

USHASREE KAMALA

PROFESSIONAL SUMMARY

Over 5 years of experience in the full SDLC of web applications, specializing in .NET technologies including ASP.NET Core, C#, and Entity Framework Core. Expertise includes developing RESTful services, implementing microservices architecture, and leveraging cloud platforms like Azure for enhanced scalability and performance. Proficient in front-end technologies such as React, HTML5, CSS3, and JavaScript, with a strong command of CI/CD tools like Azure DevOps, Docker, and Kubernetes for streamlined deployment. Extensive experience in database management with SQL Server, including writing optimized queries, stored procedures, and using LINQ for data manipulation. Adept at Agile and Scrum methodologies, with strong problem-solving abilities and effective communication skills in collaborative team environments.

SKILLS

- C#, JavaScript, TypeScript, OOPS,Java
 - HTML5, CSS3, XAML, React,Angular 8
 - Agile Methodology, Scrum FrameWork
- ASP.NET, ASP.NET Core, Entity Framework, Dapper, Microservices,WPF, WCF ,IIS
 - SQL Server, MySql, ADO.Net, LINQ,T-SQL,SSRS,SSIS
 - Docker, Kubernetes, Azure DevOps, Azure Cloud Services,Apache Kafka,Dynatrace
- Visual Studio, N-Unit, Unit Test,MS Visio

WORK HISTORY

- FULL STACK DEVELOPER** 12/2023 to Current
Verizon, Irving,Tx
- Migrated legacy ASP.NET Web Forms applications to ASP.NET Core, using Dapper for improved performance and maintainability
 - Developed and maintained RESTful services with ASP.NET Core Web API, integrating them with various components to enhance application functionality and interoperability
 - Redesigned the user authentication module with ASP.NET Core Identity, focusing on password management and information retrieval
 - Enhanced dynamic and responsive web pages and developed reusable UI components, managing application state using React, TypeScript, HTML5, and CSS3 for a seamless user experience
 - Designed and implemented microservices architecture, planning and executing the migration of the application to the Azure cloud platform for enhanced scalability.
 - Utilized Apache Kafka for reliable and scalable messaging between microservices, ensuring efficient communication and data processing.

- Implemented CI/CD pipelines using Azure DevOps to streamline development and deployment processes, ensuring continuous integration and delivery

Environment : ASP.Net Core, C#, Dapper, Visual Studio, MVC, Micro Services, Apache Kafka,HTML5, CSS3, JavaScript, React, Azure, Razor, LINQ, SQL, TFS, Agile

.NET DEVELOPER 02/2023 to 11/2023

Paychex, Rochester,NY

- Designed and developed web application using ASP.NET Core and C#, ensuring robust and scalable solutions
- Integrated CRUD functionality with Entity Framework Core in ASP.NET Core MVC for key modules, including sorting, filtering, and paging capabilities
- Designed and implemented user interfaces using Angular 8, HTML5, CSS3, and JavaScript, focusing on creating responsive and interactive web components
- Developed and optimized SQL queries, stored procedures, and database objects, while managing source code and development workflows using Azure DevOps to ensure CI/CD practices were followed
- Leveraged Azure cloud services for background task processing and storage solutions, ensuring scalability and responsiveness of application
- Integrated Dynatrace for application performance monitoring and infrastructure health, providing detailed insights and proactive performance management.

Environment: ASP.Net Core, C#, Entity Framework, MVC, Razor, HTML5, CSS3, JavaScript, Angular 8, Azure,Dynatrace, Visual Studio, LINQ, SQL, TFS and Agile

ASSOCIATE ENGINEER 05/2021 to 08/2022

Johnson&Johnson-TCS, India

- Enhanced the existing ERP system by implementing new features, improving performance, and optimizing user experience using ASP.NET Core and C#
- Developed and maintained web applications, creating RESTful APIs and integrating React-based user interfaces for seamless functionality
- Designed and implemented reusable UI components with ASP.NET MVC, Partial Views, and View Starts, applying C# and OOP principles
- Implemented microservices architecture, designing and deploying independent services to improve scalability and maintainability
- Developed and consumed web services with WCF, focusing on Service Contracts, Data Contracts, Operation Contracts, and security for reliable communication

Environment: ASP.NET Core, Restful APIs, C#, WCF, HTML5, CSS3, JavaScript, React, Dapper, LINQ, ADO.NET, SQL, TFS, Agile.

ASSOCIATE DEVELOPER 02/2019 to 04/2021

Hexaware, India

- Architected and developed web-based intranet application using ASP.NET and C#, enhancing user interface functionality with HTML, XAML, and JavaScript for client-side validations.
- Designed and implemented WPF screens for desktop application, following MVC design pattern and leveraging WCF to optimize performance and ensure efficient communication between distributed systems.
- Executed data access operations using ADO.NET, efficiently handling complex DML/DDI operations with SQL Server. Optimized database performance through advanced stored procedures, queries, triggers, views, and indexes.
- Managed version control effectively with Git, ensuring a smooth and collaborative

development process. Utilized Azure Blob Storage for handling and processing complex files and background tasks, improving file management efficiency and scalability

- Collaborated closely with cross-functional teams to gather requirements, design solutions, and deliver high-quality software within tight deadlines, consistently receiving positive feedback from stakeholders.

Environment: C#, ASP.NET, ADO.NET, HTML, XAML, JavaScript, WPF, WCF, SQL.

EDUCATION

Bradley University, Peoria, IL

Master of Science, Computer Science, 05/2024
