PROFILE

Strategic and results-driven **Delivery Manager** with **15+ years** of experience in **Agile project management, software delivery, and functional analysis** across diverse industries, including **US Healthcare, Pharmacy Management, Power, and Agriculture IT**. Adept at leading **cross-functional teams**, optimizing **delivery processes**, and ensuring **alignment with business objectives**.

Proven expertise in **Scrum, SAFe, stakeholder management**, and enterprise IT solutions, with a strong ability to drive efficiency, foster collaboration, and deliver high-quality software solutions. Skilled in **PI Planning, Agile coaching**, and **roadmap creation**, ensuring seamless execution of complex projects. Passionate about mentoring teams, scaling Agile practices, and implementing innovative solutions to enhance business outcomes. Adept at **leveraging AI-powered tools to optimize project workflows, enhance decision-making, and proactively identify risks and opportunities**—bringing a forward-thinking approach to Agile delivery and strategic planning.

EDUCATION

B.Tech in Instrumentation Engineering
March 2005 – June 2009
Federal Institute of Science and Technology, M.G.University, India

WORK EXPERIENCE

Deloitte (Aug2024 – June2025) | Location: CA, USA

Role: Onshore Delivery Lead (Contractor)

Domain: Power and Utility

- **Led end-to-end project lifecycle management for enterprise-level IT initiatives**, ensuring on-time delivery, scope adherence, and alignment with strategic business objectives.
- **Directed cross-functional project teams** comprising software developers, QA testers, and business analysts across geographically distributed (onshore/offshore) locations, ensuring effective resource coordination and communication.
- **Drive Agile transformation initiatives**, applying industry-standard methodologies including **Scrum, Scaled Agile Framework (SAFe)**, and **Kanban**, to enhance delivery velocity & team agility.
- **Facilitated stakeholder engagement & communication planning**, collaborating with product owners, sponsors, and executive leadership to define **project scope**, establish **requirements**, prioritize deliverables, & set measurable **success criteria**.
- **Promoted continuous process improvement** through regular **retrospectives**, delivery pipeline optimization, and performance metrics analysis to boost team productivity and reduce cycle time.
- **Successfully led Program Increment (PI) Planning** activities, developing quarterly roadmaps, aligning team objectives, & coordinating cross-team dependencies
- **Developed and executed detailed project management plans**, including **Work Breakdown Structures (WBS)**, **schedule baselines**, and **task-level time estimates**, to monitor progress and manage project constraints effectively.

Deloitte (Nov2018 – July2024) | Location: Bengaluru, India

Role: Offshore Delivery Lead and Engagement Manager (FTE)

Domain: Agriculture, Power and Utility

- **Ensured timely project delivery** by aligning client expectations with team capacity and defined **project scope**, proactively managing **schedule constraints** and resource availability.
- **Established performance metrics & tracking dashboards** to monitor **project deliverables**, enabling data-driven decision-making and early identification of variances from the **baseline plan**.
- **Monitored team health & morale**, integrating **resource management & risk mitigation strategies** to prevent burnout & maintain sustainable delivery velocity throughout **project lifecycle**.
- **Facilitated ongoing stakeholder communication**, ensuring transparent collaboration between client representatives and development teams, and maintaining alignment through structured **communication management plans**.
- **Defined project vision and objectives** in partnership with clients, translating business goals into actionable deliverables and ensuring clarity across all stakeholders via **requirements documentation** and **scope statements**.
- **Actively contributed to Program Increment (PI) Planning**, providing inputs on **resource allocation**, identifying **staffing risks**, managing **external dependencies**, and highlighting team achievements and rewards and recognitions **to support strategic alignment and execution readiness**.

Role: Product Manager

Domain: Agriculture

- **Led requirements discovery, elicitation, and documentation** for mobile and web-based applications, applying structured techniques such as **interviews, workshops, and user story mapping** to ensure comprehensive and **requirements traceability**.

CERTIFICATIONS

- ◆ Project Management Professional (PMP®):
(https://www.credly.com/badges/81a155f0-7edc-45e8-9743-4e592a95b757/public_url)
- ◆ Professional Scrum Product Owner (PSPO®)
(https://www.credly.com/badges/6013dd2d-4260-43f3-a4ce-0e67bf05933e/public_url)
- ◆ Certified Scrum Master (CSM®)

PROJECT & DELIVERY MANAGEMENT

- **Agile & SAFe Frameworks:** Expertise in Scrum, Kanban, and SAFe methodologies to drive Agile transformations.
- **Roadmap Creation:** Develop strategic **project and product roadmaps**, ensuring alignment with business goals.
- **Stakeholder & Customer Engagement:** Build strong relationships with **executives, product owners, and clients** to ensure seamless communication and project success.
- **Risk & Dependency Management:** Identify and mitigate **potential risks**, ensuring smooth project execution.
- **Resource Forecasting & Optimization:** Efficiently allocate resources, balancing **onshore and offshore teams** for maximum productivity.

- **Defined Minimum Viable Product (MVP)** scope by evaluating team **velocity, resource capacity, and effort estimates**, aligning product goals with delivery feasibility and stakeholder expectations.
- **Facilitated Agile ceremonies** including **backlog grooming, sprint planning, and retrospectives**, collaborating closely with **Product Owners (POs)** and client stakeholders to uncover historical context and ensure high-quality, value-driven deliverables.
- **Mentored junior product team members**, fostering professional growth through **knowledge transfer, performance feedback, & alignment** with organizational strategy & delivery standards.
- **Contributed to Program Increment (PI) Planning**, identifying **product gaps**, developing **project management plans** based on defined scope, and communicating prior PI **retrospective insights**, including delivery lags and team accomplishments, to inform future planning cycles.

Role: Scrum Master

Domain: Power and Utility

- **Assumed Scrum Master responsibilities** under the Energy Labs portfolio, applying Agile delivery principles to support cross-functional teams and ensure alignment with organizational goals.
- **Maintained Azure DevOps (ADO) boards**, overseeing **work item tracking, sprint progress, and status updates**, enabling real-time visibility into project health and delivery timelines.
- **Facilitated Agile ceremonies** including **Daily Stand-ups, Sprint Planning, and Retrospectives**, fostering team collaboration, transparency, and continuous improvement across delivery cycles.
- **Coached Agile teams on Scrum frameworks**, promoting adherence to Agile values and principles, and cultivating a high-performing, self-organizing team culture.
- **Managed project dependencies, risks, and impediments**, implementing **risk response strategies** and **issue escalation protocols** to ensure smooth execution and mitigate delivery delays.
- **Collaborated with Product Owners** to refine and prioritize **product backlogs**, ensuring alignment between business objectives and development efforts through structured **scope management** and **requirements prioritization**.
- **Led Agile maturity assessments** and drove adoption of **Scaled Agile Framework (SAFe)**, scaling Agile practices across multiple teams and enhancing organizational agility.
- **Designed and implemented ADO dashboards** to streamline **project status reporting** for stakeholders and improve **sprint visibility** for development teams, supporting effective **performance monitoring** and **communication management**.
- **Executed Scrum Master role across five projects over four years**, demonstrating consistent delivery excellence and Agile leadership.
- **Oversaw offshore team delivery**, coordinating with onshore workstream leads and client stakeholders to communicate **project status**, escalate issues, and proactively **forecast risks**, ensuring stakeholder alignment and preventing project decline.

Role: Senior Business Analyst

Domain: BCBS Healthcare

- **Onboarded as a Product Manager** for a leading U.S. healthcare client under Deloitte, driving Agile delivery and product ownership for health plan and benefits management solutions.
- **Enabled Scrum practices** within the product team, supporting sprint execution and fostering collaboration between cross-functional stakeholders and development teams.
- **Led product discovery and requirements elicitation** for core features including health plan configuration, benefit management, and rate ordering workflows, translating business

AGILE & PRODUCT LEADERSHIP

- **Product Backlog Management:** Define and prioritize backlog items, ensuring **high-value delivery**.
- **MVP Definition & Prioritization:** Develop **Minimum Viable Products (MVPs)** based on effort and team capacity.
- **Business Process Modeling (BPMN):** Utilize BPMN to **streamline workflows** and enhance operational efficiency.
- **Requirements Elicitation & Documentation:** Conduct **discovery sessions** to gather and document business requirements.
- **Agile Coaching & Transformation:** Mentor teams on **Agile best practices**, fostering a culture of continuous improvement.

TOOLS & TECHNOLOGIES

- **Business Case & Feasibility:** MS Word, Excel, Google Docs
- **Stakeholder Identification:** Miro, RACI Matrix
- **Risk Planning:** MS Excel
- **Communication Planning:** MS Teams, Confluence, Email Templates
- **Team Collaboration:** Jira, MS Teams, Zoom
- **Change Control:** Jira, SharePoint
- **Lessons Learned:** Confluence, SharePoint, Google Docs, JIRA, ADO

needs into actionable **user stories** and **acceptance criteria** documented in **JIRA**.

- **Owned and prioritized the product backlog**, ensuring alignment with client goals and regulatory requirements, and facilitating backlog refinement sessions to maintain delivery readiness.
- **Mentored Business Analysts** within the project umbrella, guiding them on product thinking, stakeholder engagement, & Agile documentation standards to elevate team performance & consistency.

GalaxE Solutions (March 2017 - April 2018) | Location: Bengaluru, India

Role: Senior Business Analyst (FTE)

Domain: US Pharma

- **Collaborated with onshore stakeholders** to align on **product scope**, ensuring business objectives were clearly translated into actionable deliverables. **Led backlog refinement sessions, facilitated cross-functional workshops** to define, validate **system requirements**, ensuring alignment with business goals and technical feasibility.
- **Served as the strategic liaison, partnered with developers, QA testers, and project managers** to oversee end-to-end **feature implementation**, ensuring timely delivery and quality assurance across the product lifecycle.
- **Managed HP ALM dashboards** to track **project progress**, monitor test coverage, and ensure traceability of requirements through development and QA phases.

iNube Software Solutions (June 2013 – Feb 2017) | Location: Bengaluru, India

Role: Senior Business Analyst (FTE) - (Mobility & Waterfall Projects)

Domain: Insurance

- **Prepared detailed project plans** for mobility products, defining milestones, deliverables, and resource allocations to support structured execution and stakeholder visibility.
- **Conducted feasibility studies and impact assessments, led product ideation and feature brainstorming** for Android and iOS applications, incorporating market trends, user needs, and competitive analysis to shape product specifications and roadmap priorities.
- **Owned end-to-end product documentation** within **Waterfall delivery model- Software Requirements Specifications (SRS), use cases, process flows, system configurations, release notes, user manuals and product updates** for mobility solutions across EMS courier tracking, marine insurance, motor pre-inspection, fraud detection, and investigative insurance platforms. **Developed and executed User Acceptance Testing (UAT) strategies, provided product demos to clients** to validate product functionality and ensure readiness for deployment.

Tata Consultancy Services (Jan 2010 – May 2013) | Location: Hyderabad, India

Role: Developer, PMO and Business Analyst (FTE)

- Gathering requirements, documentation, prototype modelling, demo on Lab Pre-Analytical phase and implementation.
