

Hari Ganesh Rajavel

+1 (479) 268-1602 | hariganesheee@gmail.com | www.linkedin.com/in/hari-ganesh-rajavel-a4775427/

Professional Summary

Senior Software Quality Engineer with 13+ years of IT experience, specializing in test automation, quality engineering, and CI/CD pipelines. Proven expertise in designing, evolving, and scaling automation frameworks for large enterprise applications across web and backend platforms and enough working knowledge of the Software Development Lifecycle. Skilled in automation tooling like Playwright, Cypress, Selenium, API automation, and JavaScript/TypeScript test development. Adept at integrating and enhancing CI/CD pipelines with Jenkins, GitHub to ensure fast, reliable releases.

Key Achievements

- **Reduced test execution time from 3 hours to less than an hour** by migrating 300+ regression cases from **WebdriverIO to Playwright**, minimizing false failures and improving release timelines.
- **Led QA transformation** for modernization projects, including ATG CSC to Oracle BUI migration, improving time-to-user and system reliability.
- **Mentored and managed QA engineers** across 4+ applications, improving delivery efficiency and ensuring adherence to QA best practices.
- Developed and executed **end-to-end test strategies for distributed systems, integrating UI, API, performance, and nonfunctional testing**.
- Drove QA ownership for Omni channel initiatives **across 5+ platforms**, improving pre-release **defect detection by ~40%** and ensuring cross-system accountability.

Technical Skills

- Test Automation Tools: Playwright, Selenium, WebdriverIO, Cypress
- Languages: JavaScript (ES6+), Java, TypeScript
- API Testing: Postman, Playwright, RestAssured
- BDD Frameworks: Cucumber
- Cloud Platforms: GCP, Azure
- CI/CD & DevOps: Jenkins, GitHub Actions, Docker, Looper
- Databases: PL/SQL, SQL Server, DB2, Teradata
- Version Control: GitHub
- Reporting & Metrics: Splunk, OpenObserve, ServiceNow
- Methodologies: Agile (Scrum)
- Test Tracking: Jira, Xray.

Professional Experience

Infobahn Softworld, Inc. | Macy's – Duluth, GA

Technical Test Lead | Sep 2025-Present

- **QA Lead & Onsite Coordinator** for Macy's Pricing platform, leading a **20-member global QA team** and partnering with product, engineering, and DevOps to drive end-to-end quality.
- Owned **end-to-end test strategy** for a middle-layer pricing system, implementing clean and maintainable test code for **UI automation with Playwright, POM and fixtures** and **API/backend automation with Rest assured QAF** across frontend and microservices.
- Led QA for the **pilot launch of a critical Promotion application**, achieving a **zero production-defect release** through strong test coverage and release readiness.
- Designed and executed an **automation stabilization strategy**, reducing **~1,400 failing scripts by ~50% within two months** using AI tools like CodeGen and **Playwright MCP servers**, significantly improving CI pipeline reliability.
- Coordinated testing for **GCP-deployed services**, Running tests in Kubernetes test runners; experience with GCP for test infrastructure.
- Designed and executed **data validation strategies** for a middleware application, ensuring end-to-end data integrity across **BigQuery, PostgreSQL, and scheduled DAG pipelines** supporting business-critical workflows.

- Implemented Shift Left testing which achieves in sprint automation by using api response mocking, and service virtualization and complete the testing once the api development is completed and handed over to the QA team.

Infobahn Softworld, Inc. | Sam's Club – Bentonville, AR

Software Engineer | Aug 2023 – Aug 2025

- Worked on POC to migrate the automation framework from **Webdriver IO to Playwright** which improved regression coverage by 85% and reducing the automation time by 50%.
- Constructed **QA dashboards to track performance metrics** including automation coverage, defect leakage, and efficiency.
- Acted as **Release Lead**, coordinating regression, production deployments, and post-release traffic monitoring to ensure the Production Operations and other metrics are looking good.
- Worked on **Root Cause Analysis and Impact Analysis for production issues** reported in ServiceNow, analyzed and updated the test strategy and automation to overcome similar issues in future.
- Incorporated Cucumber BDD to the automation framework for Business and product owners to review the test cases and better understanding of the test scenarios covered.
- Being **SME** in the contact center application, coordinated with cross-functional teams like Product, Developers, business end user teams to maintain quality and ensure adherence to QA processes and facilitated UAT with the Business team.
- Reduced manual coding and review effort and test case creation efforts using **AI programming tools like GitHub Copilot, qodo merge, Walmart's gen AI** tools etc.
- Optimized CI/CD pipelines using Jenkins, reducing build time from 40 mins to 15 mins, saving ~ 20 developer hours per week and enabling fast feedback, parallel execution, flaky test management

Infosys Ltd | Sam's Club India / Bentonville, AR

Technical Test Lead | Jul 2020 – Jul 2023

- **Managed QA teams in large-scale modernization**, defining test strategies for UI, API, and integration testing.
- Developed automation **frameworks with WebdriverIO** for regression and integration tests and **ensured 85% automation coverage**.
- Followed **Test Driven Development** and implanted automation at early stage of the SDLC so that **identified around 25% of UI related and API related defects** early in the cycle.
- Collaborated with product owners and stakeholders to ensure quality, on-time releases, and minimal defect leakage.
- Automated the test data creation and refreshment activities to saved about 5 hours of manual effort of test data creation/replenishments.
- Implemented Code quality using tools like Prettier, SonarQube and incorporated in the CI/CD process in the Jenkins.

Infosys Ltd | JCPenney – RMS PO – Plano, TX

Test Analyst | Dec 2017 – Jun 2020

- Authored test strategies and executed functional, regression, and **E2E testing for Oracle suite integrations**.
- Performed backend validation using **SQL queries and ETL data** checks to ensure data accuracy.
- Tracked QA metrics such as defect density, leakage, and testing efficiency for stakeholder reporting.
- Ran and **monitored ETL Pipeline** and validated the data processed in the desired systems such as Inventory updates, DLC shipments etc.
- Designed and executed **data mapping test cases** to ensure field-level transformations aligned with business rules.
- Conducted **incremental load and historical data validation** to confirm system stability over multiple cycles.
- Collaborated with data engineers to debug ETL job failures and ensure SLA adherence.

Infosys Ltd | JCPenney – Digital Platform – India / Plano, TX

Test Analyst | Aug 2012 – Nov 2017

- Automated testing for **RWD Mobile applications** using **QAF Framework** using **Selenium, TestNG, Java, and Cucumber**.
- Led offshore QA teams, mentoring junior engineers and promoting Agile QA practices.

- Executed manual and automated testing for customer facing **iOS and Android** e-commerce mobile retail application using **Appium**.
- Performed manual exploratory testing to identify UI/UX issues to ensure a rich Customer Experience.
- **Applied BDD (Cucumber)** to align test cases with business requirements for better traceability and collaboration.
- Built **CI/CD pipeline using Jenkins** to automate the build, automation and deployment processes.
- Developed proof-of-concepts for automation using **Selenium with DB integration**.
- Performed functional (WCAG), accessibility, cross-browser/device, and basic performance testing.
- Created and maintained the **Golden test data** for the team.
- Worked on accessibility testing of the web application adhering to standards like the **Web Content Accessibility Guidelines (WCAG)**.

Infosys Ltd

System Engineer Trainee | Nov 2011 – Jun 2012

- Completed training in Java, Oracle RDBMS, and software validation methodologies.

Education

Bachelor of Engineering (Electrical & Electronics) | Anna University, Chennai, India – 2007 - 2011

Certifications

- Infosys Certified Selenium Basic Automation Tester
- Infosys Certified Java SE8 Developer -101
- Infosys Global Agile Certification
- Essential Google Cloud Infrastructure: Foundation
- ISTQB Testing with Generative AI Certification – In progress
