

Hemanth Isaac Prabhakar Dupati

Marketing Data Analyst

hemanth@itjobinbox.com | 512-265-6370 | TX

SUMMARY

Marketing Data Analyst with 4+ years of experience in leveraging data analytics, statistical modeling, and visualization to drive marketing performance and ROI optimization. Skilled in developing Marketing Mix Models, Multi-touch Attribution, and Forecasting frameworks using Python, R, and SQL. Adept at transforming raw marketing data into actionable insights through automated dashboards in Tableau, Power BI, and Streamlit, supporting data-informed decision-making across digital, CRM, and paid media channels. Proficient in tools including Google Analytics 4, Adobe Analytics, Salesforce, and Snowflake, with proven expertise in incrementality testing, ROI optimization, and customer segmentation.

SKILLS

Methodologies: SDLC, Agile, Waterfall
Programming & Data Analysis: Python (Pandas, NumPy, scikit-learn, PyMC, cvxpy, Prophet, ARIMA, Plotly, Streamlit), R (R Studio, Markov Chains, Shapley), SQL, Excel (PivotTables, VLOOKUP)
Marketing Analytics: Marketing Mix Modeling, Multi-touch Attribution, Forecasting & Time Series, Incrementality & Geo-split Testing, ROI Optimization, Customer Segmentation, Funnel Analysis
Visualization & Reporting: Tableau, Power BI, Google Data Studio, Streamlit, Plotly, Automated Dashboards
Digital Marketing Tools: Google Analytics (UA, GA4, Firebase), Adobe Analytics, Google Tag Manager, Microsoft Clarity, Shopify, Sprinklr, SEO/SEM, PPC, Social Media Analytics (Meta, LinkedIn), Mailchimp, A/B Testing
CRM & Automation: Salesforce, HubSpot, Marketo
Other Tools: Snowflake, Figma, Adobe Creative Suite, Canva, MS Office Suite
Methodologies: Agile, SDLC, Waterfall

EDUCATION

Master of Science in Information Technology University of Cincinnati, Ohio, US	Dec 2024
Bachelor of Technology in Electronics and Communication Engineering B V Raju Institute of Technology- Narsapur, Telangana, India	July 2022

EXPERIENCE

MetLife, TX | Sep 2024 - Current | Marketing Data Analyst

- Designed and implemented marketing mix models (MMM) using Python and R to quantify channel effectiveness, improving overall marketing ROI by 18%.
- Conducted multi-touch attribution (MTA) analyses leveraging Google Analytics 4 and Adobe Analytics to assess user journey impact across digital channels.
- Developed automated Tableau and Power BI dashboards integrating data from Snowflake and Salesforce to deliver real-time marketing performance insights.
- Partnered with cross-functional teams to perform incrementality and geo-split testing, guiding budget optimization across paid media campaigns.
- Utilized time series forecasting (ARIMA, Prophet) for lead and conversion prediction, supporting quarterly revenue planning.
- Streamlined campaign performance reporting by automating ETL pipelines in Python and SQL, reducing manual data preparation time by 40%.

Orion Technolab, India | Dec 2019 – Aug 2023 | Marketing Data Analyst

- Designed and deployed data-driven marketing analytics solutions to optimize client acquisition and retention strategies across e-commerce and digital platforms.
- Executed customer segmentation and funnel analysis using R and SQL to identify high-value cohorts, driving targeted marketing efforts.
- Developed forecasting and ROI optimization models using Python (Pandas, NumPy, scikit-learn) for multiple international clients.
- Built and maintained interactive dashboards in Tableau and Power BI for executives, enhancing visibility into campaign performance metrics.
- Managed A/B testing and incrementality studies across paid search and social channels, informing creative and bidding strategies.
- Collaborated with teams to implement Google Tag Manager and GA4 tracking frameworks, ensuring data accuracy and completeness.
- Created automated marketing reports using Streamlit and Plotly, improving stakeholder access to KPIs and conversion insights.
