TECHNICAL SKILLS

Languages: Java | Python | JavaScript | C | C++ | HTML5 | CSS | SQL | Linux | Apex | TypeScript | Perl Script | Shell Script

Web Technologies: Spring Boot | React.js | Node.js | REST API | Kafka

Tools: Visual Studio | Eclipse | Postman | Jira | Git | Pycharm | DBeaver | Postgres | Toad for SQL | Salesforce | Aqua Studio

EXPERIENCE

Infosys

Bangalore, India

Senior Software Developer

October 2022 – July 2024

- Upgraded application security by replacing outdated web-based authentication with robust JWT authentication, enhancing protection against vulnerabilities and ensuring compliance with industry standards.
- Automated business processes using Perl and Shell scripts, increasing operational efficiency and reducing manual workload by 40%.
- Optimized an enterprise Spring Boot application by resolving slow API response bottlenecks, addressing excessive object creation, and improving caching strategies, resulting in faster response times.
- Engineered advanced automation processes in Apex and Salesforce Flow, resulting in a streamlined workflow that eliminated 300+ hours of manual data entry annually while enhancing overall operational efficiency.
- Created and deployed Salesforce Batch Apex classes to efficiently manage large-scale data processing and complex business logic.

Accenture

Mumbai, India

Senior Software Developer

May 2018 – January 2022

- Developed RESTful microservices with Spring Boot to improve data processing and system performance; implemented Spring Security, adopted by 5+ development teams to enhance application security.
- Implemented unit testing with Mockito and JUnit, achieving over 90% test coverage for backend services, ensuring robust, reliable, and secure code.
- Designed dynamic web components using HTML, CSS, JavaScript, React, and Angular, increasing user engagement by 20% and reducing load times for critical pages by 15% in online banking applications.
- Utilized Python to develop data processing scripts that automated the extraction, transformation, and loading (ETL) of financial data, resulting in a 30% increase in data accuracy for banking applications.
- Optimized database performance and accuracy by developing stored procedures and SQL triggers to streamline data retrieval and reduce errors.
- Applied strong understanding of memory management, concurrency, multithreading, and data structures to produce efficient and maintainable code.
- Engaged in Agile development cycles, contributing to sprint planning, daily standups, and retrospectives to maintain team alignment and drive consistent project progress.
- Documented and managed project and code repositories using Confluence, Jira, and GitLab, ensuring seamless collaboration and efficient version control.

EDUCATION

M.S in Information Systems, University of Utah, David Eccles School of Business

SLC, UT

Recently

B.S in Information Technology, Devi Ahilya University

India

May 2018

Projects & Certifications

- SB_Outfitters is a web application designed in PHP to enhance the shopping experience for users. [[Code](#)]
- AWS Certified Developer - Associate
