PROFESSIONAL SUMMARY:

- Over **12+ years of experience** as a **Data Engineer**, specializing in **Cloud Data Engineering, Microsoft Business Intelligence (MSBI – SSIS, SSRS, SSAS), and Power BI/Tableau development**. Extensive expertise in SSIS (10 years) for data integration, SSRS (6 years) for reporting and analytics, and Azure (5+ years), including **Azure Data Factory, Databricks, Azure Data Lake and Azure SQL Database**.
- Strong background in **ETL pipeline development, cloud-based data solutions, and analytical dashboarding**.
- Hands-on experience in **Power BI/Tableau** for creating visualizations, dashboards, and data storytelling to drive business insights.
- Experience in **Power BI/Tableau Server administration**, performance tuning, and security management.
- Proficient in **SQL, Python (PySpark), and automation** of data ingestion and transformation processes.
- Hands-on experience in **containerization using Docker** and building **CI/CD pipelines** for cloud-based applications.
- Proficient in developing **Power Apps** for business process automation and **Power Automate** workflows for streamlining approvals, notifications, and integrations across enterprise systems (e.g., SharePoint, Outlook, and Teams).
- Experienced in **SharePoint administration** and maintenance, including site creation, permission management, data integration with Power BI, and workflow automation for enterprise reporting solutions.
- Expertise in **database optimization, system performance tuning, and disaster recovery planning**.
- Skilled in **API development and integration**, leveraging **Python and Web APIs** to streamline data access and interoperability.
- Strong ability in technical and functional specifications creation, including user interface design, navigation flows, logic diagrams, data models, and process automation using **MS Visio, DrawIO, and VS Code**.
- Experience in system design (both low-level and high-level architecture) and workflow automation.
- Expertise in **cloud security, IAM roles, multi-AZ architectures, and cloud-based storage management (Azure Data Lake)**.
- Experience in **SDLC aspects**, including requirements gathering, application configuration design, business process analysis, scripting, code deployments, escalations, and urgent issue resolution using **JIRA, ServiceNow**.

Technical Skills:

Programming Languages	Python (pyspark), Advanced SQL, T-SQL, Power Query
Cloud Platforms	Azure Databricks, Azure Data Factory, Azure Data Lake Storage Gen2, Azure Synapse Analytics, Azure SQL
Database Management Systems	Microsoft SQL Server, Dynamo DB, MySQL, MangoDB
ETL/ELT	Azure Data Factory, SSIS, GoAnyWhere
Data Formats	XML, JSON, CSV, Delimited, Parquet
Certifications	Azure data Engineer Associate, Azure Data Fundamentals, Azure Fundamentals, Analyzing and Visualizing Data with MS PowerBI
Data/ Error Analysis & BI Tools	Power BI, Tableau, Power Platform – Power Automate, Power Apps, Microsoft SQL Server Reporting Services (SSRS)
Analytical Tools	Azure Analysis Services and SSAS
Version Control & CI/CD	Git, Team Foundation Server (TFS), Azure ADO, Jenkins
Scripting & Automation	Shell Scripting, YAML, Python Scripting
Security & Encryption	Azure Key Vault, Data Encryption
Collaboration Tools	Jira, ADO

PROFESSIONAL EXPERIENCE:

AbbVie Inc:

June 2025 – Dec 2025

Location: Chicago, United States

Senior Business Intelligence Analyst:

Project: Portfolio Optimization Support

- Designed and developed **interactive Power BI dashboards** (Executive Summary, Gate Review, Lessons Learned, and Feedback Reports) to provide real-time visibility into project portfolio performance.
- Built a **centralized “Lessons Learned” dashboard** integrating insights from post-go-live projects to help PMOs and project managers reuse learnings and improve delivery outcomes.
- Developed **IAI Approval Power App** consolidating five key approval processes – Travel Request, Overtime Request, Change Freeze Exception, Executive Freeze Exception, and Proxy Delegate Request into a single streamlined interface.
- Automated approval workflows using **Power Automate**, reducing manual intervention and improving process efficiency across BTS - IAI.
- Partnered with Strategic Delivery and BTS - IAI leadership to align **KPIs and data models** with organizational governance and portfolio standards.
- Optimized data connections from SharePoint, Excel, and other project-tracking sources for accurate, efficient BI reporting.
- Delivered **insightful reports and visual analytics** that support executive decision-making and continuous improvement across AbbVie’s global project portfolio.

Environment: Power BI, Power Apps, Power Automate, SharePoint, Excel, DAX, Azure SQL Database, T-SQL

Jones Lang LaSalle Americas Inc:

Aug 2020 – Mar 2025

Location: Chicago, United States

Lead Data Engineer:

Project: EDP Finance System, EDP Valuation Advisory and Capital Market Group (CMG)

- Migrated legacy **Cognos reports** (Compensation, Payroll, Bonus, Accrual, Revenue) to **Power BI**, improving performance and enhancing interactivity for business users.
- Built data ingestion pipelines using **Azure Data Factory** and **Azure SQL** to process expense data from Egencia, Navan, and TravelPark into the Finmart system for real-time cost tracking.
- Developed financial dashboards in **Power BI** and Tableau with KPI tracking, forecasting, and trend analysis to support executive decision-making.
- Implemented automated data refresh and scheduling in **Power BI** and Tableau, ensuring timely and consistent reporting.
- Designed a scalable ingestion factory model in **Azure**, integrating structured/unstructured data from file servers, Blob Storage, and Azure SQL into Raw → Silver → Gold layers.
- Migrated SSIS-based ETL processes across 14 countries to **Azure Data Factory and Databricks**, enhancing scalability and maintainability.
- Built transformation pipelines to feed validated data into the PIX application, ensuring seamless downstream integration.
- Enforced **data governance** with lineage tracking, access control, and quality checks, leveraging Azure-native tools (**Azure AD, Monitor, Logic Apps**) for compliance and automation.
- Implemented CI/CD pipelines using **Azure DevOps** for automated deployments across development, QA, and production environments, ensuring version control and rapid delivery.
- Scaled **Azure SQL** instances and **Data Factory integration** runtimes to support growing data volume, optimizing throughput and cost-efficiency.
- Designed and tested high **availability** and **disaster recovery** plans for critical reporting and data pipelines using geo-redundant storage, failover groups, and backup automation.

Environment: Azure Data Factory, Azure Synapse Analytics, Azure SQL Database, Azure Data Lake, Azure Databricks, Power BI, Tableau, Python (PySpark), T-SQL, Azure DevOps, Microsoft Visual Studio, Cognos

Jones Lang LaSalle Property Consultants India Pvt Ltd:

Feb 2020 – Aug 2020

Role: Lead Data Engineer

Location: Bengaluru, India

Projects: EDP Valuation Advisory

- Designed a scalable ingestion factory model in **Azure**, integrating structured/unstructured data from file servers, Blob Storage, and Azure SQL into Raw → Silver → Gold layers.
- Migrated SSIS-based ETL processes across 14 countries to **Azure Data Factory and**

Databricks, enhancing scalability and maintainability.

- Built transformation pipelines to feed validated data into the PIX application, ensuring seamless downstream integration.
- Implemented CI/CD pipelines using **Azure DevOps** for automated deployments across development, QA, and production environments, ensuring version control and rapid delivery.
- Scaled **Azure SQL** instances and **Data Factory integration** runtimes to support growing data volume, optimizing throughput and cost-efficiency.

Environment: Azure Data Factory, Azure SQL Database, Azure Synapse Analytics, Azure Data Lake, Databricks, Python, T-SQL, Microsoft Visual Studio, Azure DevOps.

Shell India Markets Private Limited:

May 2019 – Jan 2020

Role: Senior Technical Analyst - Microsoft Azure

Location: Bengaluru, India

- Led a comprehensive evaluation of **Azure SQL Data Warehouse (Synapse)** and **Azure SQL Database**, assessing scalability, performance, and cost-effectiveness to guide cloud adoption strategy.
- Conducted **performance benchmarking with high-volume data loads**, analyzing throughput, concurrency, and resource utilization to support architecture decisions for mission-critical workloads.
- Collaborated with cross-functional teams to explore Azure service features through real-world use cases, delivering tailored solutions aligned with business and technical requirements.
- Created and presented **detailed Service Read-out documentation**, including technical comparisons, feature matrices, cost models, and best practices to support cloud solution governance.
- Provided strategic recommendations on **service selection, pricing optimization, and security configurations**, enabling efficient Azure deployments with improved reliability and cost control.

Environment: Azure SQL Database, Azure Synapse Analytics (SQL DW), Azure Data Factory, Azure Monitor, Azure Cost Management, Azure Advisor, T-SQL, Power BI, Microsoft Visual Studio, DevOps, Git.

Dxc Technology India Private Limited:

Mar 2016 - May 2019

Role: Project Lead

Projects: United Airlines, Daimler

Location: Bengaluru, India

- **Developed and maintained Power BI dashboards**, managing end-to-end processes from data modeling to visualization.
- **Optimized backend data and resolved bugs**, ensuring seamless performance for Power BI reports and Performance Insight dashboards.
- **Designed and implemented SSIS packages** for efficient data extraction, transformation, and loading (ETL).

- **Managed data ingestion on Azure**, onboarding 35+ sources for Daimler AG and implementing the ABC (Audit, Balance & Control) framework for enhanced data governance.
- **Developed Azure-based data pipelines** using **Azure Data Factory, Azure Databricks, and Azure Functions** for scalable data processing.
- **Implemented Azure Synapse Analytics** for optimized data warehousing and reporting solutions.
- **Handled database operations**, including data loads, backup/restoration, and real-time data streaming using **Azure Stream Analytics**.
- **Configured and managed Azure Data Lake Storage (ADLS)** for secure and efficient data storage.
- **Led requirement discussions and dashboard enhancements**, improving usability and driving business insights with advanced visualizations.
- **Integrated Azure DevOps for CI/CD pipeline automation**, enhancing deployment efficiency and version control.

Environment: Power BI, SSIS, SQL Server, Azure Data Factory, Azure Data Lake (ADLS), Azure Databricks, Azure Functions, Azure Synapse Analytics, Azure Stream Analytics, Microsoft Azure, T-SQL, Python, API Gateway, Microsoft Visual Studio, Git, Jira, TFS.

Wipro Technologies:

Mar 2014 – Jan 2016

Projects: Lloyd's Bank, Avaya Telecom, StateStreet Securities

Location: Bengaluru, India

Environment: SSRS, SSIS, SQL Server, Oracle, SAS, T-SQL, CSV, XML, Microsoft Visual Studio, Jira, Git, TFS.

IBM India Pvt Ltd:

May 2011 – Nov 2013

Projects: Lebara Telecom, Aviva Insurance

Location: Bengaluru, India

Environment: SSIS, SQL Server, Microsoft SQL Server, T-SQL, Web APIs, XML, JSON, Microsoft Visual Studio, Git, TFS.
