

Profile

Healthcare operations and analytics professional with deep experience in EHR implementation, enterprise onboarding, and Salesforce-based SaaS platforms. Led 19 high-value go-lives; built dashboards and analyzed adoption, CSAT, and escalation trends to drive measurable improvements. Known for translating complex healthcare workflows into structured, data-informed execution.

Work Experience

Neuro Emotional Technique (NET) Therapy | Practice Operations & Data Assistant (PT) | Sep 2025 to Present

- Manage and maintain healthcare practice data across ClinicMind EHR, ensuring accurate records, organized workflows, and consistent documentation.
- Track engagement and performance metrics across social platforms and Google Business, identifying trends to support patient outreach and awareness.
- Support operational reporting through organized contact lists, appointment follow-ups, and digital file management.
- Maintain accuracy of online listings and reviews, ensuring consistency across platforms and improving practice visibility.
- Assist with website updates (WordPress/Divi), supporting structured content organization and data consistency.
- Contribute to process improvement by standardizing digital assets, workflows, and communication templates.

ClinicMind | High-Value Onboarding Account Manager | Feb 2025 to Sep 2025

- Managed onboarding workflows and client documentation within Salesforce CRM, utilizing dashboards, Flows, and Chatter to track milestones and escalations.
- Partnered with Product, Engineering, and Compliance to translate workflow data into provider-ready implementation steps.
- Standardized credentialing and data validation processes, reducing rework and improving data accuracy.
- Maintained >95% on-time go-lives through milestone tracking and risk monitoring.

ClinicMind | Client Education Specialist Level 2, Team Lead | Aug 2024 to Feb 2025

- Built and maintained live dashboards tracking adoption, CSAT, escalations, and handle time to support leadership decision-making.
- Analyzed QA and call data to improve efficiency, reducing average handle time ~30%.
- Designed a structured trainer progression model using performance metrics and readiness indicators.
- Supported operational reviews by surfacing trends and performance insights.

ClinicMind | Learning & Development / Client Education Specialist | Apr 2021 to Aug 2024

- Created analytics-informed microlearning programs; analyzed ticket volume and usage trends to reduce “how-to” requests by ~100/month.
- Developed SOPs for credentialing, data conversion, and RCM, improving workflow consistency and audit outcomes.
- Measured feature adoption post-release and reported early performance indicators to stakeholders.
- Embedded HIPAA and compliance checkpoints into training systems, contributing to a 15% YoY drop in audit findings.

Skills/Tools

- Customer Success & Onboarding: Enterprise onboarding, stakeholder management, milestone tracking, QBR support, renewals, hypercare
- Implementation & Change: Discovery, requirements, workflow translation, data conversion, go-live, RACI/RAID
- Salesforce: CRM case management, onboarding workflows, Flows, Chatter, dashboards & reporting, approval routing, task & escalation tracking
