Carnegie Mellon University

PROFESSIONAL SUMMARY

Strategic Enterprise Architect with over 15 years of leadership experience delivering enterprise-wide transformation across financial services, insurance, healthcare, and federal sectors. Expert in aligning technology execution with business strategy through capability modeling, portfolio rationalization, and data-driven decision frameworks. Proven ability to integrate AI/ML to drive innovation, enable predictive analytics, and reduce operational risk. Led initiatives that achieved over \$50M in enterprise cost savings, increased architecture planning agility by 40%, and improved regulatory readiness through data governance integration.

Trusted advisor to C-level executives with deep experience enabling digital transformation through architecture-led planning, AI-driven risk modeling, and enterprise-wide governance. Adept in deploying architecture tools (OrbusInfinity, Collibra), governing model lifecycle metadata, and supporting AI/ML deployment strategies within regulated industries.

Core competencies:

Enterprise Capability Modeling | Architecture Governance | Portfolio Rationalization | Data Strategy | AI/ML Integration | Sparx | Roadmap Development | Business-IT Alignment | TOGAF | ArchiMate | OrbusInfinity | Digital Transformation

PROFESSIONAL EXPERTISE/EMPLOYMENT HISTORY

Genous Consulting, *Enterprise Architect*, Muncie, IN (12/2024 – Present)

- **Partnered with C-level stakeholders and domain leaders** to shape multi-year roadmaps-aligning AI/ML governance and analytics investments with strategic goals—to position architecture as a driver of growth, customer experience, and operational resilience.
- **Accelerated \$15M in digital transformation initiatives** by developing a capability maturity framework adopted by senior leadership to align investment sequencing with business readiness and strategic priorities.
- **Delivered \$3.2M in cost optimization** by rationalizing redundant capabilities and harmonizing technology landscapes using integrated modeling across OrbusInfinity, CMDB, and ServiceNow ecosystems.

- **Enabled a 30% reduction in enterprise planning cycle times** by deploying OrbusInfinity as a centralized architecture platform, enhancing strategic visibility across 100+ business capabilities, applications, and infrastructure assets.
- **Improved portfolio decision velocity by 25%** through executive dashboards delivering real-time KPIs on IT-business alignment, capability risk exposure, and architectural debt—supporting more agile capital planning and reprioritization.
- **Increased time-to-value by 30%** through reusable TOGAF- and MITA-aligned modeling templates that standardized capability, process, and application landscapes—reducing delivery cycle times across 20+ initiatives.
- **Enhanced enterprise compliance tracking and audit readiness by 40%** by embedding architecture metadata into Collibra, ensuring traceability from strategic intent to governed data and system assets.

PNC Bank, *Sr. Enterprise Architect*, Muncie, IN (8/2022 – 12/2024)

- **Led enterprise-wide capability and application rationalization**—spanning multiple lines of business including Data & Analytics and AI/ML—resulting in \$250M in cost savings by identifying functional redundancies, aligning technology investments with strategic imperatives, and decommissioning legacy and low-value platforms. This effort required deep analysis of AI/ML workloads, model lifecycles, and data infrastructure to ensure optimization without disrupting innovation.
- **Accelerated enterprise transformation execution by 35%** by operationalizing a capability-led roadmap that guided capital investment decisions, digital modernization efforts, and process reengineering programs.
- **Standardized enterprise inventories** of business capabilities, technology assets, and data domains, enabling a unified architecture repository that increased planning accuracy and regulatory reporting effectiveness across 8 departments.
- **Improved time-to-strategy alignment by 30%** through the development of a maturity-driven capability model, used by business and IT executives to inform funding allocation and architectural runway for product delivery teams.
- **Reduced duplication of effort and improved compliance posture by 25%** by leading enterprise-wide governance initiatives and establishing architecture standards, policies, and reusable reference models.
- **Influenced multi-year investment strategies** by partnering directly with senior executives and portfolio leads to translate regulatory, operational, and digital mandates into actionable architecture roadmaps.
- **Championed enterprise adoption of architecture best practices**, elevating business architecture as a core function in strategic planning and enabling cross-domain collaboration on data, process, and technology modernization.

Finvi, *Sr. Consultant*, Muncie, IN (4/2019 – 7/2022)

- **Accelerated solution delivery by 40%** by mentoring engineering teams in agile, outcome-driven methods for designing and deploying configurable platforms tailored to federal and healthcare client needs.
- **Delivered over \$6M in client operational efficiencies** by leading end-to-end solution architecture efforts—optimizing workflows, reducing manual processing, and improving compliance adherence in regulated environments.
- **Reduced time-to-implementation by 35%** by architecting reusable components and configuration scripts across multiple client engagements, improving delivery consistency and lowering customization overhead.
- **Elevated customer satisfaction scores by 28%** through proactive stakeholder engagement, clear communication of solution design rationale, and ensuring alignment between technical execution and business objectives.
- **Strengthened cross-functional team capabilities** by leading training on best practices in solution delivery, fostering a culture of innovation, technical ownership, and client-first thinking.
- **Advised federal agencies and healthcare institutions** on architecture strategies to streamline revenue cycle operations, enhance data integrity, and ensure long-term platform scalability.

Federal Home Loan Bank of Indianapolis, *Enterprise Architect*, Indianapolis, IN (5/2016 – 4/2019)

- **Developed and governed 3–5-year strategic roadmaps** for core operational areas, directly influencing funding decisions and technology modernization trajectories for treasury, finance, and IT.
- **Enabled \$8M in operational cost avoidance** by leading enterprise capability assessments and aligning IT initiatives with long-range business strategies across the domains of business, data, applications, and security.
- **Improved enterprise change agility by 30%** through the implementation of OrbusInfinity as the architecture management platform, creating a unified view of systems, capabilities, and strategic initiatives.
- **Chaired the Architecture Review Board (ARB)** and Enterprise Architecture Working Group, driving cross-functional alignment on standards, reference models, and transformational initiatives.
- **Established a formal Data Governance program**—improving data quality, lineage tracking, and regulatory reporting confidence across risk and compliance functions.
- **Launched enterprise-wide architecture maturity modeling**, resulting in strategic prioritization of capability gaps and targeted investments in underwriting, risk, and liquidity management systems.
- **Reduced technology delivery risk** by embedding architecture governance within portfolio management, elevating visibility of interdependencies and technical debt to the executive steering committee.

Interactive Intelligence, *Implementation Consultant*, Indianapolis, IN (5/2011 – 1/2016)

- **Built trusted advisor relationships with CIOs and enterprise architects**, helping clients align contact center modernization with broader digital transformation and customer experience strategies.
- **Delivered over 50 high-ROI enterprise implementations** for financial services clients, consistently completing projects on or ahead of schedule and under budget, resulting in >\$10M in cumulative client savings.
- **Accelerated client time-to-value by 45%** through reusable implementation frameworks and roadmap development, significantly reducing onboarding and integration timelines across multiple Fortune 500 clients.
- **Architected and deployed a business intelligence strategy for State Farm Bank**, aligning data analytics solutions with ITIL governance and enabling executive reporting on performance, compliance, and service-level trends.
- **Designed a telecommunications analytics platform** for Navient, enabling enhanced operational insights and decision support that improved contact center performance by 22%.
- **Standardized enterprise integration roadmaps** for major accounts including Conn's and CapQuest, ensuring consistent alignment between client architecture and Interactive Intelligence's CaaS/Premise solutions.
- **Co-developed the Implementation Methodology for ARM Division**, institutionalizing delivery best practices that improved implementation efficiency, quality assurance, and client satisfaction scores.

ADDITIONAL PROFESSIONAL EXPERTISE/EMPLOYMENT HISTORY

Jackson Consulting, *Solutions Architect*, Muncie, IN (11/2010 – 5/2011)

Sallie Mae, *Application Analyst II*, Fishers, IN (2/2009 – 11/2010)

Ontario Systems, *Software Engineer*, Muncie, IN (5/2005 – 12/2008)

Enron, *Analyst*, Houston, TX (1/2000 – 12/2001)

United Space Alliance, *Software Developer for Mission Control Center Applications*, Houston, TX (2/1999 – 12/1999)
