SUMMARY

Dedicated and experienced Full-stack **Software Developer** with a strong focus on building scalable and reliable applications and deploying them on various platforms. With almost **5 years** of professional experience, I have honed my Java development skills and leveraged AWS services' power to deliver high-quality software solutions. I have consistently delivered robust and efficient code, adhering to best practices and coding standards. I actively collaborate with cross-functional teams to ensure **smooth project execution**.

EDUCATION

MASTER OF SCIENCE: COMPUTER SCIENCE

Missouri University of Science and Technology, USA

BACHELOR OF TECHNOLOGY: COMPUTER SCIENCE

Jawaharlal Nehru Technological University, India

SKILLS

Languages: Java (JDK, JVM), C++, C, Python, SQL, C#, Rust

Web Technologies: HTML5, CSS3(Sass and less), JavaScript, AJAX, JSON, Bootstrap, jQuery, Angular2.0/4/8/9/12/14, React JS with Flux, Redux, .NET, Handlebar JS, Polymer.js, Backbone JS, NodeJS, Express JS, Hapi JS

Messaging Services: JMS, Rabbit MQ, IBM MQ, Apache Kafka

Web Service Frameworks: JAX-RS, JAX-WS, Apache CXF, Axis, Jersey, SOAP, RESTful, WSDL

Application/Web Servers: Apache Tomcat, Oracle Web Logic, IBM Web Sphere, JBoss

Databases: Oracle 9/10/11g/12c, DB2, NoSQL, MySQL 7.1.9, RDBMS, SQL, MongoDB, Cassandra

Cloud Technologies & DevOps: AWS, Azure, Ant, Maven, Gradle, Jenkins, Bamboo Gulp, Grunt, Webpack, NPM, Bower, Docker, Kubernetes, Azure Cloud, GCP

Testing Tools: Junit, TestNG, Mockito, Jasmine, Karma, Mocha, Chai, Spock, Protractor

Operating System: Windows, Linux, Unix, MAC, GitLab Automation

Project Management Tools: JIRA, Rally, Microsoft Project.

EXPERIENCE

CAPITAL ONE

Software Developer II, Dallas, TX

02/2023 to Current

- Led the development of a cutting-edge single-page application, actively contributing to its design, implementation, and maintenance within an Agile Scrum environment.
- Participated in 150+ daily stand-ups, sprint reviews, and Kickoffs, leveraging Jira for seamless project management and collaboration.
- Integrated Gradle with CI/CD pipelines (Jenkins and Travis CI), automating the build, test, and deployment processes, resulting in a 30% reduction in release time.
- Successfully integrated third-party services and APIs using REST, JSON, and SOAP, expanding the application's functionality and enhancing data exchange capabilities.
- Demonstrated expertise in Object-Oriented Programming (OOP) concepts, applying design patterns (Singleton, Factory, DAO) to bolster code maintainability by 25%.
- Designed and developed a Micro Services Architecture enterprise application, contributing to a 40% improvement in overall system scalability.
- Collaborated with a cross-functional team of 20+ members, fostering effective communication and enhancing project efficiency.
- Orchestrated the end-to-end development of a mission-critical single-page application, aligning with the strategic vision of Wells Fargo.
- Facilitated and actively participated in over 200 daily stand-ups, sprint reviews, and Kickoffs, demonstrating exceptional project management skills leveraging Jira.
- Innovatively integrated Gradle with CI/CD pipelines (Jenkins and Travis CI), leading to a remarkable 35% reduction in release cycles and significant cost savings.
- Spearheaded the integration of diverse third-party services and APIs using REST, JSON, and SOAP, elevating the application's functionality and market competitiveness.
- Applied advanced Object-Oriented Programming (OOP) concepts, showcasing expertise in implementing design patterns (Singleton, Factory, DAO), resulting in a 30% improvement in code maintainability.
- Pioneered the design and development of a cutting-edge Micro Services Architecture enterprise application, significantly enhancing scalability and system efficiency.
- Played a pivotal role in a cross-functional team of 25+ members, fostering an environment of collaboration, knowledge sharing, and innovation.

GLOBAL EDGE SOFTWARE

Software Developer, Hyderabad, India

05/2018 to 12/2020

- Engaged in all stages of the Software Development Life Cycle (SDLC), actively participating in requirement analysis, design, and implementation within an Agile Methodology framework.
- Developed presentation layers using HTML5, CSS3, and Angular4 router, significantly improving the user interface and navigation experience.
- Utilized Angular 4 to associate HTML elements to models, providing dynamic user validations on the client side, reducing user errors by 20%.
- Demonstrated strong proficiency in Java8 features (Lambda expressions, Streams, filters, optional classes, and default methods), contributing to a 15% increase in code efficiency.
- Applied JUnit and other automated testing frameworks to create, run, and maintain unit tests, ensuring code quality and reliability.
- Designed and implemented data transformation processes, adapting data from various sources for consumption by target applications.
- Implemented Kafka Connect for data integration, facilitating seamless data movement between Kafka and diverse data sources and sinks.
- Proactively detected and addressed software risks by adding new approval steps to pipelines, ensuring healthy pipeline maintenance and minimizing failures.
- Developed alarms for APIs to enhance customer service and system health while reducing escalation problems by 35% within a month.
- Improved data retrieval and storage capabilities by restructuring API design, while maintaining existing systems through code reviews, bug fixes, and a commitment to operational excellence. Additionally, mentored interns and led task grooming sessions for enhanced project planning in a virtual environment.

SETTLE METAL

Full Stack Developer, Bangalore, KA

01/2017 to 05/2018

- Actively participated in the design and implementation of RESTful APIs to support various functionalities, enhancing the platform's efficiency.
- Collaborated with the front-end development team to integrate APIs seamlessly, resulting in a smoother user experience.
- Assisted in the implementation of user authentication and authorization mechanisms, ensuring secure access to sensitive data.
- Conducted extensive testing of backend APIs, identifying and resolving bugs promptly to maintain high software quality.
- Worked closely with the database team to optimize data retrieval and storage procedures, contributing to improved system performance.
- Implemented data validation and error handling, enhancing the robustness of the backend system.
- Played a key role in the integration of third-party services for payment processing, streamlining the checkout process.
- Demonstrated problem-solving and analytical skills, addressing complex challenges to deliver robust software solutions.
- Actively contributed to the development of cloud-native UI applications using react.js, adhering to coding standards and best practices.
- Participated in code reviews and provided feedback to improve code quality, user experience, and maintainability.
- Conducted thorough debugging and troubleshooting of software issues, reducing critical defects by 15%.
- Provided prompt resolution of bugs, minimizing downtime and improving overall system stability.
- Implemented CI/CD pipelines to automate the build, testing, and deployment processes, reducing manual errors and speeding up releases.
- Enabled frequent and reliable software updates, improving the overall agility of the mobile repair systems.
