

ANUPAM JAISWAL

Principal QA Automation Lead (QA Manager / Principal SDET / QA Architect)

Work Authorization: L2 Visa (EAD – Authorized to work for any employer, Willing to Relocate or Remote)

PROFESSIONAL SUMMARY

Results-driven Principal QA Automation Lead (QA Manager / Principal SDET / QA Architect) with 10+ years of experience designing, implementing, and scaling enterprise-wide quality engineering and automation programs across retail, telecom, and SaaS domains. Proven expertise in defining test strategy, architecting end-to-end automation frameworks, and embedding continuous testing into modern CI/CD and DevOps pipelines.

Skilled in leading high-performing QA teams and driving shift-left testing, AI-powered test automation, and metrics-driven quality governance that improve speed, reliability, and release confidence. Combines strong technical proficiency in Selenium, Playwright, Java, Python, AWS, GCP, Docker, and Kubernetes with a strategic, business-focused mindset to deliver measurable gains in quality, velocity, and cost efficiency.

Core Competencies: Test Automation • QA Strategy • DevOps • Continuous Testing • Cloud QA • AI/ML in QA • API Testing • CI/CD Integration • Agile Leadership • QA Architecture

EXECUTIVE HIGHLIGHTS

- Delivered enterprise-wide automation transformation, achieving **85%+** automation coverage and reducing regression execution time by **75%** through CI/CD-integrated frameworks and parallel execution.
- Led and mentored global QA teams of **30+** engineers, fostering innovation, collaboration, and scalable automation practices across hybrid Agile-DevOps environments.
- Architected reusable, cloud-ready automation frameworks (Java, Selenium, RestAssured) supporting microservices, APIs, and web platforms, accelerating release cycles and improving product stability.
- Integrated quality governance and metrics-driven QA processes, cutting escaped defects by **60%** and establishing enterprise-wide testing standards across distributed teams.
- Introduced continuous testing and shift-left automation aligned with DevOps, enabling early defect detection and faster feedback loops for high-impact retail and SaaS systems.

TECHNICAL COMPETENCIES

Automation Tools & Frameworks: Selenium, Playwright, Cypress, Cucumber, TestNG, RestAssured, Postman, ReadyAPI, TestRail, Zephyr

Programming & Scripting: C, C++, C#, Java, Python, JavaScript, SQL, Bash, HTML, CSS

CI/CD & DevOps: Jenkins, GitLab CI/CD, CircleCI, Bitbucket

Cloud & Infrastructure: AWS, GCP, Docker, Kubernetes, OpenShift, Vault

Monitoring & Analytics: Grafana, Splunk, Prometheus, Power BI, Datadog

Databases: MySQL, PostgreSQL, Aurora, MongoDB, DB2, Redis

Other Tools: JIRA, Confluence, Miro, Maven, Gradle, ServiceNow

Keywords: QAAutomation, Test Strategy, SDET, Playwright, Selenium, API Testing, Jenkins, AWS, Kubernetes, CI/CD, Quality Governance, DevOps Testing, Regression Automation, Microservices Testing

PROFESSIONAL EXPERIENCE

PRINCIPAL AUTOMATION QA LEAD | Lululemon Athletica | Vancouver, BC | 06/2021- Present

- Built QA team from scratch, hiring and managing 6 QA engineers (onshore/offshore) while overseeing 30+ QA professionals across 2 enterprise-wide retail programs running in parallel.
- Architected 3 automation frameworks using Java, Cucumber, Spring Boot, and Kafka; achieving 85% automation coverage and 75% reduction in regression time.
- Designed 2000+ test cases across backend, API, frontend, and mobile applications, identifying 800+ bugs; developed UI automation with Python, Selenium, AWS CDK, CloudWatch Canaries, Docker, and Kubernetes.

- Integrated QA into CI/CD pipelines via Jenkins and GitLab; introduced TestRail and engineered JIRA dashboards for real-time tracking, reducing production defects by 60% across 50+ releases.
- Implemented hardware-in-the-loop testing for POS, RFID, and retail devices; constructed Postman collections for API automation and wrote SQL queries on Lenses for data validation.
- Established comprehensive knowledge base on Confluence, reducing onboarding time by 70%; collaborated with global teams across multiple time zones to deliver zero-critical-incident releases.

Technical Environment: Java, Cucumber, Rest Template, Spring Boot, Maven, TestNG, Jenkins, GitLab, Kafka, Vault, TestRail, Postman, AWS CDK, Python, Selenium, Docker, Splunk, Lenses, PostgreSQL, RFID

AUTOMATION QA LEAD | Shaw Communications | Calgary, AB | 06/2020 - 06/2021

- Led team of 4 QA engineers across 4 enterprise-wide programs simultaneously, applying Agile-DevOps methodologies and coordinating global teams on complex network automation and business systems.
- Developed automation suites using Selenium, QAComplete, TestComplete, and JavaScript for backend, API, and frontend testing, improving reliability by 40% and cutting release cycles by 45%.
- Integrated QA into OpenShift and AWS CI/CD pipelines in collaboration with DevOps, ensuring bug-free releases through comprehensive smoke, integration, UAT, and regression testing across 30+ releases.
- Validated SOAP & REST APIs using Swagger, SoapUI, and ReadyAPI; managed code repositories via Bitbucket and Git for seamless version control and team collaboration.
- Designed enterprise Chatbots and SharePoint Sites using Power Automate and Power Virtual Agents to streamline QA processes; mentored new hires and facilitated sessions with architects and stakeholders.

Technical Environment: Selenium, QAComplete, TestComplete, JavaScript, ReadyAPI, SoapUI, Swagger, OpenShift, AWS, Power Automate, SharePoint, Bitbucket, Git, JIRA, Confluence

SDET | Pason Systems | Calgary, AB | 09/2019 - 04/2020

- Led team of 3 SDETs in architecting scalable automation framework integrated with Jenkins CI/CD; developed project plans with epics and stories decomposed into one-week Agile sprints.
- Engineered Selenium-Java framework with JUnit, Gradle, Docker, and POM architecture incorporating parallelization and parameterization, achieving 80% automation coverage.
- Reduced manual test execution time from 69 hours to 10 minutes through optimized parallel execution and WebDriver recycling; delivered project 15 days ahead of schedule with 95% pass rate.
- Created UI automation POC using Python, Selenium, and TestNG for QA training; implemented hardware-in-the-loop testing for well drilling systems validation.

Technical Environment: Selenium, Java, JUnit, Gradle, Docker, Jenkins, IntelliJ, Bitbucket, Git, Python, TestNG, Maven, JIRA, Confluence, Linux

LEAD QA ENGINEER | Chata Technologies Inc. | Calgary, AB | 10/2017 - 09/2019

- Established QA function from scratch for AI-powered SaaS platform; led team of 3 QA engineers across manual and automated testing, reporting directly to VP of Engineering.
- Built automation framework using Selenium, Java, TestNG, and Maven integrated with Jenkins/CircleCI for nightly execution, improving regression speed by 70% and achieving 99% first-time pass rate.
- Trained and validated AI/ML chatbot models on GCP using Python, REST APIs, and Postman; collaborated with developers on unit tests using pytest, Jest, and Enzyme for shift-left quality.
- Tracked 1000+ defects and oversaw 50+ product releases with zero critical incidents; established GitHub repositories and pioneered quality metrics for data-driven decision-making.

Technical Environment: Selenium, Java, Python, TestNG, Maven, Jenkins, CircleCI, GCP, REST APIs, Postman, pytest, Jest, GitHub, Git, JIRA, Confluence, AI/ML

ASSOCIATE ENGINEER | Sears IT & Management Services | India | 09/2015 - 03/2017

- Executed comprehensive testing for POS systems; created test plans and test matrices; performed defect tracking via JIRA and maintained stakeholder communication for timely resolution.

Technical Environment: POS Systems, PCI DSS, EMV, VAT Tax, P2P Encryption, JIRA, Confluence

EDUCATION

MASTER OF COMPUTER APPLICATIONS - National Institute of Technology Jamshedpur, India | 05/2015

BACHELOR OF COMPUTER APPLICATIONS - M.L.T. College Saharsa, India | 05/2010
