About me:

Certified **PMP** with over 10 years of experience in **QA, Business Analysis, and RPA/ Conversational AI** projects. Proven expertise in managing cross-functional teams, delivering high-impact projects, and applying PMI's best practices to drive business results. Hands-on expertise in **SAP** application testing within the retail domain. Adept at collaborating with cross-functional teams to drive process improvements and ensure seamless integration of AI and RPA systems.

Summary of Qualifications:

- Experienced **Quality Analyst** and **Business Analyst** with **9+** years of combined experience across **retail, healthcare, finance, and telecom domains**, contributing to high-impact projects in both technical and functional roles.
- Strong hands-on experience in **Quality Assurance** for **GCP**-based projects, including testing of Cloud Functions, BigQuery pipelines, and validating APIs, backend processing, data flows, and role-based access across cloud-native services.
- I worked as a **Business Analyst** for **RPA** projects using UiPath and Automation Anywhere, responsible for requirement gathering, process documentation (PDD/SDS), stakeholder communication, and ensuring business rule alignment for automated workflows.
- Experience in **SAP QA testing** in the **retail** domain, including validation of order management, invoicing, and inventory processes integrated with backend **SAP systems** (FI/SD/MM modules).
- Experience **testing Conversational AI platforms** (e.g., Kore.AI), validating end-to-end chatbot functionality, backend integration, NLP/NLU accuracy, and seamless user interactions for customer service and healthcare use cases.
- Proficient in a wide range of **QA methodologies including functional, integration, regression, UAT, API testing, and working in Agile/Scrum environments using tools like JIRA, Azure DevOps, Postman, Confluence, and SAP GUI.**
- Known for strong cross-functional collaboration, attention to detail, and the ability to bridge **gaps between business and technical teams** to ensure successful project delivery.

Certifications:

- Project Management Professional (**PMP**) – Project Management Institute
- Lean Six Sigma
- UiPath Test Suite
- Generative & Responsible AI (LLM, AI principles with Google Cloud, NLP)
- RPA Business Analyst & Developer Foundation

Swetha Gorle

Senior Business System Analyst
PMP Certified

Technical Skills:

Test Automation Tools	Selenium, Playwright, Postman, SoapUI
Programming & Scripting	C#, JavaScript, MySQL
Methodologies:	Agile, Waterfall, Behavior-Driven Development (BDD)
Tools	ALM, Jira, Azure DevOps, Jenkins, Bitbucket
Testing	API Testing, Integration Testing, Functional Testing, Regression Testing, End-to-End Testing, Mobile Testing, User Acceptance Testing (UAT)
RPA Tools	Conversational.ai, UiPath, Automation Anywhere
Data Validation	SQL, Rocket Shuttle, Requirements Analysis, Reporting Tools
Other Skills	Effective Communication, Test Procedures, Peer Reviews, SDLC

Work Experience:

Senior Business System Analyst

Novatio Solutions | Orlando, FL (Remote) | Aug 2019 – Present

- Directed QA testing and business analysis for esteemed clients including **PwC, Disney, and CareFirst (FEPOC)**.
- Led end-to-end project lifecycle aligned with **PMI principles** and best practices
- Applied **PMP methodologies** to manage scope, timelines, and cross-team dependencies
- Collaborated with stakeholders to prioritize deliverables and ensure quality outcomes
- Worked as a Business Analyst in RPA UiPath projects for clients such as the **Bureau of Workers Compensation (Ohio) and Tower FCU**.
- Orchestrated RPA Automation Anywhere initiatives for clients including **Southern New Hampshire University (SNHU), St. Clair, and PMMC**.
- Supported conversational AI testing for projects with **UCare and Pride Mobility**.

Swetha Gorle

Senior Business System Analyst
PMP Certified

- Experience in performing end-to-end testing of a **GCP-based** application for a government-based client **New Hampshire Employment Security (NHES)**, validating secure data pipelines, cloud functions, and access controls in a regulated environment.
- Devised and implemented automated **test plans** and frameworks utilizing Selenium and Postman.
- Employed **Agile** methodologies to enhance development cycles.
- Performed **functional testing** of payment workflows, ensuring end-to-end order lifecycle was accurately captured and reflected in integrated systems including SAP.
- Collaborated with **SAP functional** and technical teams to validate that payment confirmation and refund events triggered accurate updates in SAP modules such as FI (Financial Accounting) and SD (Sales & Distribution).
- Supported **system integration testing (SIT)** for transactions flowing from the payment gateway into **SAP** for financial posting, order updates, and reconciliation.
- Created and executed detailed **test cases, test scripts, and test scenarios based on functional specifications and business process flows.**

Test Engineer

Infosys Ltd. | Richardson, TX | Apr 2016 – Aug 2019

- Delivered QA services to prominent clients including **Capital Group, AT&T, Neiman Marcus, and Verizon.**
- Crafted and executed comprehensive **test plans** for **functional, integration, and end-to-end testing.**
- Conducted **API** testing using Postman and performed **SQL** data validation for backend systems.
- Performed end-to-end functional testing of **SAP** modules like WM (Warehouse Management) to validate business processes such as order fulfillment, procurement, and invoicing.
- Conducted **System Integration Testing (SIT)** to verify seamless data flow between SAP and other retail systems like **POS, eCommerce platforms, inventory systems.**
- Created and executed detailed **test cases, test scripts, and test scenarios based on functional specifications and business process flows involving SAP transactions and customizations.**
- Collaborated with **SAP** functional consultants, business analysts, and developers to understand requirements and troubleshoot issues during testing phases.
- Logged and tracked defects using tools like **HP ALM, JIRA, or Azure DevOps**, ensuring timely triage and resolution of issues in SAP landscapes (**DEV/QA/PROD**)

Key Achievements:

- Enhanced defect tracking and reporting processes utilizing ALM and Jira.
- Played a pivotal role in deploying critical web applications for telecom and Retail clients.
