EDI, PHI** and **HITECH** regulatory standards.
- Extensively worked on **appeal filing limit** and **timely filing limit** for insurance billing.
- Verified **EDI X12 271**(eligibility response), **EDI 276** (claim status) and **EDI 834** (enrollment) for claims processing.
- Worked with providers to validate **EDI transaction sets**.
- Created EDI documents for **EDI maps** to generate requirement documents.
- Reviewed **SQL queries** to create tables, trends, pivots, and list reports.
- Worked on **API integration** and have good knowledge about data formats such as RESTful APIs, JSON and XML.
- Performed source to target **data mapping** by using **SQL**.
- Developed **tableau visualizations** using the patient data to create reports and dashboards using tableau.
- Designed several business intelligence dashboards reports using **power BI**.

Environment: MS-excel, MS- access, MY SQL, Cerner Applications, Tableau.

Novavax Pharma, Maryland, US

Feb

2017 – Dec 2018

Data Analyst

Project Name: Health Data Insights Platform

Responsibilities:

- Conducted in-depth analysis of healthcare data to identify trends, patterns, and relationships that are used for decision making.

- Worked with a cross-functional team including healthcare providers, administrators, and IT professionals to ensure that data is used effectively.
- Collected and analyzed health data from various sources, including patient surveys, and wearable devices.
- Conducted cost analysis to determine the financial impact of various healthcare and cost saving measures.
- Used **spreadsheets** to organize and manage the data, including creating pivot tables, charts, and graphs to summarize the data and identify trends.
- Used **Tableau** to visualize the data and present findings in an interactive and engaging format. Created dashboards, maps, and other interactive visualizations that help stakeholders understand the insights and predictions generated from the data.
- developed predictive models that can forecast patient outcomes based on demographic and clinical data by using **tableau**.
- perform statistical analysis, including regression analysis, hypothesis testing, and time-series analysis by using **MS-excel** and **spreadsheets**.
- Worked on statistical and machine learning techniques that were used for analyzing the data and identifying the patterns.

Environment: MS-excel, MS- access, MY SQL, Tableau, spreadsheets.

- Created custom calculations, measures and aggregations based on the data and performed complex calculations by using **Power BI**.
- Extensively worked with Business Partners, Statisticians, and key stakeholders to provide **SAS programming** for analyzing data as well as generating reports, tables and listings.
- Experience in Data extraction from several databases including Oracle, SQL Server and other external files using **SAS/Access**, **SAS/SQL** pass through facility, Lib name statements, and Proc Import procedure and via **SAS** Data steps.
- Good experience in Proc SQL joins and Proc SQL set operators to combine tables horizontally and vertically and proficient in Integration of various Data Sources like MS-Access, Flat and CSV Files.

Bio Haven Health, Connecticut, US
2015 – Jan 2017

Jan

Junior Data Analyst

Project Name: Patient Experience Evaluation Platform

Responsibilities:

- Collected and cleaned patient satisfaction data from various sources, such as surveys, interviews, and focus groups.
- Analyzed the data using statistical methods and data visualization techniques to identify patterns and trends in patient satisfaction. Identifying areas for improvement in the hospital's services and patient experience based on the data analysis.
- Presented findings and recommendations to relevant stakeholders, such as hospital administrators, physicians, and staff, to inform decision-making.
- Assisted with the implementation of recommendations, including the development of action plans and monitoring progress over time.
- Continuously monitored and evaluated patient satisfaction data to ensure that the hospital is making progress towards enhancing patient satisfaction.

- Collaborated with other team members, including hospital administrators, physicians, and staff, to ensure that patient satisfaction data is collected and analyzed effectively.
- Collected and organized patient organized data to create forms or surveys that can be distributed to patients by using **spreadsheets**.
- By using **MS- word** Created reports and presentations to share the findings and recommendations from the Patient Satisfaction Analysis project.
- Using **Excel** to clean and organize patient data and perform statistical data and create charts and graphs to visualize data.

Environment: MS-Excel, Spreadsheets, MS-word.
