

Antonio Torres-Ruiz

Software Developer

Lodi, CA 95240

antoniotorresruiz2axpf_bmx@indeedemail.com

+12097125778

Software developer with a Bachelors of Science in Computer Science and Engineering from the University of California Merced with a specific focus on iOS development and console-line programs.

Primarily, works with Swift, Swift UI, and Python, but has experience with various languages as well. Comfortable working in teams on projects and maintaining a GitHub repository for source control, as well as general app development. Worked as a project lead and UI designer, for both web and mobile based applications.

- Experienced programming and developing with Swift, Java, C++, C, Python, SQL, Objective-C.
- Proficient in HTML5, CSS and JavaScript for basic web development.
- Comfortable with Git for source control management, continuous delivery and continuous integration.
- Collaborated in team projects following Agile-Scrum development practices. Served as project leader in multiple projects during formal training and university.
- Experienced iOS UI developer trained in Swift, UI Kit, Storyboards and learning Swift UI for iOS development.
- Experienced with developing applications for iOS and console-line programs using Java, Python and C++.

Authorized to work in the US for any employer

Work Experience

CDE Full Stack Engineer

Cognizant - Remote

June 2021 to December 2022

Worked as an iOS contractor for Cognizant and was assigned to client projects.

These projects include:

Pixelgram

- iOS app created for training purposes.
- Allowed users to post pictures and share them with their friends, as well as leave comments and likes on posts.
- Developed using Swift, Storyboards, XIBs, and Cocoa Pods.
- Used Gitlab for source control, continuous integration and continuous delivery.
- Designed the home screen of the app which displayed the posts.
- Designed the login screen that allowed registered users to sign in.
- Designed the screen for creating new posts.
- Loaded data from an API to populate the posts, filling said posts with usernames, profile pictures, descriptions, and the uploaded images.

- Used API calls to check for registered username and password combinations.

L2 Mobility Support Team

- A project for the client NextEra Energy Inc.
- Further details provided in relevant work experience.

iOS Developer

Revature - Remote

April 2021 to December 2022

Worked as an iOS contractor and developer assigned to various projects with their client, Cognizant.

Projects worked on while training at Revature include:

- A quiz app where users can check their proficiency with technologies such as Swift, Java, Python, and C++ to know areas needed to improve upon.
- A mobile app that collects feedback from customers about their experience with a fictional resort to make improvements in services. Users can create an account before leaving feedback.
- A shopping app that simulates the functionality of the Amazon app, including a dynamically updating front page that displays random items from the catalog on reloading.

General responsibilities for each of these projects:

- Team leader. Assigned roles to each member, regularly provided progress updates to the instructor, presented the projects.
- UI designer, primarily focusing on UI Kit and Storyboards for iOS development.
- Maintaining the GitHub repository for each project.

Support Specialist

NextEra Energy, Inc - Remote

August 2021 to May 2022

Worked on the L2 Mobility Support Team, a team designed to provide support and maintenance for applications developed for internal use by NextEra.

My responsibilities included:

- Connecting with users to handle support tickets when issues occurred while using NextEra apps.
- Providing access to users, allowing them to use NextEra apps.
- Testing planned updates for NextEra apps before the updates were pushed to production.
- Bug fixing to resolve issues users are facing with NextEra apps whenever applicable.
- Monitoring server health to inform the L2 Mobility Support team whenever servers received heavy traffic during short periods.
- Verifying valid pull requests and code changes before merges were allowed into the main branch.
- Served as one of only two on-site team members, working in the same time zone as users.

Education

Bachelor's degree in Computer Science

University of California - Merced, CA

2016 to 2020

Skills

- Discord API
- Programming
- SwiftUI
- Front-End Development
- UIKit
- Continuous Integration (CI)
- Jenkins
- Web Applications
- HTML
- Java
- JavaScript
- Python
- Swift
- MATLAB
- SQL
- SQLite
- CSS
- REST
- C/C++
- Agile
- Git
- User Interface (UI)
- GitHub
- Test Cases
- Unit Testing
- Computer science
- Databases
- Application development
- Software development
- JSON
- APIs
- Unit testing
- UI
- Front-end development
- Objective-C
- HTML5
- iOS development
- iOS

- Customer service
- Test cases
- Scrum

Languages

- English - Fluent
- Spanish - Fluent
- French - Intermediate
