SUMMARY

A skilled professional with experience in IT support, system administration, and software development. I graduated from University of Dayton in Master of Computer Science (GPA 3.75) and have strong programming skills in Java, Python, and SQL. My experience includes administering Microsoft 365 and Google user accounts, managing backend version control for 99% application uptime, and coordinating Rest API testing, resulting in a 20% decrease in issues.

TECHNICAL SKILLS

Skills: Java, Python, MYSQL, HTML, CSS, JavaScript, Shell Scripting, PeopleCode, COBOL

Tools: WebLogic, PeopleTools, Web Servers, Load Balancing, Oracle Database Systems, Windows Operating Systems, Unix, Application Designer, Application Engine, Process Scheduler, PS Query, Approval Workflow Engine, Forms, Data Mover, PHIRE

WORK EXPERIENCE

GBCS

Canada

Support Intern

May 2024 - August 2024

- Coordinated with multiple teams to test Rest API integrations, resulting in a 20% decrease in issues.
- Provided both at home and remote tech support session for home users.
- Managed backend version control, conducted thorough reviews and code merges to prevent issues, maintaining a 99% up time for the application.

Accenture

Mumbai, India

IT Support Specialist

September 2019 - July 2022

- Provided tier 1 remote outsourced technical support for clients in Windows, MacOS and Chrome OS environments ensuring the efficient operation of hardware, software, and network systems.
- Documented troubleshooting steps in internal systems to enhance knowledge sharing and efficiency.
- Utilized various ticketing systems, including Syncro, Jira, Spiceworks Autotask, Halo, Accelo, N-Sight, ConnectWise, and RepairShopr, to manage and resolve support tickets efficiently.
- Employed RMM tools such as Level.io, Datto, TeamViewer, Ninja RMM, Splashtop, ScreenConnect, and Tactical RMM for remote monitoring and management of client systems.
- Created and maintained internal documentation in Guru to improve team processes and support operations.
- Administered user accounts in Microsoft 365 Admin Center and Google Admin Center for license assignments, mailbox configurations, and Workspace integration, ensuring seamless operations and effective account management.
- Performed password resets using Azure Entra, Microsoft 365 Admin Center, Windows Server Active Directory, and command-line tools, ensuring quick resolution of access issues and minimizing user downtime.

Mindzcloud

Nagpur, India

IT Support Specialist

December 2018 - August 2019

- Provided technical support and custom computer building services to residential clients, ensuring their systems were effectively managed and maintained.
- Assembled and configured Windows Desktops for diverse clients, ensuring customized solutions aligned with their needs.

RELEVANT PROJECTS

Mouse Brain Image Segmentation (Python, PyTorch, ImageJ, RoboFlow)

- Annotated a dataset of 2000 images using Fiji/ImageJ, a Java-based image processing software, by applying detailed and precise markings to highlight and outline the specific structures of interest within the dataset.
- Completed model training by leveraging an annotated dataset, using the Mask R-CNN, Mask2Former and YOLACT++ models which were implemented using PyTorch, NumPy.
- Performed instance segmentation on mouse brain images, yielding the identification and differentiation of various cell types and proteins crucial for facilitating neural signal transmissions with an accuracy of 70%.

EDUCATION

University of Dayton

Master of Computer Science, GPA:3.75

Dayton, Ohio
