

HARSHITHA NEERUKONDA

Dallas, TX | +1 (903)-744-8341 | harshitha.neerukonda02@gmail.com | [LinkedIn](#)

SUMMARY

Business Analyst / Technical Business Analyst with 4+ years of experience in requirements elicitation, **BRD, FRD, User Stories**, and Requirement Traceability Matrix (RTM) within **Agile SDLC** environments. Strong expertise in **SQL-based data validation, API integration requirements, source-to-target mapping**, and cross-system workflow documentation across **Dev, QA, and Prod** environments. Experienced in **UAT coordination**, defect tracking in **Jira**, process mapping using **Visio**, and backend verification to support structured system releases and stakeholder signoff.

PROFESSIONAL EXPERIENCE

Business Analyst Uber

January 2026 – Present
USA

- Gathered 16 functional requirements through structured interviews with business users and system leads in **Jira**, defining acceptance checkpoints for **1 CRM enhancement initiative** during sprint intake discussions.
- Mapped **3 operational workflows** into current and future-state diagrams using **Visio**, outlining key decision rules and exception paths to support engineering estimation during planning cycles.
- Compiled trace references for 21 requirement items against **14 validation scenarios** within **Confluence**, organizing documentation for Dev and QA walkthrough sessions prior to structured build reviews.
- Reviewed 9 backend comparison checks using **SQL** field-level queries across 2 application modules, flagging **6 data inconsistencies** before scheduled system validation checkpoints.
- Tracked 11 acceptance cases and 8 logged defects within **Jira**, coordinating clarification feedback between **4 business testers** and **3 developers** before and after 1 planned deployment window across QA and Prod validation checkpoints.

Business Analyst Dell Technologies

September 2022 – December 2023
India

- Directed requirement consolidation across **3 enterprise initiatives** by documenting functional and non-functional specifications in formal **BRD/FRD artifacts within Jira**, aligning scope expectations during stakeholder and leadership walkthroughs.
- Structured **9 cross-application workflows** through detailed process diagrams in **Visio**, defining business rules and resolving requirement conflicts during architecture and technical design review sessions.
- Established end-to-end trace coverage for **80+ system requirements** within **Confluence**, maintaining alignment across Dev, QA, and Prod environments during **4 production releases** in Azure-hosted applications.
- Formulated transformation logic for **14 data entities** through field-level source-to-target specifications using **SQL**, standardizing attribute mappings across integrated system builds.
- Inspected **40+ backend validation scripts** and reconciliation outputs using **SQL**, identifying data misalignments through structured root cause analysis before scheduled deployment milestones.
- Administered full user validation cycles involving **60+ acceptance cases** and tracked defects in **Jira**, facilitating business signoff discussions across enterprise rollout phases.

Business Analyst Robosoft Technologies

November 2019 – August 2022
India

- Analyzed **50+ operational data elements** across marketing and product systems using **SQL**, performing root cause analysis on process bottlenecks and documenting corrective requirements that informed phased enhancement cycles.
- Documented **5 end-to-end business** workflows and 26 supporting rules within structured requirement files in **Confluence**, standardizing handoff material for **4 development squads** during quarterly release planning.
- Facilitated **18 requirement clarification sessions** between product owners and 6 engineers, converting discussion notes into **43 defined user stories** within **Jira** before sprint allocation.
- Configured **7 validation templates** and **19 metric checkpoints** within **Power BI**, organizing acceptance visibility for **3 internal reporting** modules prior to stakeholder review meetings.
- Assessed 24 user validation cases and 13 logged discrepancies during controlled test walkthroughs, recording resolution notes in **Jira** before **2 scheduled feature deployments**.
- Drafted **8 functional interface notes** outlining data exchange logic between internal applications using structured mapping sheets in **Excel**, clarifying field dependencies before engineering implementation.
- Investigated 15 requirement change **requests** through impact reviews in **Jira**, outlining **9 downstream dependency adjustments** before sprint backlog re-prioritization discussions.

TECHNICAL SKILLS

- **Business Analysis:** Requirements Elicitation, BRD, FRD, User Stories, Acceptance Criteria, RTM, Use Cases, Business Rules, Change Impact Analysis, Root Cause Analysis, As-Is / To-Be Analysis, SOP Documentation
- **Technical & Systems:** API Integration Requirements, Source-to-Target Mapping, Interface Control Documentation (ICD), Technical Requirement Documentation (TRD), Logical Data Modeling, Data Dictionaries, Cross-System Workflows, Validation Rules
- **Programming & Databases:** SQL, Azure SQL, Amazon Redshift
- **Data Validation & Reporting:** Data Reconciliation, Backend Verification, Exception Analysis, Power BI, Excel
- **Tools:** Jira, Confluence, Visio, Salesforce CRM
- **Cloud Platforms:** Microsoft Azure, Amazon Web Services (AWS)
- **Methodologies:** Agile, Scrum, SDLC, Sprint Planning, Backlog Grooming, User Acceptance Testing (UAT), Dev / QA / Prod Coordination, Production Support

EDUCATION

Master of Science in Business Analytics & Artificial Intelligence	January 2024 – December 2025
University of Texas at Dallas	Texas
