Professional Experience

SAP BODS Senior Consultant | Ernst & Young Global Data Services (Hyderabad, IN)

Oct'24 – Present

- Leading the finance team and managing all finance-related objects in SAP BODS.
- Collaborating directly with business stakeholders to provide clarifications and ensure smooth operations.
- Supporting the BODS team by resolving technical issues and offering guidance.
- Coordinating with the Business and Basis team to address system-related concerns and ensure seamless integration

SAP BODS Analyst | Deloitte Consulting (Hyderabad, IN)

Mar'23 – Oct'24

- Responsible for data ingestion to SAP S4 and Azure systems from legacy using BODS, Migration Cockpit (LTMC), LSMW, BAPI, SAP Loader and SLT load approach.
- Developed a prototype for data conversions using BODS, establishing it as reusable for all future builds, reducing development time by 50%.
- Developed profiling and end to end data implementation objects ensuring successful data load.
- Coordinated with functional, technical, SAP, and various teams for daily deliverables and load approach, ensuring 100% on-time delivery.
- Ensured successful data loads with staggering jobs in multiple instances based on volumes, improving processing speed by 25%.
- Performed detailed data analysis and validation, increasing Technical and functional testing progress by 70%.

SAP BODS Associate | Deloitte Consulting (Hyderabad, IN)

Jun'21 – Feb'23

- Orchestrated scalable data ingestions to extract data into ADLS Gen2 containers from SAP S4HANA, ECC, and Power BI systems using BODS and ABAP CDS Views.
- Developed CDC in BODS and automated pipeline execution in ADF, resulting in a 99% reduction in rebuild time and data profiling, leading to a 20% increase in data quality.
- Designed and implemented ADF pipelines for Data Migration, resulting in a 30% improvement in data ingestion efficiency from SAP BODS to Azure Data Lake Gen2.
- Optimized hierarchical folder structures in ADLS, improving data storage and retrieval efficiency by 40% while supporting Parquet and JSON formats.
- Developed a Power BI dashboard to visualize errors, reducing error resolution time by 40% and improving efficiency by 50% through automated job notifications.
- Achieved a successful R1 go-live, generating a significant boost in end-user satisfaction and increased business revenue by \$5 billion.

Achievements

Spot Award:

Quickly transitioned to proficiency in BODS through focused learning and dedicated effort.

Applause Award:

Owned E2E delivery of BODS with SAP, Architects & Business, achieving a 100% success rate in project deliverables.

Rockstar Buddy:

Mentored 10+ new employees, helping them to learn and grow in the company, resulting in a 90% retention rate.

Shoutout Award:

Delivered an informative E2E development session on SAP BODS and Azure.

GDS User Recognition:

Recognized by Client and Senior Manager for handling Finance Team.
