Other Tools: Putty, WinSCP

Concepts: Incident Management, Change Management, RCA, Batch Monitoring, SLA Compliance

PROFESSIONAL EXPERIENCE

Senior Executive – Application Support

Motilal Oswal Financial Services Limited, Chennai

Jan 2025 – Jan 2026

- Monitored production systems during market hours ensuring zero downtime.
- Managed EOD and intraday batch jobs using Control-M & Epsilon.
- Handled P1/P2/P3 incidents via ServiceNow within SLA timelines.
- Performed DC-DR validation and supported DR drills.
- Coordinated with Dev, Infra, and Network teams during major incidents.
- Prepared detailed RCA reports and implemented preventive measures.

- Maintained 99.9% application availability during trading hours.
- Linux log analysis and SQL data validation.
- DR validation and quarterly failover drill support.

Achievement:

Ensured zero major outages during trading hours and reduced repeat incidents through proactive monitoring.

Junior Engineer – Production Support

NSEIT Limited, Chennai

Client: National Stock Exchange of India Limited

Oct 2021 – Dec 2024

- Supported Production & DR environments for critical trading applications.
- Managed incidents and change requests via ServiceNow.
- Validated Solace-based file replication between DC & DR.
- Supported BCP activities and DR failover testing.
- Executed SQL queries for validation and issue troubleshooting.
- Worked in 24/7 rotational shifts supporting mission-critical systems.
- Contributed to seamless DR drills with zero data loss.
- Monitoring critical batch jobs and system alerts.
- Solace message/file replication validation.
- DR failover and BCP testing support.

Achievement:

Successfully supported high-volume trading sessions and DR drills without operational impact.
