## Work Experience

**ASYNCH SYSTEMS PVT LTD**  
**SOFTWARE TEST ENGINEER**  
**DATE]**

**[APRIL 2021 TO TILL THE**

### Responsibilities

- Result-oriented Software Test Engineer with **4.2 years** of hands-on experience in **Manual Testing and Automation Testing** using Java-based frameworks.
- Strong experience in **Selenium WebDriver, TestNG, Cucumber, Robotics framework, Rest Assured (API Testing)** and **Maven**.
- Having extensive knowledge in **STLC, SDLC**.
- Skilled in preparing Test Scenarios, Test Cases, Test Execution, Defect Reporting, and maintaining comprehensive documentation.
- Understood the minutiae about the system concerned, developed and executed the Test Cases against each Business requirements.
- Experienced in CI/CD processes using Jenkins, version control using GitHub, and development environment using Eclipse.
- Ensured 100% Bug Reporting using Defect Tracking System to avoid any unrecorded communication regarding software testing.

- Involved in different types of Testing like **Functional Testing, System Testing , Regression Testing, Retesting, Exploratory Testing, Smoke Testing, Sanity Testing, Adhoc Testing.**
- Strong in **Boundary Value Analysis and Equivalence class Partitioning.**
- Worked on **QATRAQ** product to prepare test cases.
- Designed **SIT & UAT Test Scenarios and Test Cases.**
- Involved in peer review for the designed cases.
- Good Experience in Design and Execution of Test Cases.
- Good in writing Automation Test Scripts (X- path, Actions (Mouse handling).
- Ability to Automate Web Application using Web Driver in Eclipse.
- Strong working knowledge in handling different types of **pop-up's & Frames.**
- Good knowledge in Keyboard **Handling, Mouse Handling.**
- Software automation in **TestNG , Cucumber** and **Robotic Framework.**
- Well versed with Test Planning & Team formations by following risk factors.
- Strong in **Test Scenarios & Test cases document writing by following Block box testing techniques.**
- Automated functional test cases using **Qatraq** in **hybrid framework** for regression cycles.
- **Hands on experience in defect reporting & tracking.**
- Involvement experience in review meetings and preparation of daily, weekly and monthly review reports including RTM.
- Strong in Communication & Team co-ordination.

| <i>Technical Skills</i>        |                                                                                      |
|--------------------------------|--------------------------------------------------------------------------------------|
| <b>Build Automation Tools</b>  | <b>: Maven, Selenium WebDriver Using Java, API using Postman &amp; Rest Assured</b>  |
| <b>Testing Framework</b>       | <b>: TestNG, Cucumber, Robotics</b>                                                  |
| <b>Data Base</b>               | <b>: MySQL</b>                                                                       |
| <b>Programming Language</b>    | <b>: JAVA</b>                                                                        |
| <b>Operating Systems</b>       | <b>: Windows and Linux</b>                                                           |
| <b>Version Control</b>         | <b>: GitHub</b>                                                                      |

| <b>CI/CD Tools</b>             | <b>: Jenkins</b>                                                                     |
| <b>IDEs</b>                    | <b>: Eclipse</b>                                                                     |
| <b>Web Technologies</b>        | <b>: JDBC</b>                                                                        |
| <b>Defect management tools</b> | <b>: Gitlab</b>                                                                      |
| <b>Testing Applications</b>    | <b>: MotioCI, ReportCard and Soterre</b>                                             |

*Professional / Educational Qualification*

**: UG-BCA from** Kumararani Meena Muthiah College of Arts and Science **[2019]**  
**with 72%**

*PROJECT IMPLEMENTED*

**Product Used for Testing:** MotioCI

**Modules Involved:** Version Control, Deployments, API, Change Management and Reporting.

**Product Description:** MotioCI provides Cognos authors and administrators with new capabilities including faster upgrades, change management & version control, faster deployments, automated testing and improved cleanup.

**Product Used for Testing:** ReportCard

**Modules Involved:** Assessment, Load Test, System monitoring, BI Environments and Documentation.

**Product Description:** ReportCard will help you to spot future problems before they occur. And it seamlessly integrates with Cognos and can simulate actual user behaviour, excluding possible culprits and helping you get to the root of the problem.

**Product Used for Testing:** Soterre

**Modules Involved:** Streams, Deployments, Tags, filters and Qlik sense objects.

**Product Description:** Soterre provides automation and oversight of the continuous delivery process for a trusted Qlik Sense experience. Get analytics with a full range of augmented capabilities: Reduces Qlik Sense delivery production time. Streamlines workflows and traceability across apps, sheets and Stories.

**My Responsibilities:**

- Understanding business requirements, functional specifications, and technical design documents.
- Designing Test Scenarios, creating detailed Test Cases, and executing test cycles across multiple Cognos environments.
- Conducting Functional, Regression, Smoke, Integration, and Ad-hoc testing.
- Performing detailed end-to-end testing for Version Control, Change Management, Deployment workflows, Reporting, and API modules.
- Validating CI/CD operations and ensuring Jenkins-triggered deployments work without errors.

- Conducting API testing using Postman & Rest Assured for backend validation.
- Performing root-cause analysis for issues related to environment synchronization, version mismatches, and deployment failures.
- Coordinating with Developers, QA team, and Product Owners during Agile ceremonies (Sprint Planning, Grooming, Retrospective).
- Maintaining test documentation including Test Scenarios, Execution Reports, Bug Reports, Traceability Matrix, and Release Notes.
- Supporting production release testing, hotfix validation, and customer feedback resolutions.
- Contributing test insights to improve product stability, enhance automation coverage, and reduce manual efforts.

### **ACHIEVEMENTS**

- Recognized by management for ensuring 40% reduction in upgrade testing time through efficient test scenario optimization.
- Successfully automated key API workflows improving team productivity during release cycles.
- Played a major role in stabilizing deployment workflows for Cognos upgrade cycles.
- Appreciated for detecting multiple high-priority issues during pre-production testing.
- Consistently delivered high-quality test results with zero major defects during production rollout.

### **DECLARATION**

I hereby declare that the above-given information is true and correct to the best of my knowledge and belief.
