

Professional Summary

Results-driven Technical Leader with over **19 +** years of experience delivering enterprise-wide technology implementations, migrations, and platform upgrades for Fortune 50 financial institutions including **JP Morgan Chase, UBS, Citi** and **Fifth Third Bank**. Proven track record managing complex, customer-facing projects across multiple lines of business with matrix management responsibility for cross-functional teams of **8-10** members spanning onshore and offshore delivery models.

Expert in balancing technical requirements with stakeholder relationships, client management, milestone delivery, and budget management using both Agile and Waterfall methodologies. Strong executive communication skills with experience presenting project status, risk mitigation strategies, and resource requirements to senior leadership on a weekly & monthly cadence.

Skilled in enterprise change management tools including Azure DevOps, Jira, Confluence, and Microsoft Project with deep knowledge of core banking processes, operations, and regulatory compliance requirements.

Technical Skills

- **Business Intelligence & Reporting:** Microsoft Fabric, Power BI, Power Automate, Power Platform, Tableau, SAP Business Objects (BOXI R4/R3), MicroStrategy 10.x
- **Power BI Components:** DAX Studio, Tabular Editor, ALM Toolkit, Vertipaq Analyzer, Performance Analyzer, Power BI Premium Gen2 Metrics App.
- **Data Modeling & Visualization:** Dimensional Modeling, Star Schema, Snowflake Schema, OLAP Cubes, DAX, MDX, Power Query (M), Tabular/Multidimensional Models, Composite Modeling.
- **Databases & Data Platforms:** Oracle SQL, Azure SQL Database, Azure Synapse, Azure Data Lake, Snowflake, Azure Analysis Services.
- **ETL & Data Integration:** Azure Data Factory (ADF), Power BI Dataflow, Informatica Power Center
- **Programming & Query Languages:** SQL, T-SQL, DAX, Power Query (M), Python, Snowflake
- **Cloud Platforms:** Microsoft Azure, Azure Cloud Services, AWS (Redshift)
- **DevOps & Tools:** Azure DevOps, Jira, Confluence, Microsoft Project.
- **Certifications:** Microsoft **DP-600** | **PL-300** | **DA-100**, SQLBI Advanced DAX, Tableau Desktop Specialist, Oracle SQL IZ-007, MicroStrategy MCA | CRD | CPD

Professional Experience

Lord Abbett, Jersey City, NJ

Senior Software Engineer / BI Technical Architect | Senior Fabric Data Analytics Engineer

May 2024 – Present

- **Leading Engineering Modern Data Platforms in Microsoft Fabric:**
 - Leading design and implement end-to-end data engineering solutions using Microsoft Fabric, leveraging BI architecture background to build scalable, governed and business aligned data products.
 - Collaboration, Leadership & Stakeholder Engagement: Partner with business stakeholders to translate requirements into scalable, high-performance data engineering solutions.
 - Work closely with BI developers, DB architects, and data scientists to support cross domain analytics and enterprise reporting. Provide technical leadership and best practices to the team on data modeling, DAX optimization, Fabric engineering patterns, and governance frameworks.
 - My work spans ingestion, transformation, Lakehouse/Warehouse engineering, and enterprise analytics enablement.
 - **Data Ingestion, Integration & Orchestration**
 - Built fast, reliable data pipelines using Data Factory, Dataflows Gen2, Event Streams, and Notebooks.
 - Integrated data from multiple different data sources on prem systems into OneLake.

- Used shortcuts, mirroring, and delta ingestion to unify data and avoid duplication.
- Automated and monitored pipelines with triggers, schedules, alerts, and Fabric monitoring.
- **Lakehouse & Warehouse Development**
 - Build and optimize Lake House architectures using Delta/Parquet, medallion layers, and schema evolution.
 - Develop Fabric Warehouses, SQL-Optimized analytical workloads supporting enterprise BI and self-service.
 - Implement partitioning, indexing, caching, and file compaction to improve performance and reduce compute costs.
 - Establish OneLake governance, including folder structures, naming standards, and lifecycle policies.
- **Data Transformation, Modeling & Quality**
 - Develop transformation logic using PySpark, SQL, Notebooks, Dataflow Gen2 to produce analytics ready datasets.
 - Implement bronze–silver–gold data layers aligned with medallion architecture and enterprise modeling standards.
 - Apply data quality rules, profiling, validation checks and error handling across ingestion & transformation layers.
 - Collaborate with BI teams to design semantic models that support Power BI reporting, KPI frameworks.
- **Performance Optimization & Reliability**
 - Tune Lakehouse and warehouse performance through query optimization, partition, caching, and compute scaling.
 - Optimize pipelines for parallelism, cost efficiency, and reliability across Fabric capacities.
 - Troubleshoot pipeline failures, refresh issues, compute bottlenecks using Fabric monitoring and engineering tools.
- **Governance, Security & Compliance**
 - Implement Fabric governance standards including workspace strategies, data domains, data contracts, and semantic model governance.
 - Configure RLS/OLS, sensitivity labels, and OneLake access aligned with enterprise security policies.
 - Maintain metadata, lineage, documentation, and audit ability across all Fabric data assets.
- **Modernization & Continuous Improvement**
 - Lead modernization of legacy BI/ETL platforms (SSIS, BO, Tableau, On-prem SQL) into Fabric-native architectures.
 - Evaluate and adopt new Fabric capabilities: Real-Time Intelligence, KQL DB, Mirroring, Copilot, and Data Activator.
 - Promote engineering excellence through code reviews, reusable frameworks, and performance standards.
- **Leading Power BI Reporting and Dashboarding:**
 - Leading Power BI dashboard consolidation migration, providing architecture solutions to develop Power BI reports and dashboards in Power BI on Cloud.
 - Driving strategic BI leadership through discovery, design planning, performance tuning, and optimization aligned with business goals.
 - Providing technical guidance to BI developers and analysts, leading code reviews and promoting best practices across the team.
 - Architecting and implementing end-to-end Power BI solutions including data models, ETL pipelines, and reporting structures.
 - Developing interactive dashboards, KPI scorecards, and visual reports using Power BI Desktop and Service.
 - Building optimized tabular models using advanced modeling strategies for large-scale data, creating and managing Analysis Services models.
 - Expert in crafting complex DAX measures and Power Query transformations for advanced analytics.
 - Tuning tabular models and reports for speed and scalability using DAX Studio, Performance Analyzer, and Vertipaq Analyzer.
 - Enforcing branding and design principles across all dashboards, ensuring visualization standards compliance.

Wipro Limited, Various Client Locations

BI Senior Technical Architect

November 2018 – May 2024

Client Engagements:

- UCT, California-USA – Dashboard Migration (Apr 2023 – May 2024)
- UBS, USA – RDS Migration (Oracle to Power BI) & GSR Migration (SAP BO to Power BI) (Oct 2020 – Mar 2023)
- HSBC, India – Third Party Technology Management (Dec 2019 – Sep 2020)
- Johnson & Johnson, India – Tableau, Alteryx (Dec 2018 – Nov 2019)

Key Accomplishments:

- Led architecture solutions for UBS RDS Migration project, migrating 110 Oracle Reports built on Cold Fusion and Oracle Report Builder to Power BI on Cloud.
- Architected GSR (Group Shareholding Reporting) Migration for UBS, migrating 45 SAP BO Reports to Power BI for regulatory reporting.
- Led UCT Dashboard Migration project, providing architecture solutions to migrate 40 SAP BW Reports to Power BI on Cloud.
- Designed and developed Power BI models by transforming legacy reporting solutions into scalable architectures.
- Implemented row-level and object-level security in Power BI datasets, managing user access, workspaces, and refresh schedules.
- Integrated Power BI with Azure services, APIs, and embedded analytics for self-service BI capabilities.
- Worked with Azure Analysis Services, Data Lake, and Redshift to enable enterprise-wide analytics solutions.
- Translated business requirements into technical BI solutions with focus on data integrity and consistency.
- Created technical documentation and architecture presentations to support decision-making and knowledge sharing.
- HSBC, India – BI Technical Architect / Tableau Architect: Designed centralized DB-Star Schema for organization structure, expenditure requests, IT service requests, and contract management using Tableau.

L&T Infotech (LTI), Various US Client Locations

BI Technical Architect

November 2013 – November 2018

Client Engagements:

- Pfizer, USA/India – Cognos 10 to Business Objects 4.2 Migration (Dec 2017 – Nov 2018)
- Citi Financial Bank, USA/India - BO Development & BO to MSTR Migration (Dec 2013 – Nov 2017)

Key Accomplishments:

- Pfizer Inc, NJ-USA – BI Technical Architect / Business Objects Developer: Led migration of COGNOS 10.1 reports to Business Objects 4 platform, consolidating BI reporting for 1100+ users.
- CITI Financial Bank, Warren-NJ, USA – BI Technical Lead / Sr. Business Objects Developer: Built solutions for Capital Allocation/Loss Capture operations in CITI Group, developing operational risk reporting using Business Objects XIR3 and MicroStrategy.

Wipro Limited, Various US & India Client Locations

Technical Lead / Senior Developer

April 2010 – November 2013

Client Engagements:

- Fifth Third Bank, Cincinnati-OH, USA – BI Technical Lead / Sr. Business Object Developer (Apr 2010 – Nov 2013): Integrated data from Royal Bank of Canada and CITI Bank Multi-Currency Accounts into Fifth Third's Data Warehouse and CRM system.

Cognizant Technology Solutions, Various Locations

Programmer Analyst

December 2006 – April 2010

- JP Morgan Chase, USA – Business Objects Developer / Senior Developer (Dec 2006 – Apr 2010): Developed CIT DAC Reporting solutions using Business Objects (BOXI R2/R3) and Oracle SQL.
- Multiple-time recipient of "DW Scope Award" at Cognizant for outstanding performance.

Education

Bachelor of Science in Computer Science

VITS, Satna (RGPV University, Bhopal), India – 2002-2006
