

SUMMARY:

- Highly skilled and results-oriented **.NET** Developer with over 3 years of hands-on experience designing and developing web applications using **ASP.NET, C#, MVC**, and **.NET** frameworks.
- Proficient in building secure, scalable, and high-performance solutions using technologies such as **ADO.NET, AngularJS, WCF**, and **Entity Framework**.
- Adept at working with front-end technologies like **JavaScript, jQuery, HTML5, CSS3**, and **Bootstrap** for building responsive and modern user interfaces.
- Extensive experience in working with **SQL** Server for database management and creating complex stored **procedures, views**, and **triggers**.
- Experienced in **Test-Driven Development** and have a good knowledge on **Domain-Driven Development**.
- Demonstrated success in collaborating with offshore teams, managing project tasks, and delivering high-quality solutions within tight deadlines.
- Solid experience in **service-oriented architecture (SOA)**, web services development, and integrating content management systems like Sitecore.

TECHNICAL SKILLS:

Languages	: C#, JavaScript, HTML5, CSS3, XML
Frameworks	: .NET Framework 2.0, 3.5, 4.0, 4.5, ASP.NET, ASP.NET MVC, Entity Framework, Razor, WPF, ADO.NET, LINQ
Web Technologies	: ASP.NET Web Forms, MVC, REST, SOAP, WCF, AJAX, JSON, Web Services
Front-End	: AngularJS, JavaScript, jQuery, Bootstrap, HTML5, CSS3, Telerik Kendo UI
Databases	: SQL Server 2005, SQL Server 2008 R2, T-SQL, PL/SQL
Tools	: Visual Studio, Team Foundation Server (TFS), Sitecore CMS, Tracking Portal, Smart Part
Version Control	: Git, Team Foundation Server (TFS)
Development	: WinForms, ASP.NET, SOA, Windows 2000, UNIX/Linux
Platforms	
Other	: IIS, Sitecore CMS, SSIS, SSRS, SOA, Multithreading, Razor, HTTP/2, JSON, WCF, Service-Oriented Architecture (SOA), WinForms, Jenkins, Azure.

EXPERIENCE

Client: Comcast (Remote)

Jan 2023 – Present

Role: .NET Developer

Responsibilities:

- Actively Involved in analyzing business requirements and engaging with business users.
- Contributed to the enhancement of existing systems based on business needs, including database design and system analysis.
- Built the front-end using **ASP.NET 4.5, JavaScript**, and **AJAX**, while implementing business logic with **C#**.
- Designed and developed web architectures and protocols, including detailed knowledge of **HTTP, REST**, and **SOAP** services, as well as **HTML5, CSS3**, and **JavaScript**.
- Integrated **JSON** data within an **AngularJS** service and managed JSON data responses from an **ASP.NET** controller.

- Developed and utilized **WCF** Web Services to expose application functionalities for internal and external applications, implementing a **Service-Oriented Architecture (SOA)**.
- Documented WCF service examples and managed the migration of web services to WCF.
- Implemented basic and advanced search functionalities to populate list views across various modules.
- Applied **Service-Oriented Architecture (SOA)** in the development of a manager call tracking module.
- Utilized **ADO.NET** for database access.
- Created and managed complex database objects such as stored **procedures, functions, packages, and triggers** using **SQL Server**.
- Developed and consumed **WCF** Web Services for data transfer purposes.
- Employed **.NET 3.5 LINQ** components in the data layer.
- Used **LINQ** to Entities for efficient and timely data retrieval.
- Utilized **Jenkins** for continuous integration and deployment, handled version control, labeled versions, and backed up source code using **Git**. Managed production incidents from detection to resolution, ensuring minimal downtime and minimal impact on business operations.
- Designed and maintained an **Admin Page** for centralized application management.
- Managed **UNIX/Linux** operating systems to ensure optimal performance and system availability.
- Built an invoice view using **MVC, Razor, and Entity Framework** and Developed web services using **SOA** and **WSDL**.
- Build and deployed **ASP.NET** Core application to **Azure** Cloud Services
- Utilized Smart Part for backend data storage and code updates.
- Performed debugging and exception handling to support software development.
- Utilized Tracking Portal, an open-source bug tracking software, to monitor issues.
- Worked with **Team Foundation Server (TFS)** for version control and project/issue management.
- Used **TFS** as a source repository for committing changes and coordinating with team members.

Environment: Visual Studio 2008, Microsoft .NET Framework 4.5, Team Foundation Server, MVC5/4, ASP.NET MVC, C#, HTML, HTML5, CSS2/3, JavaScript, Telerik Kendo UI Complete, ADO.NET, Web Services, WCF, LINQ, SQL Server 2008 R2, Jenkins, Azure, T-SQL, PL/SQL, XML (XSLT, XPath), SSIS, SSRS.

Inovalon Inc Hyderabad, TS, INDIA

Aug 2021 – Dec 2022

Role: Software Engineer

Responsibilities:

- Designed and developed new applications utilizing **C#** and **ASP.Net**.
- Developed user role-based access controls to ensure secure application access.
- Utilized **ADO.NET** components like **Data Adapter, Dataset, and Xml** Reader for consistent data management.
- Applied **SSIS** for handling data transformations and manipulations.
- Created intuitive user interfaces using **ASP.NET** Web Forms controls such as **dropdowns, buttons, and textboxes**.
- Played an active role in database design, creating views and stored procedures in **SQL Server**.
- Developed web applications using **ASP.NET MVC**, incorporating **C#** and the **Razor** view engine.
- Designed multithreaded **C#** applications with **.NET WinForms** to efficiently handle complex operations.
- Managed task allocation and ensured timely project delivery in collaboration with an offshore team.
- Built rich web interfaces using **JavaScript, jQuery, CSS, HTML, AJAX, and AngularJS**.
- Integrated Sitecore **CMS** with backend systems and developed user controls for seamless functionality.
- Leveraged the **Bootstrap CSS** framework to style **HTML5** elements for responsive, modern user interfaces.
- Extensively worked with **JavaScript** for client-side validation and used **AJAX** with jQuery to reduce post backs to the server.

- Designed and developed web architecture and protocols, including in-depth knowledge of **HTTP, REST, SOAP** services, **HTML5/CSS3/JavaScript**, and **HTTP/2**.

Environment: .NET Framework 2.0, 3.5/4.0, ASP.NET, ADO.NET, Visual Studio.NET, WinForms, WPF, Web Services, PL/SQL, IIS 5.0, C#, Windows 2000, XML, XSLT, SQL Server 2005, Bootstrap, Entity Framework, MVC, Razor, SOA, REST, SOAP, AngularJS, SSIS, Sitecore.

EDUCATION:

Master of Science (M.S.) in Information Systems and Business Analytics	May 2024
Park University, Parkville, Missouri.	

Bachelor of Technology (B.Tech.) in Computer Science and Engineering.	July 2022
DRK College of Engineering and Technology, Hyderabad, INDIA
