PROFESSIONAL SUMMARY

Senior Product Manager with 9+ years of experience embedded within enterprise organizations to lead product strategy, discovery, and delivery for SaaS platforms, digital banking products, and large-scale transformation programs. Placed across Healthcare, Financial Services, and Energy sectors to own cross functional roadmaps, align C suite stakeholders, and drive measurable outcomes in complex multi-region environments. Consistent track record of translating ambiguous business and regulatory requirements into clear product direction and shipping with reliability across industries.

KEY DIFFERENTIATORS

- Product Ownership at Scale:** Contracted to lead global product programs across 5 or more business units, 3 continents, and 12 or more stakeholder groups, taking full accountability from discovery through post-launch stabilization.
- Consistent Business Impact:** Delivered measurable results including 40% reductions in operational cycle time, meaningful improvements in cash flow performance, and elimination of significant manual work through targeted automation.
- Executive Communication:** Presented roadmaps, product reviews, and release outcomes directly to CFOs, VPs, and program sponsors, and comfortable operating at the executive level as an independent contributor.
- Compliance and Regulatory Fluency:** Shipped compliance-critical product features in regulated banking and healthcare environments under SOX, AML, KYC, and PSD2 frameworks with zero audit findings on delivered controls.
- Insights Driven Delivery:** Built product analytics dashboards that replaced manual weekly reporting packages and gave Finance and Operations leadership real-time visibility into performance across business units.

SKILLS AND COMPETENCIES

Product Strategy	Product Vision and Roadmap, OKRs/KPIs, Product Discovery, Market Research, Competitive Analysis, Go-to-Market Planning, Product-Led Growth, MoSCoW, RICE Scoring, Jobs-to-be-Done
Agile and Delivery	Agile/Scrum, SAFe, Kanban, Sprint Planning, Story Mapping, Backlog Grooming, UAT, Defect Triage, Release Management, Change Management, Cutover Planning
Stakeholder Mgmt	Executive and C-Suite Alignment, CXO Workshops, Business Case Development, Cross-functional Facilitation, Vendor Management, RTM/BRD/PRD Documentation
Domain Expertise	Enterprise SaaS, FinTech and Digital Banking, Healthcare Digital Transformation, Clean Energy Tech, P2P/O2C/R2R, ERP Financials (Oracle Cloud, SAP), Payments and Compliance (SOX, AML, KYC, PSD2)
Analytics and Data	Power BI, Tableau, SQL, Advanced Excel, Snowflake, OTBI, OBIEE, A/B Testing, Funnel Analysis, NPS, Cohort Analysis, Smartsheet
Technical Fluency	REST/SOAP APIs, Postman, FBDI/ETL, OIC Integrations, Cloud Architecture (AWS, Azure), SDLC, CI/CD Awareness
Tools and Platforms	Jira, Confluence, Aha!, Azure DevOps, Figma (wireframing), Miro, ServiceNow, Smartsheet, MS Project, SharePoint

PROFESSIONAL EXPERIENCE

GE Healthcare | Chicago, IL | April 2023 – Present

Senior Product Manager, SaaS Digital Transformation

Engaged as Senior Product Manager for GE Healthcare's digital finance transformation program following its spin-off from GE. Served as the primary product lead responsible for strategy, roadmap execution, and adoption across a suite of cloud finance automation products covering accounts payable, accounts receivable, and financial close for 12 business units across the US, EU, and APAC. Reported into the Finance Technology leadership team and maintained ongoing alignment with the Global CFO office on program milestones and business case progress.

- Developed and maintained the product roadmap for GE Healthcare's finance automation suite, working through a backlog of 40 or more competing initiatives each quarter using RICE scoring and OKR alignment to surface the highest-value work and maintain executive confidence in delivery pace.
- Facilitated product discovery workshops with Controllers, Treasury leads, and Operations stakeholders across 12 business units to map pain points, validate assumptions, and build the business case for key automation investments.
- Drove delivery of the AP Automation product, reducing invoice processing from 6 manual touchpoints to 2 automated steps and cutting AP cycle time by 40% while freeing meaningful weekly capacity across the global finance team.
- Delivered the AR Collections product with intelligent dunning workflows, remittance processing, and real-time aging visibility, contributing to a measurable reduction in Days Sales Outstanding and improved cash flow predictability for the CFO team.
- Shipped the Financial Close product including a structured close checklist, subledger dependency tracking, and automated exception routing that compressed the monthly close cycle from 10 to 5 business days across all 12 entities.
- Served as primary product owner across 8 engineering and finance workstreams over 3 phased go lives, maintaining a live Jira backlog, facilitating biweekly sprint reviews, and resolving cross team dependencies as they surfaced.
- Coordinated end-to-end UAT across 3 test cycles with 420 or more test cases and over 100 tracked defects, driving all issues to closure and securing formal go live sign off from GE Healthcare's Global CFO office before each milestone.
- Acted as product owner for integration delivery between GE Healthcare's finance platform and Oracle Fusion Financials, and legacy billing systems, performing root cause analysis on interface failures and validating production releases with engineering before each go live.
- Partnered with the analytics team to deliver 14 finance dashboards covering AP performance, AR collections, intercompany positions, and close status, cutting manual Excel reporting by 60% across the finance function.
- Designed and coordinated a product enablement program for 150 or more finance users across 3 regions including 22 user guides, 8 quick reference cards, and 3 e-learning modules, with a 94% post training competency pass rate.
- Presented quarterly product roadmap updates to GE Healthcare's Finance Leadership Team and maintained consistent stakeholder alignment through structured review cadences and proactive risk communication throughout the engagement.

General Electric (GE Vernova) | Atlanta, GA | Oct 2021 – Apr 2023

Product Manager, Treasury and Financial Operations Platform

Contracted to manage product delivery for GE Vernova's internal treasury and financial operations platform, a cloud based tool used by finance and treasury teams across 8 energy business units to manage cash visibility, vendor payments, and financial reporting ahead of GE's corporate spin-off. Responsible for the full product lifecycle spanning discovery, roadmap prioritization, release management, and stakeholder reporting.

- Maintained the product vision and 12 month roadmap for the treasury and financial operations platform, consolidating fragmented data from 8 business units into a single product used daily by over 100 finance and treasury users.
- Shipped the Cash Visibility module with real time bank position monitoring, automated reconciliation rules, and exception alerting across 28 bank accounts at 6 global banking partners, reducing unreconciled cash items by 85% within 60 days of launch and giving treasury teams same day visibility they previously lacked.
- Launched the Vendor Payment module with automated payment scheduling, multi-currency disbursement tracking across ACH, SEPA, and SWIFT rails, and payment exception dashboards that eliminated over 20 hours per week of manual processing across 3 treasury teams.
- Delivered a GL Variance Intelligence feature that surfaced systematic accounting rule gaps causing a recurring monthly reconciliation backlog, enabling the finance team to permanently resolve the root cause and reduce escalations to the accounting team by 70%.
- Owned the integration strategy connecting the platform to SAP Treasury, Vertex Tax, and 3 legacy ERP systems, authoring integration requirements, validating API contracts with engineering, and managing go live sequencing across 4 quarterly release windows.
- Managed 4 quarterly release cycles including impact assessments for 200 or more items per release, regression test coordination, and release readiness reviews, achieving zero critical defects at production across all 4 releases.
- Maintained a product risk register and escalation log throughout the engagement, escalating 4 critical platform issues to the vendor product team and contributing to 2 patch releases that resolved recurring user reported failures in the reconciliation module.
- Contributed to the platform's SOX compliance requirements by defining audit trail capture, payment approval controls, and role based access governance for over 100 users, supporting clean audit opinions across 2 annual reviews.

- Partnered with Finance leadership to deliver an executive reporting suite in Power BI covering cash position, payment run status, AR aging by business unit, and GL variance trends, replacing a set of manually produced weekly decks sent to the CFO and SVP Finance.

Deutsche Bank | Jersey City, NJ | Dec 2019 – May 2021

Associate Product Manager

Placed as Associate PM within Deutsche Bank's Digital Banking group to support the build-out and enhancement of the Corporate Payments Platform, a product used by institutional and corporate clients to initiate, track, and reconcile multi-currency payments across domestic and international rails. Worked across product, engineering, compliance, and risk stakeholders in a fast-paced regulated banking environment, contributing to feature delivery, UAT, and client experience improvements throughout the engagement.

- Contributed to the product roadmap for the Corporate Payments Platform, helping prioritize features across ACH, SEPA, and SWIFT payment rails in close collaboration with Corporate Banking and Treasury client teams based on client feedback and regulatory timelines.
- Supported delivery of a multi-currency payment approval feature with configurable approval hierarchies, real time payment status visibility, and positive pay controls that reduced end-to-end payment processing cycle time by 30% and cut client-reported exception rates in the first quarter post-launch.
- Translated PSD2 Strong Customer Authentication requirements into user stories, acceptance criteria, and compliance test cases for EU transactions, contributing to an on-time regulatory delivery with zero go live defects and no client disruption during the cutover window.
- Helped design a digital supplier onboarding workflow with embedded KYC and AML compliance checkpoints, resolving 12 open regulatory findings from Deutsche Bank's prior year audit and replacing a largely manual onboarding process that had been a recurring compliance risk.
- Collaborated with UX and engineering to improve the client-facing payment portal by wireframing key user flows in Figma, running usability sessions with corporate treasury clients, and shipping an updated payment initiation experience that reduced inbound client support tickets by 35% within 2 months of release.
- Contributed to an automated month-end reconciliation feature for corporate banking clients with pre populated statements, exception flagging, and audit ready export formats that reduced client close reconciliation effort from 5 days to under 2 days per cycle.
- Led UAT for the STP payment platform upgrade by coordinating 180 or more test cases across 6 workstreams, managing defect triage with engineering, and clearing all critical issues before go live.
- Owned API validation between the payments platform and the treasury gateway by documenting 15 or more API contracts, validating schemas with engineering, and resolving 18 integration defects across 3 release cycles.
- Supported 3 quarterly platform release cycles by reviewing release notes, identifying high priority impacts across payment and compliance modules, and coordinating regression testing to protect production stability before each deployment.

British American Tobacco | Islamabad, Pakistan | Sep 2017 – May 2019

Product Analyst, Finance and Operations Systems

Placed as a Product Analyst supporting BAT Pakistan's regional ERP modernization program across 4 business units. Contributed to P2P workflow automation, financial reporting product delivery, and data migration as part of a broader finance digitization effort focused on reducing manual processing and improving reporting accuracy across the commercial division.

- Contributed to the design and delivery of a P2P automation product for 4 BAT Pakistan business units, helping reduce invoice processing cycle time from 10 to 4 days through automated 3-way matching and digital approval routing.
- Authored BRDs, process flow documentation, and UAT test scripts for 6 finance product enhancement projects across 2 fiscal years, with formal business sign-off received on every deliverable without a second review cycle.
- Built 8 operational reporting products covering AP aging, AR collections, procurement spend, and supplier performance that replaced 12 manual Excel reports and saved the finance team over 15 hours per week in preparation and distribution time.
- Supported month end close operations across 4 business units, contributing to on time close completion for 18 consecutive accounting periods.
- Assisted with data migration for the ERP modernization program including loading 8,000 or more open invoices, 5,000 or more customer balances, and 3 years of financial history, achieving a 99.5% reconciliation accuracy rate at cutover.
