

Guru Mandrachalam
Sam@lavsun.com
(214) 619-1114

Professional Summary

- Senior Business Analyst and Product Owner with 12 years of experience delivering high-impact solutions across Healthcare, Medicaid, Medicare, Insurance, Legal, Manufacturing, and Enterprise IT systems. Proven expertise in agile methodologies, requirements engineering, stakeholder management, and leading cross-functional teams to drive business value and regulatory compliance.
- Expert in Agile (Scrum, Kanban, SAFe) with comprehensive experience in Sprint Planning, Backlog Grooming, User Story creation, Acceptance Criteria definition, and cross-functional team collaboration
- Proficient in translating complex business needs into actionable requirements through JAD sessions, stakeholder interviews, workshops, process modeling, and workflow optimization
- Skilled in end-to-end requirements engineering: BRD, FDD/TDD, Technical Use Cases, User Stories, Epics, Business Cases, RTM, Test Cases, Process/Data Flow Diagrams, and FIT-GAP Analysis
- Strong Product Ownership experience leading product vision, roadmaps, OKRs, KPIs, and outcome-driven delivery across Healthcare, Medicaid, Medicare, Commercial Insurance, and Salesforce ecosystems
- Deep domain expertise in Healthcare: Eligibility, Enrollment, Claims, Billing, Part-D COB, Vaccine Management, CDC Standards, HL7 v2.x, Immunization Information Systems (IIS/CHIRP), Childcare system, Reconciliation
- Extensive QA leadership in manual/automation testing, test strategy, master test plans, RTM, regression, UAT, SIT, API testing (Postman/SOAP UI), ETL testing, and SQL-based validation
- Technical proficiency in SQL, APIs, ETL, Data Warehouse, Salesforce, ERP, .NET, Java, PEGA, Cloud applications, and system integration testing
- Experienced in Investment Banking projects specialized in Financial Markets, Capital Markets, Wealth Management, and Risk Management.
- Expertise in Software Development Life Cycle (SDLC) methodologies like Agile (Scrum, Test Driven Development, Kanban), Waterfall, Scrum-Waterfall Hybrid
- Transforming Business requirements to Functional requirements, providing Value-based solutions to businesses.
- Experience in Equities, Fixed Income, Bonds, Foreign Exchange, Derivatives (Swaps, Future, Options) and AML Monitoring.
- Creating and maintaining business process flows (As-Is, to-be), and system flow/activity diagrams. Specifying UI requirements and generating software requirement specifications (SRS) documents.
- Performing GAP analysis and documenting the solution in the form of FRD, FSD, and SRS.
- Involved in discussions with stakeholders, SMEs, system architects, and technical teams through channeled/phased meetings and Joint Application Development (JAD) sessions.
- Specialized knowledge in healthcare platforms like FACETS (QNXT), including expertise in claims processing, member management, and provider systems.
- In-depth understanding of HIPAA transaction codes such as 270/271, 276/277, 835, 837, and 834, ensuring compliance with healthcare regulations.
- Identified various interfacing systems and created a context diagram and a spreadsheet with various information.
- Experience in migrating on-premise applications to Azure Cloud
- Proven ability to lead cross-functional teams through the full software development Known for streamlining operations through automation and delivering customer-centric IVR and cloud contact center solutions using NICE CX and Genesys Cloud CX.
- Passionate about harnessing AI tools like Microsoft Copilot to enhance team productivity, decision-

making, and operational efficiency. As a Senior Scrum Master, mentored junior Scrum Masters and Agile team members, promoted best practices in facilitation, estimation, and iterative delivery across enterprise programs.

- Led agile transformation initiatives by standardizing sprint metrics, implementing team health checks, and driving adoption of scaled agile frameworks for multi-team coordination.

Key Skills & Technologies:

Tools & Platforms: JIRA, Azure DevOps, MS Project, SharePoint, TFS, Power BI, Tableau, SQL, ServiceNow, Guidewire, NICE CXone, Genesys Cloud CX, Microsoft Copilot

Delivery Approaches: Agile (Scrum/Kanban), SAFe (Scaled Agile Framework), Waterfall, Hybrid Delivery

Technical Proficiencies: Business Process Modeling, UAT, QA Automation, IVR/Telephony Integration, Data Visualization, and Advanced SQL for data validation

Agile Leadership: Sprint planning and execution, Backlog grooming, User story refinement, Agile ceremonies facilitation (daily stand-ups, retrospectives, reviews), impediment resolution, velocity tracking, stakeholder engagement, and cross-functional team leadership

Product Ownership: Backlog management, Roadmap definition, Feature prioritization, Stakeholder alignment, Release planning, Value-driven delivery, Writing and refining user stories, and translating business goals into technical requirements

Business Domains: Healthcare (Medicaid/Medicare), Insurance, Financial Services, Retail

Professional Experience:

State of Wisconsin, Madison, WI

Feb 2023 – Present

Department of Health Services

Lead Business Analyst/ Project Manager

Responsibilities:

- Led dual role as Product Project Manager and Senior Business Analyst, driving product strategy, requirements definition, and delivery execution for Medicare, Medicaid, Immunization Information Systems (IIS), and public health programs
- Collaborated with cross-agency, state, and federal stakeholders to align product vision, regulatory requirements, and business objectives across large-scale healthcare initiatives
- Elicited and analyzed requirements from business owners and SMEs, translating them into detailed Epics, Features, User Stories, and Acceptance Criteria in Azure DevOps (ADO)
- Streamlined cross-functional collaboration by managing project intake, approvals, workflow routing, and delivery tracking across enterprise Health Department teams using ADO
- Partnered with Scrum Masters and development teams to prioritize and refine product backlog, ensuring alignment with business goals, sprint capacity, and release timelines
- Coordinated with IS technology partners, immunization program staff, CDC, AIRA, and external agencies to ensure IIS alignment with CDC IIS Functional Standards and PHII Functional Model
- Led product ownership for Provider Management (Eligibility, Enrollment, Denials), Annual Training, Compliance Site Visits, Storage Unit Management, Dashboards, Reports, and Fraud & Abuse modules
- Resolved data quality issues (duplicate providers, incorrect merges, invalid vaccine records) by collaborating with IT, CHIRP, database teams, and immunization program staff
- Served as SME for CMS compliance reporting, dashboards, reconciliation logic, and regulatory data submissions
- Analyzed functional specifications for Medicaid/EDI platform and created detailed test scenarios to validate end-to-end claim processing and adjudication workflows
- Gathered requirements with stakeholders to clarify Medicaid business rules, eligibility logic, payment policies, HIPAA requirements, and EDI 837/835/270/271 standards

- Created detailed UAT test scripts for Medicare scenarios and validated sprint deliverables, coordinating with business users to resolve defects and secure stakeholder sign-off
- Delivered product demos and ensured Meaningful Use compliance by managing data submissions from providers and adhering to public health standards.
- Designed and implemented an AI Copilot framework using Microsoft Copilot, Power Automate, and Azure OpenAI, streamlining business operations, automating user assistance, and guiding workflows to reduce response time and manual errors.
- Developed a Business Analyst Copilot leveraging Microsoft Copilot in Word and Teams, automating meeting notes, documentation, and user story generation—boosting the BA team productivity.
- Delivered interactive dashboards and visualizations using Power BI, Tableau, and SQL Server Reporting Services (SSRS) to provide real-time insights into case file performance and operational risks for executive decision-making.
- Managed defect lifecycle using JIRA and TFS, ensuring timely resolution and thorough root cause analysis
- Performed API testing using Postman and SOAP UI, validating data exchange between healthcare systems
- Conducted SQL-based backend testing to validate data integrity, business logic, and ETL processes
- Maintained Requirements Traceability Matrix (RTM) to ensure complete test coverage and regulatory compliance
- Led UAT coordination with business users, facilitating testing sessions, documenting results, and securing final approvals
- Oversaw QA and UAT activities using Test Rail, Azure DevOps, and Selenium, coordinated training via LMS365 and SharePoint, and provided post-launch support to ensure seamless adoption.

Environment: Power BI, Tableau, MS Office Suite, SQL, JIRA, FACETS, Service Now, On Base, UiPath Orchestrator, Confluence, Microsoft AZURE cloud, Azure Logic Apps API, Cloud Computing, Visual Studio Code, UML – MS Visio, Mongo DB, Jenkins, Power BI, Azure Monitor, FinTech, JIRA

Ally Financial Inc, Charlotte, NC
Sr. Business Analyst

Jul 2019 – Dec 2022

Responsibilities:

- Owned and prioritized product backlogs for multiple banking initiatives using Jira and Azure DevOps, ensuring alignment with business goals and timely delivery of high-value features across regulatory and customer-facing domains.
- Collaborated with IT and engineering teams to implement IVR solutions using NICE CXone, Postman for API testing, and Twilio Studio for call flow design—reducing call wait times and improving customer satisfaction metrics.
- Developed executive dashboards using Power BI, Tableau, and SQL Server, visualizing product performance, customer engagement trends, and operational KPIs for leadership decision-making.
- Led UAT planning and execution using Test Rail, Azure DevOps, and Excel, including test case creation, defect triaging, and stakeholder sign-off.
- Acted as a bridge between business and technical teams, enabling continuous feedback loops and rapid iteration through Teams channels, Jira comments, and Copilot-generated meeting summaries.
- Integrated mortgage servicing systems with P&C insurance providers.
- Managed the deployment of an AML Sanctions Screening solution by integrating Fircosoft into payment channels, refining fuzzy logic matching parameters, and collaborating with business users to eliminate false positives without compromising regulatory coverage.
- Led Agile teams to extend Loan IQ reporting with Power BI and SSRS, building dashboards that aligned credit decision workflows with enterprise-wide data governance.

- Coordinated UAT and regression testing for new back-office modules in Capital Markets, creating test scripts in HP ALM and executing validations across collateral, cash, and settlement processes, ensuring smooth production releases.

Environment: MS Project, MS Visio, Windows 10, MS Office Suite, Oracle 12c, Angular 6.0, Enterprise JIRA, Confluence, SharePoint, Azure cloud, QTest.

State of Georgia, Atlanta, GA
Department of Human Services
Sr. Business Analyst

Sep 2017 – Jun 2019

Responsibilities:

- Performed the requirement analysis for the gathered requirements, conducted impact analysis, and documented the functional specification document.
- Translated stakeholders need into clear requirements, EDI mapping specifications, user stories, and acceptance criteria while ensuring HIPAA compliance
- Facilitated sprint planning sessions, ensuring development teams understood Medicaid workflows, EDI flows, denial scenarios, and security considerations
- Authored SQL/T-SQL/PL/SQL queries to validate Medicaid claim data, EDI transactions, provider details, eligibility, and payment results
- Coordinated UAT and Go-Live activities, validating real-world claim scenarios and ensuring production adherence to HIPAA privacy and security requirements
- Created detailed EPICs, user stories, and acceptance criteria using JIRA and Confluence.
- Coordinated with developers to configure and test SOAP/REST APIs for data exchange and response parsing.
- Worked closely with Product Owner, developers, Guidewire consultants, QA, and Support teams to ensure smooth data integration and testing process.
- Supported output customization using Guidewire Document Production tools and integration with third-party print/email services.
- Ensured that all ACORD forms met regulatory requirements and DOI guidelines
- Experienced with help desk ticketing systems like ServiceNow, Zendesk, and JIRA Service Desk to manage user requests and ensure timely resolutions per SLAs.
- Wrote SQL scripts for creating performance evaluation reports related to healthcare data. Gathering business requirements and documenting functional requirements through JAD sessions, workshops, and user interviews with the business stakeholders, business process owners, and subject matter experts (SME's).
- Integrated mortgage servicing systems with P&C insurance providers.

Environment: SQL, MS Office, MS excel, Congo's, Oracle 12C MS Visio, Jira, Balsamiq, SharePoint, Confluence pages.

INFONIQ, India
Business Analyst

Jul 2011 – Apr 2015

Responsibilities:

- Delivered end-to-end Waterfall SDLC experience for CMS applications, including requirements, design, development, testing, and deployment
- Elicited and documented requirements through BRD, FRD/FRS, functional specifications, use cases, and process flow diagrams
- Performed GAP analysis and supported business process reengineering to improve operational efficiency and system alignment
- Developed Java-based applications by implementing business logic, integrating UI components, and optimizing database interactions using JDBC/ORM

- Maintained Requirements Traceability Matrix (RTM) and executed functional, integration, regression, and UAT testing
- Provided training, mentoring, and knowledge transfer to junior team members and end users
- Collaborated with business stakeholders to define product vision and gather requirements, translating them into well-structured user stories with clear acceptance criteria for Guidewire policy center, claim processing and underwriting workflows.
- Delivered full-cycle system deployments by managing test plans, executing regression and integration tests using SoapUI and Load Runner, and validating performance benchmarks across web and IVR platforms.
- Facilitated stakeholder demos and release planning sessions using Microsoft Project, SharePoint, and WebEx, aligning delivery timelines with business priorities and ensuring smooth rollout and user adoption.
- Worked with the complete SDLC in the context of healthcare, eliciting, analyzing, and defining healthcare-specific requirements.
- Worked on the improvement of the Claims Reimbursement User Interface in the healthcare domain, incorporating changes as per HIPAA 4010/5010 guidelines using gap analysis.
- Prepared EASP plans and Integration plan for integration FACETS application with EDS applications hosted on cloud using Azure integration services.

Environment: Windows 2008 Server, MS-Office 2013, MS Visio 2013, MS SharePoint 2013, Agile, Finacle, MS SQL Server.

Education:

Bachelor of Information Technology, Dr. Mahalingam College of Engineering and Technology – Pollachi, India 2000 – 2003

Certifications:

Scrum Master PSM 1
