TECHNICAL SKILLS

- Language / DBMS: SAP HANA, SQL, PL/SQL, T-SQL, NoSQL(MongoDB), Snow Flake. Azure SQL , Python ETL, PySprak

PROFILE SUMMARY

- Offering over 16 years of multi-functional experience in spearheading end-to-end functions of **data Integration, data Migration, data quality, data governance (data management)** by implementing technology-based solutions for different domain clients.
- Excellent Knowledge in Data Analysis, Data validation, Data Cleansing, Data Verification and data reconciliation. Business process mapping, meeting stakeholders to identify opportunities for business process optimization and solutions
- **DATA Integration and Data Migration** with capabilities in pre-implementation, implementation & functions right from documentation, scoping, requirement mapping, costing, gap analysis, application development testing till post implementation support. OLAP Data warehouse concepts, Dimensional Data Model implementations like Star Schema, Extended Star Schema and Snowflake Schema.
- **Comprehensive knowledge of SAP HANA** including Embedded EWM and analysis/ design/ development of various Data Warehousing projects Proven success in ensuring adherence to standard BI/DWH best practices
- **In-depth knowledge of SAP BTP DataSphere** architecture, components, and capabilities.
- Excelled at quickly understanding **business /functional requirements** and applying system business logic to solve complex problems
- **Strong leadership skills** in project planning, scheduling, prioritization, contingency, work assignments & definition of scope for several projects; expertise in managing teams to work as per corporate set parameters and motivating them for achieving business goals
- **Extensive experience in ETL (architectures) processes in extracting** data from operational and legacy systems to data warehouse using **SAP Datasphere, SAP BODS/SDI, Informatica, MS BI, ADF**. Understands complex mappings, transformation rules, data conversion and efficient in performance tuning of sources, mappings, targets, and data quality.
- Experienced in working on both **Agile methodology and Waterfall methodology**.
- Managed data management team and maintained subject matter expertise
-

- OS & Hardware: UNIX/Linux, MS Windows
- BI/ETL Tools: SAP BODS/SDI, SAP HANA, SAP DATASPHHERE, MS BI, ADF, Informatica, SAP Information Steward, Power BI
- Azure/Cloud Platform experience (Azure Data Lake, Data Factory, Database, SQL Server, ADLS, Azure Synapse, Azure Analysis services ,Azure data bricks)
- Data modelling
- PowerShell scripting
- Data Pipelining

KEY IMPACTAREAS

- Strategic BI/ DWH Implementation & Support
- Project Planning & Management
- Requirement Gathering & Analysis
- SAP BW/HANA/ HANA Modeling/ SAP Data HUB
- Client/ Stakeholder Engagement SAP Data Migration
- High level ETL Architecture Development Process Improvement/ Automation Team Building & Leadership

EDUCATION & CREDENTIALS

- Post Graduate in Computer Application (PGCA) in Networking & Admin, from Kakatiya University, Warangal in 2001
- B.Tech. (Electrical & Electronics) from Kakatiya University, Warangal in 2000.

CERTIFICATIONS

- **SAP:-** SAP Data Engineer – Data Fabric in May 2024
- **Databricks:** - Databricks Certified Data Engineer Associate in Feb 2023

WORK EXPERIENCE

- Working as Senior Data Lead Consultant since Oct'2019 to till date: Mindtree, Hyderabad
- Worked as Senior Data Services Analyst from Jun'2017 to Oct'2019: SPXFLOW India, Bengaluru
- Worked as Senior System Analyst from Feb'2007 to Jun'2017: Atos India, Bengaluru
- Worked as Senior Engineer from Oct'2004 to Jul'2006: Windsor Machine Ltd, Hyderabad
- Worked as Assistant Engineer from Jan'2004 to Oct'2004: Shri Vijay Gimpex Mining Pvt Ltd, Hyderabad
- Worked as Junior Engineer(IT) from Dec'2002 to Nov '2003: Nizam Deccan Sugar Pvt.ltd Bodhan.

ORGANIZATIONAL EXPERIENCE

LTIMindtree

Oct2019 to Present

Role: Senior Specialist (Data Engineer Lead developer)

Responsibilities:

- Working on SAP Data Migration from SAP HR to Success factor.
- Configured the BODS Access server for Realtime services. Developed SAP BODS Realtime jobs for PLM data integration.
- Working on SAP Datasphere and created Data Flow, Replication flows in data builder modeling, FACT -dimension modeling done in Business builder modeling.
- Working on data transformation and data modelling in SAP Datasphere
- POC done migration of Microsoft Dynamics to Central Finance Transaction & Master Data Replication for SAP S/4HANA using Magnitude Source Connect.
- Administering the designing of high level ETL architecture for overall data transfer from the source server to the Enterprise Services Warehouse which encompasses server name, database name, accounts, tables and direction of data flow, Column Mapping, Data dictionary and Metadata
- Design and implement data storage solutions using Azure services such as Azure SQL Database, Azure Cosmos DB, and Azure Data Lake Storage
- Develop and maintain data pipelines using Azure Data Factory and Azure Databricks
- Create and manage data processing jobs using Azure HDInsight and Azure Stream Analytics
- Created CDS Views in SAP HANA
- Perform data modeling and schema design for efficient data storage and retrieval
- Optimize data processing and storage for performance and cost efficiency
- Implement security and compliance measures for data storage and processing
- Interacting with team members to ensure smooth progress of project work, ensuring adherence to quality norms throughout the implementation process
- Driving software architecture activities for business process mapping of the client and identifying appropriate development methodology. Client-side BODS Architect responsible to review and migrate the code of 20 plus developers
- Lead a comprehensive plan to do regression testing of more than 300 jobs in new BODS 4.2 SP8 environment
- Used Azure Data Factory, T-SQL, Spark SQL, and U-SQL Azure Data Lake Analytics to extract, transform, and load data from various sources into Azure data storage services. Ingest data into one or more Azure services, including Azure Data Lake, Azure Storage, Azure SQL, and Azure DW, and process the data in Azure Databricks.
- Developed pipelines in ADF that extract, transform, and load data from sources such as Azure SQL, Blob storage, Azure SQL Data Warehouse, write-back tools, and others.
- Created Spark applications using PySpark and Spark-SQL for data extraction, transformation, and aggregation from multiple file formats to uncover customer usage patterns.
- During my assignment was responsible to lead the cut over activities of 10 plus projects for end-to-end deployments.
- Configured the BODS job server in Hadoop environment. Setup of RFC connection and extract data using ABAP flows. Provided the performance and tuning for SAP Data loads

SPXFLOW India

Jun2017 to Oct2019

Role: Senior SAP BODS developer

Responsibilities:

- Facilitating development initiatives involving mapping of business requirements; delivering periodic services like onetime / technical services based on the business requirements for SAP BODS, HANA, Hadoop implementation projects
- POC done migration of Infor to Central Finance Transaction & Master Data Replication for SAP S/4HANA using Magnitude Source Connect.
- Supervising smooth implementation and testing of the application and extending post go-live & application maintenance support to the client

Atos India**Feb 2007 to Jun 2017****Role: Senior System Analyst****Responsibilities:**

- Monitored Change Data Capture on both Source & Target level for SCD (Slowly changing Dimension) Type 1/ 2 /3
- Spearheaded development of ETL routines in BODS, modified & created new Data Services jobs to meet project requirements
- Rendered technical support enhancing report performance, unit testing
- Utilized security settings in Oracle BI Admin Tool to set up users, groups, access privileges and query privileges Designed complex procedures, triggers, functions, indexes, tables, views, PL/SQL code and SQL joins for ETL Load and high-level ETL architecture
- Anchored creation of MDX formulas for dimensional metrics, cube partitioning & incremental synchronization for SSAS cubes

Windsor Machine Limited**Oct2004 to Jul 2006****Role: Senior Engineer****Responsibilities:**

- Used polling software in Master SCADA system to detect open and closed valve input status Drafted cost estimates for exploration prospect electrical motor Performed overhauling and maintenance of electrical motors

Nizam Deccan Sugars Ltd. (Group of Delta, Hyderabad)**Dec2002 to Nov 2003****Role: Junior Engineer (Trainee)****Responsibilities:**

- Played key role in LAN Network establishment using Ethernet / Fibre Optic / Radio communication/ wireless Network, configuration of servers and workstations and erection & commissioning of Modern Sugar Plant 2500TCD and power plant 15.5MW with Honeywell DCS
