SUMMARY

Experienced Full Stack .NET Developer with over 5 years of expertise in developing high-quality applications. I possess professional development experience in C# and .NET Core, alongside proficiency in utilizing frontend frameworks like React.js and Angular.

My skill set includes extensive hands-on experience with SQL queries and stored procedures, ensuring seamless data management for applications. Additionally, I have exposure to Cloud CI/CD pipelines, particularly with Azure, which enables efficient and streamlined deployment processes in a Containerized environment such as Docker and Kubernetes.

EXPERIENCE

Associate Software Developer

You Stick Out

June 2021 - July 2023, Casablanca, Morocco

Associate Software Developer – Playing a key role in development and testing of Estates Processing System and Admin Portal, collaborating with onshore and offshore teams.

- Implementing Estates Processing System API and asynchronous background service using .NET 7 and C#.
- Designing and implementing Admin Portal UI using Angular 9 and integrating with Web API.
- Creating and tuning MS SQL database queries .
- Collaborating with dev leads in setting up CI/CD using bitbucket.
- Working with product owner, scrum master, business analyst and other scrum team members in gathering, customizing, estimating and prioritizing requirements .
- Implementing token based authorization, exception handling and logging
- Adding unit and integration tests.
- Working with operation team and scrum team in planning releases and deploying Applications into Production using Harness

Junior Software Developer

You Stick Out

February 2019 - May 2021, Casablanca, Morocco

.Net Software Developer - Collaborate with customers and developers to address customer issues, assist in creating, testing, maintaining, and enhancing software programs and applications, document and communicate application logic, contribute to process improvements, work with product management and support staffs

- Actively worked on improving and fixing the bugs of the Offline Views web application.
- Implemented new features in the Offline Views web application using ASP.NET, AngularJS, C#.
- Implemented multithreading in window service so that it generates reports concurrently and improved the performance using Quartz.NET framework (using C#)
- Worked on complex database queries used to retrieve and display patient data for many customer sites
- Worked on implementing existing SSRS reports so they work in both remote and local processing mode.
- Collaborated with scrum team members and managers in delighting customers

Software Developer

University Sultan Moulay Slimane

February 2018 - October 2018, Beni Mellal, Morocco

Software Developer: Played key role in development, testing and deployment of automatic dispensing software, reports and web sites. Creating migration scripts to design and maintain database. Creating user interfaces using WPF, Winforms and ASP.NET MVC. Implementing data access, repository and service classes using C#. Implementing unit and integration testing. Designing and implementing reports. Performing peer code review. Applying proper documentation. Coordinating with QA for testing. Applying CI/CD.

- Created and modified migration scripts to design and manage the database.

- Designed user-friendly and all-in-one inventory management screens using WPF MVVM Caliburn Micro
- Designed web applications using ASP.NET MVC and JavaScript.
- Improved the performance of the inventory management system.
- Resolved software bugs of the existing applications.
- Actively participate in the scrum team to finish tasks and close them on time.
- Coordinated with quality assurance department to successfully apply regression and automated testing.
- Designed user friendly reports using WPF MVVM and RDLC.
- Improved the performance and functionality of existing reports and added more filter criteria.
- Implemented repository and service classes.
- Added new printing service that uses image format.
- Participated in continuous integration and deployment.
- Supported customers after deployment into production.

EDUCATION

- **Master of Computer Science**
 - Maharishi International University • Fairfield, IA • 2024
- **Master of Information System Engineering**
 - University Sultan Moulay Slimane • Beni Mellal, Morocco • 2018

SKILLS

Technical Skills: C#, Visual Basic, .NET, JavaScript, Java, Spring boot, AngularJS, ReactJS, Typescript, Blazor, .NET Framework, .NET Core, ASP.NET, ASP.NET MVC, Web API, Microsoft SQL Server, MySQL, Microsoft Azure, LINQ, ADO.NET, MediatR, SignalR, Entity Framework, T-SQL, CI/CD, Visual Studio, Serilog, Git, Azure DevOps, Unit Testing, xUnit, Dapper, Agile (Scrum, Kanban), Waterfall, Microservices Architecture, Docker, Kubernetes, RESTful APIs, gRPC, Message Queues (RabbitMQ, Azure Service Bus), Stored Procedures, ASP.NET Web Forms, authentication, Okta, JWT, XAML, SQL Server Reporting Services (SSRS), Jira, Jenkins, Nuget, CQRS, Redis Cache.

Soft Skills: Communication, Problem-Solving, Teamwork and Collaboration, Time Management and Organization, Continuous Learning, Adaptability and Flexibility
