

BALAJI A

QA Automation Engineer

Gmail : balaji17feb@gmail.com | Phone : 8825976300 | LinkedIn : www.linkedin.com/in/balaji-a-9babbb394

PROFESSIONAL SUMMARY

QA Automation Engineer with 3+ years of experience testing cloud-based hotel management and reservation systems. Hands-on experience in Selenium WebDriver automation using Java, TestNG, Cucumber (BDD), and Page Object Model (POM). Skilled in API validation using Postman, CI/CD execution with Jenkins, and deployment verification on AWS (EC2, S3) with Tomcat. Strong understanding of Agile processes, JIRA defect management, and release validation.

TECHNICAL SKILLS

Category	Skills
Testing	- Functional Testing, UI Testing, Regression Testing, Smoke Testing
Programming Language	- Java
Automation	- Selenium WebDriver, TestNG, Cucumber (BDD)
API Testing	- Postman, REST Assured, API Automation
Defect Tracking	- JIRA
Build & Version Control	- Maven, Git
CI/CD	- Jenkins
Cloud	- AWS (EC2, S3, ELB, Route 53)
Databases	- MySQL
Operating Systems	- Linux, Windows

PROFESSIONAL EXPERIENCE

QA Engineer

Fourth Dimension Software Systems Pvt. Ltd. | May 2022 – Present

Company Overview

Product-based company developing and selling cloud-based hotel management software covering Front office , POS, CRS, inventory, and housekeeping modules.

PROJECTS

Project – 1 : Hotel POS & Operations Management System

Domain : Hospitality Management System

Methodology : Agile

Team : 8

Project Overview :

A cloud-based, modular hotel management application supporting multiple operational modules. Application modules can be enabled or switched based on configuration and are deployed on Tomcat to support daily hotel operations.

Key Contributions :

- Perform **functional** and **UI** testing on POS billing and order workflows, ensuring accurate business transactions across POS and front office modules.
- Automated** critical business workflows using **Selenium WebDriver** with **Java** and **Cucumber (BDD)** by implementing Page Object Model (POM) for better maintainability.

- Designed BDD scenarios (**Given–When–Then**) to verify end-to-end functionality against business requirements.
- Verified Channel Manager **API integrations**, validating correct reservation, booking, and notification data flow between external channels and the hotel system.
- Executed **Maven**-based automation suites, analyzed **Extent Reports**, and performed **regression** cycles during releases.
- Followed **STLC** and **SDLC** in an Agile environment by testing new features and bug fixes, and logging, tracking, and re-testing defects in **JIRA** to ensure stable hotel product releases.

Project – 2 : Central Reservation System (CRS) –Selenium Automation & CI/CD Validation

Domain : Hospitality / Reservation Systems

Methodology : Agile

Team : 4

Project Overview :

A centralized CRS application designed to manage hotel reservations and room availability across multiple properties. Selenium automation was integrated with a Jenkins-driven CI/CD pipeline to validate builds automatically and promote only quality-approved releases for deployment.

Key Contributions :

- Automated **CRS test scenarios** using Selenium with Java and **TestNG**, following POM, by converting finalized manual test cases into automation suites for reservation, availability, and booking validation.
- Integrated TestNG automation with **Jenkins**, enabling test execution to run automatically on code changes from **GitHub**.
- Configured Jenkins to stop the **CI pipeline** on TestNG test failures, allowing only **test-passed** builds to proceed further.
- Monitored Jenkins **build status** and Slack notifications, and executed automation suites using Maven as part of the **CI/CD** lifecycle.
- Performed **post-deployment smoke** and **regression testing** to confirm application stability after releases.
- Reported and retested defects using JIRA, **coordinating with developers** to resolve issues and re-run test cases and CI pipelines as part of the SDLC.

EDUCATION

Bachelor of Technology (B.Tech) – Electronics and Communication Engineering

SRM Institute of Science and Technology, Chennai
2017 – 2021

ADDITIONAL INFORMATION

Languages - English, Tamil

Certifications - Selenium Automation Testing with Java – Udemy
- CI/CD Fundamentals with Jenkins – Udemy
- REST API Testing with Postman – Udemy
