CARRER OBJECTIVE

To obtain a creative and challenging position in an organization gives me an opportunity for self-improvement and leadership, while contributing to the symbolic growth of the organization with my technical, innovative and logical skills.

**PROFESSIONAL SUMMARY**

- Overall, 7 years of total IT experience as an SAP Business Objects Data Services (BODS) Developer.
- Having Good Experience on SAP HANA, Oracle SQL, and Sybase Database.
- Hands-on experience of Implementation, support, and Roll-out Projects- Requirement Analysis, Design, Development, Testing and Release.
- Experience in SAP S/4 HANA Migration using SAP BODS and LTMC/Migration Cockpit, **LSWM**.
- Working with different transformations like Query, Key Generation, Pivot, Map operation, Table Comparison, Data Transfer, Case, Merge and Validation Transformation.
- Configured repositories (Local, Central), Job Server and created BODS users using CMC.
- Strong understanding of **Data Warehousing concepts** such as **ETL architecture, staging area, ODS, data marts, fact and dimension tables, star and snowflake schemas**, and data reconciliation.
- Experience in working with different data sources (Flat files, Databases, SAP ECC, etc.)
- Having Knowledge on slowly changing dimensions Type 1, Type 2 and Type 3.
- Experience of creating complex BODS jobs to transform and load into target systems.
- Extensively worked in developing jobs using Platform Transformations and Data Integration.
- Strong understanding of **Data Warehousing concepts** such as **ETL architecture, staging area, ODS, data marts, fact and dimension tables, star and snowflake schemas**, and data reconciliation.
- Quick learner & Self-directed, consistently updating self with emerging trends in the industry.
- In-depth ability to work collaboratively.
- Good in Understanding of Business logic and ability to work well as a part of a team and as an individual.

**EDUCATION**

Bachelor of Computer Science,
Ramakrishna Degree College

Rayalaseema University,
Nandyal, AP

GPA: 9.3/10.0

March 2018

**TECHNICAL SKILLS**

ETL Tools – SAP BODS/ Data Services 4.1, 4.2 & 4.3

SAP – LSMW, IDOC, BAPI and Migration Cockpit (LTMC)

Database – HANA, Oracle 10g/11g, SQL SERVER 2012/2016, Sybase ASE

SAP Systems - SAP ECC 6.0, SAP S/4 HANA 1909, SAP S/4 HANA 2021, SAP S/4 HANA 2022, Sap S/4 HANA 2023, 2024

**WORK EXPERIENCE**

- | | |
|---|---------------------------------------|
| • Consultant at Deloitte USI , Bangalore | - December 2023 to Till Date |
| • Consultant at EY INDIA , Bangalore | - August 2022 to December-2023 |
| • Systems Engineer at TCS , Bangalore | - August 2021 to May-2022 |
| • Senior Associate at Visionet Systems , Bangalore | - September 2020 to April-2021 |
| • Process Associate at Accenture , Bangalore | - May 2018 to August 2020 |

Consultant at Deloitte USI

Project Name: CHEVRON

Client: Chevron Digital Core

Description:

Chevron Corporation is an American multinational energy corporation predominantly specializing in oil and gas. The second largest direct descendant of Standard Oil and originally known as the Standard Oil Company of California, it is active in more than 180 countries. Within oil and gas, Chevron is vertically integrated and is involved in hydrocarbon exploration, production, refining, marketing and transport, chemicals manufacturing and sales, and power generation.

December-2023 till date

Objective : To migrate the data from different source systems Like SAP ECC, & Flat Files to SAP S/4 HANA system.

Environment : SAP BODS 4.2, 4.3 SAP S/4 HANA 2024, SAP ECC 6.0, Oracle 11g and HANA 2.0

Roles & Responsibilities:

- Spearheaded full-cycle ERP data migration strategy for **SAP ECC to SAP S/4HANA** transformation, owning data assessment, object prioritization, migration sequencing, and risk mitigation planning.
- Conducted enterprise-level data profiling and data quality assessment across **FI/CO, MM, SD, and PS modules**, establishing data readiness metrics and remediation roadmaps prior to cutover cycles.
- Designed robust Source-to-Target Mapping (STTM) documents incorporating business rules, transformation logic, conditional derivations, and cross-object dependencies.
- Architected scalable SAP BODS frameworks supporting high-volume data loads (initial, delta, mock, and production cycles) with performance optimization and parallelization techniques.
- Established automated reconciliation frameworks comparing ECC vs S/4HANA balances at header/line-item level to ensure financial and operational data integrity.
- Implemented structured defect triage and root cause analysis processes for migration failures involving **BAPIs, IDOCs, LSMW, and Migration Cockpit** objects.
- Led multiple mock conversion cycles and final production cutover activities, coordinating freeze windows, load sequencing, validation checkpoints, and business signoffs.
- Collaborated with cross-functional stakeholders (**Functional Leads, ABAP, Basis, Business SMEs**) to resolve complex data dependencies across intercompany, project systems, and MRP-driven processes.
- Worked extensively with MRP-critical master and transactional data including **Material Master (MRP views), BOMs, Work Centres, Routings, Production Orders, PIRs, and inventory** valuation data.
- Defined and enforced data governance standards including naming conventions, data ownership models, validation checkpoints, and audit documentation for compliance.
- Optimized ETL performance by implementing push-down optimization, query tuning, and batch load strategies within SAP BODS to reduce processing time during large-volume loads.
- Delivered comprehensive documentation including **Data Migration Strategy, Conversion Playbooks, Load Runbooks, Technical Specifications (TS), and Post-Migration Validation Reports**.
- Ensured alignment with project timelines by proactively identifying upstream data risks, dependency conflicts, and resource constraints impacting migration milestones.

Consultant at EY

Project Name: NEXTERP

Client : MERCK

Description :

Merck & Co., Inc. is an American multinational pharmaceutical company headquartered in Rahway, New Jersey, and is named for Merck Group, founded in Germany in 1668, of whom it was once the American arm. The company does business as Merck Sharp & Dohme or MSD outside the **United States and Canada**

Systems Engineer at TCS

Project Name: SBB S/4 Transformation

Client: SBB CFF FFS

Description:

August 2022 – December 2023

Objective : To migrate the data from different source systems like SAP ECC, Oracle, and SAP R/3 System to SAP S/4 HANA system.

Environment: BODS 4.2, SAP S/4 HANA 2022, SAP ECC 6.0, Oracle 11g and HANA 2.0

Roles & Responsibilities:

- Designed and developed **complex ETL Jobs, Workflows, Dataflows, and Scripts** in SAP BODS using advanced transforms (Query, Map Operation, Validation, Pivot/Reverse Pivot, Merge, Case, SQL transforms) to load data into SAP S/4HANA.
- Worked extensively in the **SAP BODS 4.2 environment** for full-cycle implementation, version control, and multi-developer collaboration using **Central and Local Repositories**.
- Executed end-to-end **data migration processes** including extraction, profiling, cleansing, validation, transformation, staging, and loading into **SAP S/4HANA using BODS and Migration Cockpit (Staging Table Framework)**.
- Collaborated with cross-functional teams to define **source-to-target mappings**, transformation logic, business rules, reconciliation methodology, and defect resolution.
- Developed ETL solutions for key **Master Data** and **Transactional Data** objects required in S/4HANA RISE projects, including:
 - **Business Partners (Customers, Vendors)** – General data, roles, addresses, bank details, tax data
 - **Material Master** – Basic data, sales, purchasing, MRP, costing, classification
 - **Bills of Materials (BOMs)** – Header & component extraction, multi-level BOM processing
 - **Equipment & Product Master, Hierarchies & Classifications, Finance Master Data** – Cost Centres, Profit Centres, GL Master, **Asset Master** – Asset classes, master records, depreciation areas
 - **Transactional Data** – AR, AP, GL Balances, Open Items, Sales Orders, and other key objects
- Built **Account Receivables, Payables, and GL Balances** extraction, transformation, and load programs using **Standard IDocs and BODS** from SAP ECC, R/3, and Oracle to S/4HANA
- Developed **Sales Order, Material Master extension, and pricing update** ETL jobs using IDocs and BODS transformations.
- Created **Asset Master** ETL processes leveraging Migration Cockpit staging tables for final loads into S/4HANA.

August-2021 to May-2022

Objective: To migrate the data from SAP ECC system to SAP S/4 HANA where the customer has seven Different divisions like Energie, Real Estate and Construction, we are migrating the data one by one division.

Swiss Federal Railways (German: Schweizerische Bundesbahnen, SBB; French: Chemins de fer fédéraux suisses, CFF; Italian: Ferrovie federali svizzere, FFS) is the national railway company of Switzerland. It is usually referred to by the initials of its German, French, and Italian names, either as SBB CFF FFS, or used separately

Roles & Responsibilities:

- Creating complex Jobs, Workflows, Data Flows, and Scripts using various Transforms to successfully load data from multiple sources into a desired target.
- Worked in the BODS 4.2 Environment, the entire project implementation was on 4.2
- Created the ETL Jobs in BODS in a multi-developed environment maintaining versions in Central Repo.
- Involved in coordination with different teams of the same project for successful implementation of the project.
- Configured repositories (Local, Central), Job Server and created BODS users using CMC.
- Developed **Work Centre** Extract, Transform and upload program using Standard IDOC through BODS From SAP ECC to S/4 HANA.
- Developed **Equipment Master** Extraction, Transformation, and upload program using Standard IDOC through BODS From SAP ECC to S/4 HANA.
- Developed **Functional Location** Extract, Transform and upload program using Standard IDOC through BODS From SAP ECC to S/4 HANA.
- Developed **Characteristics** Extraction, Transformation program through BODS and loading using Migration Cockpit from SAP ECC to S/4 HANA.
- Developed **Class** Extraction, Transformation program through BODS and loading using LTMC (Migration Cockpit) from SAP ECC to S/4 HANA.
- Developed **Product Consumption** Extraction, Transformation program through BODS and loading using Migration Cockpit from SAP ECC to S/4 HANA.
- Developed **Batch Material** Extraction, Transformation program through BODS and loading using Migration Cockpit from SAP ECC to S/4 HANA.
- Developed **Source List** Extraction, Transformation program through BODS and loading using Migration Cockpit from SAP ECC to S/4 HANA.
- Worked on performance optimization and design structure optimization.

Senior Associate at Visionet

Project Name : Coop Norge
Client : Coop Norge

Description :
Coop Norge SA provides e-commerce discretionary services. The Company offers fruits, vegetables, bread bakery products, and beverages, as well as dry goods, hygiene articles, and cleaning supplies. Coop Norge serves customers in Norway.

Environment : BODS 4.2, SAP S/4 HANA 2021, SAP ECC 6.0, Sybase ASE, Oracle 11g and HANA 2.0.

September-2020 to April-2021

Objective : To migrate the data from SAP ECC system to SAP S/4 HANA
Environment : SAP S/4 HANA 1909, SAP ECC 6.0, SQL Server 2014, Oracle 11g and HANA 1.0

Roles & Responsibilities:

- Developed **Open Purchase Orders** Upload Program using Standard IDOC through BODS From SAP ECC to S/4 HANA.
- Uploaded **WM Stock** using LSMW batch input recording Using T-code LT01.
- Developed **Open Sales Orders** Upload Program using Standard BAPI functions

- Developed **Vendor Master** Upload Program using Standard IDOC (CREMAS06) Functions through BODS From SAP ECC to S/4 HANA.
- Developed **Customer Master** Upload Program using Standard IDOC (DEBMAS06) Functions through BODS from SAP ECC to S/4 HANA
- Developed **Material Master Views** Upload Program using Standard BAPI Functions through BODS from SAP ECC to S/4 HANA.
- Developed **Customer Material Info Record** Upload Program through SAP BODS from Flat File to S/4 HANA.
- Developed **Purchase Info Records** Upload Program using Standard IDOC Functions through BODS From SAP ECC to S/4 HANA.
- Developed **SD Pricing Conditions** Upload Program through SAP BODS from Flat File to S/4 HANA.
- Involved in meetings with functional users, to determine the flat file, Excel layouts, data types and naming conventions of the column and table names.
- Prepared mapping documents capturing all the rules from the business.
- I interacted with Functional team to fix the load errors at ETL end.
- Developed Reconciliation reports for **Customer Master, Vendor Master, Material Master, Open Sales Orders, Open Purchase Orders** and **SD Scheduling Agreements**.

Process Associate at Accenture

Project Name : HP Data Migration

Client : HP

Description :

The Hewlett Packard Company, commonly shortened to Hewlett- Packard. HP was an American multinational information technology company. Develops and provides a wide variety of hardware components, as well as software and related services to consumers, small and medium-sized businesses (SMBs), and large enterprises, including customers in the government, health, and education sectors.

May-2018 to August 2020

Objective : To migrate the data from Flat Files, Excel files, Oracle SAP R/3 to SAP ECC system.

Environment : SAP BODS 4.2, Oracle 10g, Flat Files, Excel files and SAP ECC 6.0 and SQL Server 2012

Roles & Responsibilities:

- Extracted data from Oracle, Flat Files, Excel Files implemented as initial /Delta logic in SAP BODS and loaded into SAP ECC as Target for business reporting.
- Developed **Material Master Views** Upload Program using Standard BAPI Functions through BODS from Flat Files/Oracle/Excel files to SAP ECC
- Developed **Customer Master** Upload Program using Standard IDOC (DEBMAS06) through BODS from Flat Files/Oracle/Excel files to SAP ECC.
- Developed **Vendor Master** Upload Program using Standard IDOC (CREMAS06) through BODS from Flat Files/Oracle/Excel files to SAP ECC.
- Developed **SD Scheduling Agreements** Upload Program using Standard BAPI Functions through BODS from Flat Files/Oracle/Excel files to SAP ECC.
- Developed **Customer material info record** upload program through LSMW from Flat File to SAP ECC.
- Developed **SD Pricing Conditions** through LSMW from Flat File to SAP ECC.
- Developed **Purchase Info Records** Upload Program using Standard IDOC through BODS Flat Files/Oracle/Excel files to SAP ECC.
- I interacted with Functional team to fix the load errors at ETL end.
- Involved in meetings with functional users, to determine the flat file, Excel layouts, data types and naming conventions of the column and table names.
