## **Professional Summary:**

- 10+ years of extensive experience in Microsoft Full Stack Product/ Application Development, Leading team on technology, Project Management, Certified Scrum Product Owner with master's degree in computer science and Product Support.
- Worked in industrial domains of Asset Management, Real Estate, FinTech, Transport, Ecommerce.
- Experience as a Software Developer in Desktop and Web based environments using Microsoft .NET Framework including ASP.NET Core, MVC, WEBAPI, C#, ADO.NET.
- Experienced in all phases of software development life cycle (SDLC) - Project Analysis, Requirements, Design, Development, Testing, Documentation and Deployment and in Windows Client/Server Environment using Waterfall and Agile Methodologies.
- Familiar with Solid Principles, Design Patterns and The Twelve Factor App.
- Worked in Agile Scrum projects and attended Daily Scrum meetings, User Story review meetings, Sprint review and Retrospective meetings as part of Agile Methodology.
- Extensively used Object Oriented Programming Concepts using industry standard Design patterns in developing the application.
- Experienced in Creating Databases, Stored Procedures based on Functional Requirements and System Design and Physical and Logical database design and experience T-SQL coding skills.
- Expert in implementing business logic in backend using dynamic Stored Procedures, appropriate Functions, and effective Triggers to facilitate efficient data manipulation and data consistency.
- Experience In Code Optimization and Improving Efficiency in Databases Including Re-Indexing, Recompiling Stored Procedures.
- Expertise in application development using ASP.NET MVC 4.0/5.0 Framework.
- Experienced in building Web Services using SOA, Restful Services and SOAP Protocol.
- Experience Frontend within Framework like Angular, Blazor.
- Familiar with creating Custom Reusable Angular Components Library.
- Hands on experience in using JavaScript and client validations.
- Experience in using third party controls like Telerik Controls.
- Experience with Agile Software and Test – Driven Development.
- Experience working with Production, QA and Development Environments.
- Good communication, interpersonal and presentation skills.
- Excellent work ethics, self-motivated and quick learner. Willing to learn, adapt to new technologies and third-party products.
- Implement Most of the Project with Entity Framework Code first approach.

## **Education Background:**

- Master's in technology in Computer Science from Punjab Technical University, 2011.
- Bachelor's in technology in Computer Science from Punjab Technical University, 2008.

## **Technical Skills Set:**

|                           |                                                                                                                                                      |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| Development Technology    | HTML, WordPress, .NET, PHP, CodeIgniter, Angular 6+, Blazor                                                                                          |
| Databases                 | MSSQL SERVER, My SQL, COSMOS                                                                                                                         |
| Cloud Computing Platforms | Azure (Azure AD, SQL, Cosmos DB, Storage, VPN, Service Bus, Function, Queue, DevOps, Logic APP,)<br>AWS (Lambda, API Gateway, SNS, SQS, Cloud Watch) |
| Development Tools         | Visual Studio 2008/2010/2013/2015, 2017, 2020, 2022.                                                                                                 |
| Third Party Controls      | Telerik Controls                                                                                                                                     |
| Scrum Tool                | Jira, Azure Board                                                                                                                                    |

## **Employment History:**

**Relevance Lab Inc - Dallas (USA)**  
**Relevance Lab Pvt. Ltd. (India)**  
**Tech Lead**

**July 2023–Present**  
**Feb 2020–June 2023**

## **Technology Stack:**

Angular 8+, C# .Net, Blazor, Web API, LINQ, Entity Framework .Net Core, SQL Server, Azure Cloud Services, WordPress, MySQL, PHP

## **Domain:**

Asset Management, Ecommerce (Automobile).

## **Responsibilities:**

- Involved in gathering and preparing the requirements from clients for product design and enhancements.
- Build the application architecture and Framework.
- System Design as well as Database Design.
- Serves as solution architect across multi domain and Technologies tower for Professional Services.
- Worked with web API to make calls to the web service using URLs which would perform POST, GET, PUT and Delete operations.
- Design Mockup Screen of UI experience before actual implementation of new feature.
- Design and implement the system from scratch & build enhancements, features request using modern application frameworks using Angular with .NET Core, C#, Web API, Microsoft Azure etc.
- Develop and implement features and functionality for our web application which includes frontend development (in Angular/ Blazor), API development in .NET Core, and coding corresponding SQL Server database scripts.
- Ensuring high performance of applications and providing support.
- Writing clean and modular reusable code using modern frameworks Angular or other comparable framework or toolkits.
- Working closely with other developers, product management, UX designer, testers, automation engineers, and DevOps in team to learn the product quickly.
- Collaborate with engineers to bring concepts to life while maintaining UX best practices, page speed, and end user experience.
- Build, test and deliver high-quality front-end/back-end components, features, and user-friendly web experiences.
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers.
- Participate in both development & maintenance tasks.
- As part of the Applications team, support the change management process on existing systems and implement new solutions in line with project implementations.
- Take ownership and assume end to end responsibility including design and unit test code.
- Working in Agile & Waterfall development environments.
- Write Unit Test Cases for features, APIs and code before handing them to QA.
- Bug fixings for Existing functionality.

**KNAB Finance Advisors Pvt. Ltd. (India) Dec 2018–Feb 2020**

**Senior Web Developer**

**Technology Stack:**

Angular, Python, WordPress, MySQL, AWS Cloud, WordPress, MySQL

**Domain:**

FinTech

**Responsibilities:**

- Involved in gathering and preparing the requirements from business and management team for product design and enhancements.
- Enhanced existing product using Typescript with latest Angular 8 as Front end and Python as a backend.
- Improve efficiency of operations and support work by automating as far as possible information processing for reporting across service lines in technology.
- Worked on Advance MySQL Database for the reporting purpose.
- Taking regular feedback from business teams on features delivered.
- Create joins and sub-queries for complex queries involving multiple tables.
- Active involvement in the software development life cycle, to create user stories, bugs, reporting, project tracking, initiate change requests and Git for source control.
- Analyzed and resolved the bugs in the production environment.
- Experience in Unit testing, Module testing and Integration Testing.
- Used Agile Methodology Scrum Framework to meet timelines with quality deliverables.

**SRP Techies (India)**

**March 2017 – Dec 2018**

**Project Development Manager (Co – Founder)**

**Technology Stack:**

Angular 8+, C# .Net, Blazor, Web API, LINQ, Entity Framework .Net Core, SQL Server, WordPress, MySQL, PHP

**Domain:**

Transport, Ecommerce, Real Estate

**Responsibilities:**

- Supporting the development of ramp-up plans and building of profiles on basis of service line demands.
- Taking regular feedback from client service teams on services delivered.
- Managing and resolving escalations that have impact on critical path of service delivery.
- Worked in requirements analysis, technical understanding of the requirement.
- Development planning creates the module for development team and task allocation to the team.
- Work closely with team in proposal development by establishing the requirements, managing the workflow, and delivering the results to the sales team/client on time to agreed-upon quality standards.

**SPaul Complete IT Solution Pvt. Ltd.**  
**Web Developer**

**Jan 2014 – March 2017**

**Technology Stack:**

WordPress, CodeIgniter, MySQL, PHP

**Domain:**

Ecommerce

**Responsibilities:**

- Developed projects using WordPress, Core PHP, CodeIgniter framework.
- Worked on the Live MySQL database for handling complex tasks.
- Led projects in CodeIgniter, Worked on live video portal in PHP
- Designed architecture for website and API Gateway
- Working on multiple technologies like PHP, HTML, jQuery & CSS.
- Experience in requirements analysis, technical understanding of the requirement.
- Development planning creates the module for development team and task allocation to the team.
- Worked on requirements analysis, technical understanding of the requirement.
- Work closely with team in proposal development by establishing the requirements, managing the workflow, and delivering the results to the sales team/client on time to agreed-upon quality standards.

**Regional Institute of Management and Technology**  
**Assistant Professor**

**July 2011 – Jan 2014**

**Responsibilities:**

- As an Assistant Professor, I taught Database, Web Designing, Web Development, System analysis & Design, Operating System.
- Examination Coordinator.

**Certification Earned:**

- Azure Fundamentals (AZ-900)
- Azure AI Fundamentals (AI-900)
- Azure Data Fundamentals (DP-900)
- Power Platform Fundamentals (PL-900)
- Azure Developer Associate (AZ-204)
- Azure DevOps Engineer (AZ-400)
- Certified Scrum Product Owner (CSPO)
